NATURE OF RELEASE

| | | |
|--|--|---|
| Type of Release Natural Gas and Pipeline Liquid | Volume of Release: 83 MCF gas and 1 gallon of liquid | Volume Recovered: N/A |
| Source of Release Pipeline Leak | Date and Hour of Occurrence 10/14/2016 @ 11:15 MST | Date and Hour of Discovery 10/14/2016 @ 11:15 MST |
| Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required | If YES, To Whom? Mike Bratcher | |
| By Whom? Alena Miro | Date and Hour 10/14/2016 @ 11:27 MST | |
| Was a Watercourse Reached? <input checked="" type="checkbox"/> Yes <input checked="" type="checkbox"/> No | If YES, Volume Impacting the Watercourse. 1 gallon | |

If a Watercourse was Impacted, Describe Fully.*

On October 14, 2016, it was discovered that pipeline liquids were released into Salt Draw. The NRC and NMOCD were notified immediately upon discovery 10/14/2016 @ 11:20 MST. Salt Draw is an ephemeral stream that has down cut through thick bedded gypsum. The confluence with the Pecos River is approximately 0.76 miles downstream of the release point.

Describe Cause of Problem and Remedial Action Taken.*

Natural gas and pipeline liquids were released due to a pipeline leak. The pipeline segment was isolated and blown down. Following repair, the section of pipe traversing the draw will be taken out of service and abandoned. The pipeline to the north side of the draw is blocked in and blinded. The pipeline to the south side of the draw will be pigged to remove residual liquids and then returned to service.

Describe Area Affected and Cleanup Action Taken.*

At the time of the release the draw contained rainwater; however, a natural dirt berm in the draw contained the water and prevented it from flowing downstream during the release. All pipeline fluids and potentially affected rainwater were removed from the draw. Clean-up action will follow Enterprise Field Services General Release Notification, Response and Remediation Plan(March 9, 2015) and closure report submitted.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
