Natural Gas Flared (Mcf) Details	Not answered.
Other Released Details	Not answered.
Additional details for Measured or Estimated Volume(s). Please specify	Not answered.
Is this a gas only submission (i.e. only significant Mcf values reported)	Yes, according to supplied volumes this appears to be a "gas only" report.

Venting or Flaring Resulting from Downstream Activity	
Was this vent or flare a result of downstream activity	No
Was notification of downstream activity received by this operator	Not answered.
Downstream OGRID that should have notified this operator	Not answered.
Date notified of downstream activity requiring this vent or flare	Not answered.
Time notified of downstream activity requiring this vent or flare	Not answered.

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	The pipeline had experience pressure of over 200 pounds due to the compressor going down. Therefore, the line automatically kicks to flare for safety reasons when there is high pressure.
Steps taken to limit the duration and magnitude of vent or flare	Action was taken to repair and fix the compressor in order to limit the duration of flaring.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	We are working on plans to better monitor the pressure of the lines and find alternatives way to mitigate the unexpected need to flare.
