

## Certificate of Analysis

Number: 6030-22010241-002A

**Artesia Laboratory**  
200 E Main St.  
Artesia, NM 88210  
Phone 575-746-3481

Station Name: Cosmok CTB  
Station Number:  
Sample Point: Fuel Line to Compressor  
Formation: Spot  
County: Lea  
Type of Sample: Spot-Cylinder  
Heat Trace Used: N/A  
Sampling Method: Fill and Purge  
Sampling Company: SPL

Jan. 27, 2022  
Sampled By: Gerardo Rodriguez  
Sample Of: Gas Spot  
Sample Date: 01/27/2022 11:33  
Sample Conditions: 103.3 psig Ambient: 40 °F  
Effective Date: 01/27/2022 11:33  
Method: GPA-2261M  
Cylinder No: 5030-02989  
Instrument: 70142339 (Inficon GC-MicroFusion)  
Last Inst. Cal.: 01/24/2022 0:00 AM  
Analyzed: 01/27/2022 16:16:07 by KNF

## Analytical Data

QUESTIONS

| Date(s) and Time(s)                            |            |
|------------------------------------------------|------------|
| Date vent or flare was discovered or commenced | 04/05/2024 |
| Time vent or flare was discovered or commenced | 12:01 AM   |
| Time vent or flare was terminated              | 11:59 PM   |
| Cumulative hours during this event             | 3          |

| Measured or Estimated Volume of Vented or Flared Natural Gas              |                                                                                                                    |
|---------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|
| Natural Gas Vented (Mcf) Details                                          | Not answered.                                                                                                      |
| Natural Gas Flared (Mcf) Details                                          | Not answered.                                                                                                      |
| Other Released Details                                                    | Cause: Equipment Failure   Tank (Any)   Natural Gas Flared   Released: 150 Mcf   Recovered: 0 Mcf   Lost: 150 Mcf. |
| Additional details for Measured or Estimated Volume(s). Please specify    | Not answered.                                                                                                      |
| Is this a gas only submission (i.e. only significant Mcf values reported) | Yes, according to supplied volumes this appears to be a "gas only" report.                                         |

| Venting or Flaring Resulting from Downstream Activity             |               |
|-------------------------------------------------------------------|---------------|
| Was this vent or flare a result of downstream activity            | No            |
| Was notification of downstream activity received by this operator | Not answered. |
| Downstream OGRID that should have notified this operator          | Not answered. |
| Date notified of downstream activity requiring this vent or flare | Not answered. |
| Time notified of downstream activity requiring this vent or flare | Not answered. |

| Steps and Actions to Prevent Waste                                                                                               |                                                                                                                                                                      |
|----------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control. | True                                                                                                                                                                 |
| Please explain reason for why this event was beyond this operator's control                                                      | The location experienced a malfunction that was not anticipated and the flaring can be attributed to the downtime of the equipment/compressor station being shut in. |
| Steps taken to limit the duration and magnitude of vent or flare                                                                 | Standard PM. Worked with vendor to coordinate service time and minimize downtime.                                                                                    |
| Corrective actions taken to eliminate the cause and reoccurrence of vent or flare                                                | Standard PM. No way to avoid periodic downtime for maintenance/repairs to address unforeseen issues.                                                                 |
