**RECEIVED**  
AUG 4 2011  
NMOCD ARTESIA

Describe Cause of Problem and Remedial Action Taken.\*

Flow line separated due to internal corrosion. Vac Truck was dispatched to the area and picked up all free standing fluids. Disposal was performed at this site to determine impact and Lab Data gathered. The results of this data was discussed with NMOCD personnel and an agreed work plan to excavate the spill site to a depth of 8' across the site, hauling the spoils to an approved disposal facility. The site being backfilled to a depth of 4 foot where a 20 mil plastic liner will be placed in the bottom of the excavated site and it will be backfilled to surface with clean like soils. This work plan was executed and completed as agreed, and does adhere to NMOCD guidelines. This site is closed.

Describe Area Affected and Cleanup Action Taken.\*

Remediated to NMOCD guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
