Station Name: Comanche CTB 1H Test

Station Number: 55680039

Station Location: Caza

Sample Point: Meter Run

Instrument: 6030\_GC6 (Inficon GC-3000 Micro)

Last Inst. Cal.: 05/02/2022 0:00 AM

Analyzed: 05/03/2022 11:36:50 by ERG

Sampled By: CM

Sample Of: Gas Spot

Sample Date: 04/29/2022 02:05

Sample Conditions: 152.1 psig, @ 120.7 °F Ambient: 96 °F

Effective Date: 04/29/2022 02:05

Method: GPA-2261M

Cylinder No: 5030-01267

| Was this vent or flare caused by an emergency or malfunction                                                                                                                                                                                                                               | No                                                |
| Did this vent or flare last eight hours or more cumulatively within any 24-hour period from a single event                                                                                                                                                                                 | Yes                                               |
| Is this considered a submission for a vent or flare event                                                                                                                                                                                                                                  | Yes, major venting and/or flaring of natural gas. |
| An operator shall file a form C-141 instead of a form C-129 for a release that, includes liquid during venting and/or flaring that is or may be a major or minor release under 19.15.29.7 NMAC.                                                                                            |                                                   |
| Was there <b>at least 50 MCF</b> of natural gas vented and/or flared during this event                                                                                                                                                                                                     | Yes                                               |
| Did this vent or flare result in the release of <b>ANY</b> liquids (not fully and/or completely flared) that reached (or has a chance of reaching) the ground, a surface, a watercourse, or otherwise, with reasonable probability, endanger public health, the environment or fresh water | No                                                |
| Was the vent or flare within an incorporated municipal boundary or withing 300 feet from an occupied permanent residence, school, hospital, institution or church in existence                                                                                                             | No                                                |

|                                                           |               |
|-----------------------------------------------------------|---------------|
| <b>Equipment Involved</b>                                 |               |
| Primary Equipment Involved                                | Not answered. |
| Additional details for Equipment Involved. Please specify | Not answered. |

|                                                                                                                                                                    |    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Representative Compositional Analysis of Vented or Flared Natural Gas</b><br><i>Please provide the mole percent for the percentage questions in this group.</i> |    |
| Methane (CH4) percentage                                                                                                                                           | 82 |
| Nitrogen (N2) percentage, if greater than one percent                                                                                                              | 1  |
| Hydrogen Sulfide (H2S) PPM, rounded up                                                                                                                             | 0  |
| Carbon Dioxide (C02) percentage, if greater than one percent                                                                                                       | 2  |
| Oxygen (O2) percentage, if greater than one percent                                                                                                                | 0  |
| If you are venting and/or flaring because of Pipeline Specification, please provide the required specifications for each gas.                                      |    |
| Methane (CH4) percentage quality requirement                                                                                                                       | 0  |
| Nitrogen (N2) percentage quality requirement                                                                                                                       | 0  |
| Hydrogen Sufide (H2S) PPM quality requirement                                                                                                                      | 0  |

QUESTIONS

| Date(s) and Time(s)                            |            |
|------------------------------------------------|------------|
| Date vent or flare was discovered or commenced | 12/14/2022 |
| Time vent or flare was discovered or commenced | 04:15 AM   |
| Time vent or flare was terminated              | 07:45 PM   |
| Cumulative hours during this event             | 16         |

| Measured or Estimated Volume of Vented or Flared Natural Gas              |                                                                                                           |
|---------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|
| Natural Gas Vented (Mcf) Details                                          | Not answered.                                                                                             |
| Natural Gas Flared (Mcf) Details                                          | Cause: Other   Gas Plant   Natural Gas Flared   Released: 1,967 Mcf   Recovered: 0 Mcf   Lost: 1,967 Mcf. |
| Other Released Details                                                    | Cause:     Other (Specify)   Released: 0 (Unknown Released Amount)   Recovered: 0   Lost: 0 .             |
| Additional details for Measured or Estimated Volume(s). Please specify    | Not answered.                                                                                             |
| Is this a gas only submission (i.e. only significant Mcf values reported) | Yes, according to supplied volumes this appears to be a "gas only" report.                                |

| Venting or Flaring Resulting from Downstream Activity             |                                |
|-------------------------------------------------------------------|--------------------------------|
| Was this vent or flare a result of downstream activity            | Yes                            |
| Was notification of downstream activity received by this operator | No                             |
| Downstream OGRID that should have notified this operator          | [147831] Lucid Artesia Company |
| Date notified of downstream activity requiring this vent or flare |                                |
| Time notified of downstream activity requiring this vent or flare | Not answered.                  |

| Steps and Actions to Prevent Waste                                                                                              |                                                                                                |
|---------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control | True                                                                                           |
| Please explain reason for why this event was beyond this operator's control                                                     | Downstream operator had gas flowline down. This event was outside the control of the operator. |
| Steps taken to limit the duration and magnitude of vent or flare                                                                | Flare minimal mcf.                                                                             |
| Corrective actions taken to eliminate the cause and reoccurrence of vent or flare                                               | Downstream operator had gas flowline down. This event was outside the control of the operator. |
