| Time vent or flare was discovered or commenced | 07:00 AM   |
| Time vent or flare was terminated              | 08:30 PM   |
| Cumulative hours during this event             | 14         |

| Measured or Estimated Volume of Vented or Flared Natural Gas              |                                                                                                                              |
|---------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| Natural Gas Vented (Mcf) Details                                          | Not answered.                                                                                                                |
| Natural Gas Flared (Mcf) Details                                          | Cause: Equipment Failure   Gas Compressor Station   Natural Gas Flared   Released: 27 Mcf   Recovered: 0 Mcf   Lost: 27 Mcf. |
| Other Released Details                                                    | Not answered.                                                                                                                |
| Additional details for Measured or Estimated Volume(s). Please specify    | Not answered.                                                                                                                |
| Is this a gas only submission (i.e. only significant Mcf values reported) | Yes, according to supplied volumes this appears to be a "gas only" report.                                                   |

| Venting or Flaring Resulting from Downstream Activity             |                                        |
|-------------------------------------------------------------------|----------------------------------------|
| Was this vent or flare a result of downstream activity            | Yes                                    |
| Was notification of downstream activity received by this operator | No                                     |
| Downstream OGRID that should have notified this operator          | [371874] STAKEHOLDER GAS SERVICES, LLC |
| Date notified of downstream activity requiring this vent or flare | Not answered.                          |
| Time notified of downstream activity requiring this vent or flare | Not answered.                          |

| Steps and Actions to Prevent Waste                                                                                               |                                                                                                                                                                                                                                                                                     |
|----------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control. | True                                                                                                                                                                                                                                                                                |
| Please explain reason for why this event was beyond this operator's control                                                      | All gas is connected to Stakeholder Midstream Gas Pipeline. Any flaring is due to an upset at their plant or within their gathering system.                                                                                                                                         |
| Steps taken to limit the duration and magnitude of vent or flare                                                                 | This is out of our control. Stakeholder attempts to rectify every situation as quickly as possible.                                                                                                                                                                                 |
| Corrective actions taken to eliminate the cause and reoccurrence of vent or flare                                                | Stakeholder is proceeding with the addition of a second gas processing train for capacity expansion of the Campo Viejo Gas Processing Plant. Steward Energy II has agreed to certain producer commitments in order to support this expansion expected to be completed January 2024. |
