Please explain reason for why this event was beyond this operator's control	The detected leaks stemmed from standard equipment wear, which remained unnoticed without the aid of advanced technologies.
Steps taken to limit the duration and magnitude of vent or flare	LOGOS has instituted a comprehensive leak detection and repair initiative across all assets. These inspections are scheduled routinely, annually, in accordance with the NMED Ozone Precursor Rule, which dictates the frequency of inspections to mitigate event durations. Upon detection, the leak was promptly addressed within the 30-day timeframe mandated by the NMED Ozone Precursor rule.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	LOGOS intends to sustain its leak detection and repair program to effectively identify and rectify leaks. Subsequently, the repaired leak will undergo reinspection to ensure successful resolution.
