## Closure

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (electronic submittals in .pdf format are preferred) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

**Closure Report Attachment Checklist:** *Each of the following items must be included in the closure report.*

- A scaled site and sampling diagram as described in 19.15.29.11 NMAC
- Photographs of the remediated site prior to backfill or photos of the liner integrity if applicable (Note: appropriate OCD District office must be notified 2 days prior to liner inspection)
- Laboratory analyses of final sampling (Note: appropriate ODC District office must be notified 2 days prior to final sampling)
- Description of remediation activities

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.

## 1.0 INTRODUCTION

Rose Rock Environmental Services, LLC (Rose Rock) has been retained by Ram Energy, LLC (Client) to review previously prepared documents pertaining to the original and historical releases as well as provide a Proposed Soil Remediation Work Plan for the West Dollarhide Queen Sand Unit (WDQSU) #99 Flowline (Site) located in Unit Letter I, Section 31, Township 24 South, Range 38 East of Lea County, New Mexico (geographical coordinates 32.1703148N, 103.0941925W). The Site is approximately one and seven tenths (1.7) mile west of the New Mexico/Texas state line and seven (7) miles northeast of Jal, New Mexico.

## 2.0 REMEDIATION

On June 29, 2021, Rose Rock was provided all Client files pertaining to this release. Rose Rock personnel reviewed the information from the Shallow Soil Assessment and the Deep Soil Assessment, including but not limited to maps, soil sampling laboratory analytical results, electromagnetic (EM) survey results, soil boring logs, on-site photos, and historical aerial photographs. Additionally, a field visit was conducted by Rose Rock on September 20, 2021 to review the Site. The objective of the soil remediation was to address the impacts at the Site resulting from the January 31, 2018 release as well as the historic releases predating Client's operation at the Site.

Beginning January 31, 2022 Rose Rock began remediating the Site, based upon a work plan previously agreed upon by the Client, to excavate the impacted media and dispose of it offsite. Rose Rock personnel worked toward the removal and replacement of Site soils that exceed the RRALs and the chloride cleanup levels. Rose Rock excavated the upper four (4) feet of soil for all impacted areas and that material was hauled offsite and properly disposed of; the impacted area can be seen in the red shaded area in the image above. After excavation was completed, soil samples were taken from the sidewalls and bottom of the excavated area in order to be analyzed and confirm that all impacted soil had been removed on March 2, 2022. Additional excavation was done in three areas (Sample ID points 1, 4, and 7) and once completed, were sampled and taken to be re-analyzed on March 28, 2022. Once results confirmed impacted soil had been successfully removed, two (2) synthetic liners were installed within the excavation area, an eight (8) ounce geotextile and a twenty (20) mil liner. The area was then backfilled with clean, new soil and was compacted to existing grade.

### 3.0 LABORATORY RESULTS

March 2, 2022 Soil Sample Test Results

Sample ID	Longitude	Latitude	TTS (ppm)	Chloride (mg/Kg)
001	32.17053	-103.09444	3910	934
002	32.17043	-103.09444	954	126
003	32.17056	-103.09444	3490	161
004	32.170594	-103.09433	4240	721
005	31.170504	-103.09429	1860	286

**Non-Certified Analytes included in this Report**

Analysis	Analyte
SM 2520A in Solid	Total Soluble Salts (as Salinity)

**Certifications**

Code	Description	Number	Expires
NELAP/OK	NELAP Accredited (ODEQ)	2021-166	08/31/2022
TCEQ	Texas Accredited (TCEQ)	T104704498-21-11	03/31/2022

**Qualifiers and Definitions**

Abbreviation	Description
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference
x	Non-Certified analyte
NA	Not Applicable

Qualifier	Description
COM	Completed
V-03	Calibration verification recovery was higher than expected. This may cause a high bias to the result presented.

#### Generator Certification Statement of Waste Status

I hereby certify that according to the Resource Conservation and Recovery Act (RCRA) and the US Environmental Protection Agency's July 1988 regulatory determination, the above described waste is:

- RCRA Exempt: Oil Field wastes generated from oil and gas exploration and production operations and are not mixed with non-exempt waste
- RCRA Non-Exempt: Oil field waste which is non-hazardous that does not exceed the minimum standards for waste hazardous by characteristics established in RCRA regulations, 40 CFR 261.21-261.24 or listed hazardous waste as defined in 40 CFR, part 261, subpart D, as amended. The following documentation is attached to demonstrate the above-described waste is non-hazardous. (Check the appropriate items):
  - MSDS Information
  - RCRA Hazardous Waste Analysis
  - Process Knowledge
  - Other (Provide description above)

**Generator Certification Statement of Waste Status**

I hereby certify that according to the Resource Conservation and Recovery Act (RCRA) and the US Environmental Protection Agency's July 1988 regulatory determination, the above described waste is:

