Quality Assurance: The above analyses are performed in accordance with ASTM, UOP, GPA guidelines for quality assurance, unless otherwise stated.

The image is a screenshot of a Windows File Explorer window. The address bar shows the path 'This PC > Downloads'. The left sidebar displays the 'Quick access' pane with 'Downloads' selected. The main pane shows a list of files and folders. The files are organized into sections: 'Today (7)', 'Yesterday (3)', and 'Earlier this week (40)'. The files include various documents related to 'Calculations or Specific Justification for the Volumes', 'Compositional Analysis of Treated or Flared NG', 'Scaled Site Map', and '2022 AGP NM Daily Rate'. The right side of the image shows a preview of a PDF document titled 'Certificate of Analysis' from 'SPL'. The document includes a header with 'Page 2 of 8', a logo, and contact information for 'Arctic Laboratory'. The main body of the document contains a table of 'Analytical Data' with columns for 'Components', 'Un-normalized Mol %', 'Mol %', 'WT %', and 'GPM at 14.73 psia'. The table lists various components like Nitrogen, Methane, Carbon Dioxide, Ethane, Propane, Isobutane, n-Butane, iso-pentane, n-Pentane, and Hexanes Plus. The bottom of the document features a signature and the text 'Hydrocarbon Laboratory Manager'.

QUESTIONS

| Date(s) and Time(s)                            |            |
|------------------------------------------------|------------|
| Date vent or flare was discovered or commenced | 11/05/2022 |
| Time vent or flare was discovered or commenced | 12:00 AM   |
| Time vent or flare was terminated              | 02:40 PM   |
| Cumulative hours during this event             | 15         |

| Measured or Estimated Volume of Vented or Flared Natural Gas              |                                                                                                               |
|---------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|
| Natural Gas Vented (Mcf) Details                                          | Not answered.                                                                                                 |
| Natural Gas Flared (Mcf) Details                                          | Cause: Equipment Failure   Valve   Natural Gas Flared   Released: 414 Mcf   Recovered: 0 Mcf   Lost: 414 Mcf. |
| Other Released Details                                                    | Not answered.                                                                                                 |
| Additional details for Measured or Estimated Volume(s). Please specify    | Not answered.                                                                                                 |
| Is this a gas only submission (i.e. only significant Mcf values reported) | Yes, according to supplied volumes this appears to be a "gas only" report.                                    |

| Venting or Flaring Resulting from Downstream Activity             |               |
|-------------------------------------------------------------------|---------------|
| Was this vent or flare a result of downstream activity            | No            |
| Was notification of downstream activity received by this operator | Not answered. |
| Downstream OGRID that should have notified this operator          | Not answered. |
| Date notified of downstream activity requiring this vent or flare | Not answered. |
| Time notified of downstream activity requiring this vent or flare | Not answered. |

| Steps and Actions to Prevent Waste                                                                                               |                                                      |
|----------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|
| For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control. | True                                                 |
| Please explain reason for why this event was beyond this operator's control                                                      | We had some valve failure.                           |
| Steps taken to limit the duration and magnitude of vent or flare                                                                 | We limit production,                                 |
| Corrective actions taken to eliminate the cause and reoccurrence of vent or flare                                                | Will enhance field work to repair equipment quicker. |
