

- **Operators:** Maverick Permian LLC
- **Name and Type of Facility:** MCA Tank Battery #2 Facility
- Ogrid: **331199**
- MCA Tank Battery #2 Facility Id: **fPAC0619939966**
- Latitude 32.81194 Longitude -103.77518
- 614,500 m E by 3,631,200 m N; Zone 13;
- Datum NAD27
- ULSTR D-28-17S-32E
- **Equipment Involved:** Upset flare, EPNFlare
- **Compositional analysis:** See below

| Component  | Mole%   | GPM<br>REAL |
|------------|---------|-------------|
| H2S        | 0.800   |             |
| Nitrogen   | 2.107   |             |
| Methane    | 20.127  |             |
| CO2        | 53.003  |             |
| Ethane     | 8.554   | 2.287       |
| Propane    | 8.368   | 2.305       |
| Isobutane  | 1.180   | 0.386       |
| N-Butane   | 3.058   | 0.964       |
| Isopentane | 0.800   | 0.292       |
| N-Pentane  | 0.737   | 0.267       |
| Hexanes+   | 1.266   | 0.521       |
| Total      | 100.000 | 7.022       |

- **Date and time that flaring occurs:**
- **Estimated Volume of flaring:** 24 hours estimated

**Cause and Nature of flaring:** The MCA Tank Battery #2 had increased levels of H2S and had to flare, was not able to sale gas.

- **Steps taken to limit duration and magnitude of venting:** EPN Flare is only used during upsets and emergencies. The flare is operated with best management practices during flaring events.
- **Corrective actions taken to eliminate the cause and recurrence of:** Maverick is currently looking into potential future solutions to reroute gas to avoid flaring.

**QUESTIONS**

| Date(s) and Time(s)                            |            |
|------------------------------------------------|------------|
| Date vent or flare was discovered or commenced | 09/19/2022 |
| Time vent or flare was discovered or commenced | 09:00 AM   |
| Time vent or flare was terminated              | 09:00 AM   |
| Cumulative hours during this event             | 24         |

| Measured or Estimated Volume of Vented or Flared Natural Gas              |                                                                                                             |
|---------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------|
| Natural Gas Vented (Mcf) Details                                          | Not answered.                                                                                               |
| Natural Gas Flared (Mcf) Details                                          | Cause: Other   Other (Specify)   Natural Gas Flared   Released: 517 Mcf   Recovered: 0 Mcf   Lost: 517 Mcf. |
| Other Released Details                                                    | Not answered.                                                                                               |
| Additional details for Measured or Estimated Volume(s). Please specify    | Not answered.                                                                                               |
| Is this a gas only submission (i.e. only significant Mcf values reported) | Yes, according to supplied volumes this appears to be a "gas only" report.                                  |

| Venting or Flaring Resulting from Downstream Activity             |               |
|-------------------------------------------------------------------|---------------|
| Was this vent or flare a result of downstream activity            | No            |
| Was notification of downstream activity received by this operator | Not answered. |
| Downstream OGRID that should have notified this operator          | Not answered. |
| Date notified of downstream activity requiring this vent or flare |               |
| Time notified of downstream activity requiring this vent or flare | Not answered. |

| Steps and Actions to Prevent Waste                                                                                              |                                                                                                                                   |
|---------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control | True                                                                                                                              |
| Please explain reason for why this event was beyond this operator's control                                                     | The MCA Tank Battery #2 had increased levels of H2S and had to flare, was not able to sale gas.                                   |
| Steps taken to limit the duration and magnitude of vent or flare                                                                | EPN Flare is only used during upsets and emergencies. The flare is operated with best management practices during flaring events. |
| Corrective actions taken to eliminate the cause and reoccurrence of vent or flare                                               | Maverick is currently looking into potential future solutions to reroute gas to avoid flaring.                                    |

|                                     |                                                                                                                                                                                                                                                                                                     |
|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input checked="" type="checkbox"/> | I acknowledge that with this application I will be amending an existing incident file (assigned to this operator) for a vent or flare event, pursuant to 19.15.27 and 19.15.28 NMAC.                                                                                                                |
| <input checked="" type="checkbox"/> | I acknowledge that amending an incident file does not replace original submitted application(s) or information and understand that any C-129 forms submitted to the OCD will be logged and stored as public record.                                                                                 |
| <input checked="" type="checkbox"/> | I hereby certify the statements in this amending report are true and correct to the best of my knowledge and acknowledge that any false statement may be subject to civil and criminal penalties under the Oil and Gas Act.                                                                         |
| <input checked="" type="checkbox"/> | I acknowledge that the acceptance of any C-129 forms by the OCD does not relieve this operator of liability should their operations have failed to adequately investigate, report, and remediate contamination that poses a threat to groundwater, surface water, human health, or the environment. |
| <input checked="" type="checkbox"/> | I acknowledge that OCD acceptance of any C-129 forms does not relieve this operator of responsibility for compliance with any other applicable federal, state, or local laws and/or regulations.                                                                                                    |