- RCRA Exempt: Oil field wastes generated from oil and gas exploration and production operations and are not mixed with non-exempt waste
- RCRA Non-Exempt: Oil field waste which is non-hazardous that does not exceed the minimum standards for waste hazardous by characteristics established in RCRA regulations, 40 CFR 261.21-261.24 or listed hazardous waste as defined in 40 CFR, part 261, subpart D, as amended. The following documentation is attached to demonstrate the above-described waste is non-hazardous. (Check the appropriate items):

### REQUEST FOR APPROVAL TO ACCEPT SOLID WASTE

1. Generator Name and Address:  
Ram Energy LLC 5100 E. Skelly Drive Suite 600 Tulsa, OK 74135

2. Originating Site:  
WDQSU Flowline #99

3. Location of Material (Street Address, City, State or ULSTR):  
S.1 NM N. 32.1703148 W 109.0941925 API # 30-025-30144

4. Source and Description of Waste:  
Produced water and crude oil impacted soil

Estimated Volume 20 yd<sup>3</sup>/bbls Known Volume (to be entered by the operator at the end of the haul) yd<sup>3</sup>/bbls

5. GENERATOR CERTIFICATION STATEMENT OF WASTE STATUS  
I, John Ausley, representative or authorized agent for Ram Energy LLC do hereby certify that according to the Resource Conservation and Recovery Act (RCRA) and the US Environmental Protection Agency's July 1988 regulatory determination, the above described waste is: (Check the appropriate classification)

- RCRA Exempt: Oil field wastes generated from oil and gas exploration and production operations and are not mixed with non-exempt waste. Operator Use Only: Waste Acceptance Frequency  Monthly  Weekly  Per Load
- RCRA Non-Exempt: Oil field waste which is non-hazardous that does not exceed the minimum standards for waste hazardous by characteristics established in RCRA regulations, 40 CFR 261.21-261.24, or listed hazardous waste as defined in 40 CFR, part 261, subpart D, as amended. The following documentation is attached to demonstrate the above-described waste is non-hazardous. (Check the appropriate items)
- MSDS Information  RCRA Hazardous Waste Analysis  Process Knowledge  Other (Provide description in Box 4)

### GENERATOR 19.15.36.15 WASTE TESTING CERTIFICATION STATEMENT FOR LANDFARMS

I, \_\_\_\_\_, representative for \_\_\_\_\_ do hereby certify that representative samples of the oil field waste have been subjected to the paint filter test and tested for chloride content and that the samples have been found to conform to the specific requirements applicable to landfarms pursuant to Section 15 of 19.15.36 NMAC. The results of the representative samples are attached to demonstrate the above-described waste conform to the requirements of Section 15 of 19.15.36 NMAC.

1. Generator Name and Address:  
Ram Energy LLC 5100 E. Skelly Drive Suite 600 Tulsa, OK 74135

2. Originating Site:  
WDQSU Flowline 99

3. Location of Material (Street Address, City, State or ULSTR):  
Vol Nm N30, 1703148 W103.0941925 API# 30-025-30144

4. Source and Description of Waste:  
Produced water and crude oil impacted soil

Estimated Volume 20 yd<sup>3</sup>/bbls Known Volume (to be entered by the operator at the end of the haul) yd<sup>3</sup>/bbls

5. GENERATOR CERTIFICATION STATEMENT OF WASTE STATUS  
I, John Ausley, representative or authorized agent for Ram Energy LLC do hereby  
certify that according to the Resource Conservation and Recovery Act (RCRA) and the US Environmental Protection Agency's July 1988  
regulatory determination, the above described waste is: (Check the appropriate classification)

RCRA Exempt: Oil field wastes generated from oil and gas exploration and production operations and are not mixed with non-exempt waste. Operator Use Only: Waste Acceptance Frequency  Monthly  Weekly  Per Load

RCRA Non-Exempt: Oil field waste which is non-hazardous that does not exceed the minimum standards for waste hazardous by characteristics established in RCRA regulations, 40 CFR 261.21-261.24, or listed hazardous waste as defined in 40 CFR, part 261, subpart D, as amended. The following documentation is attached to demonstrate the above-described waste is non-hazardous. (Check the appropriate items)

MSDS Information  RCRA Hazardous Waste Analysis  Process Knowledge  Other (Provide description in Box 4)

GENERATOR 19.15.36.15 WASTE TESTING CERTIFICATION STATEMENT FOR LANDFARMS  
I, \_\_\_\_\_, representative for \_\_\_\_\_ do hereby certify that  
representative samples of the oil field waste have been subjected to the paint filter test and tested for chloride content and that the samples  
have been found to conform to the specific requirements applicable to landfarms pursuant to Section 15 of 19.15.36 NMAC. The results  
of the representative samples are attached to demonstrate the above-described waste conform to the requirements of Section 15 of  
19.15.36 NMAC.
