

Monthly Meter Analysis  
November 2023

Meter #: 81351-01  
Name: ROSA UNIT 119

**Sample**  
Date: 06/08/2023  
Type: Spot  
Pressure: 69.0 H2O:  
Temperature: 70.0 H2S:

| Component              | Mole %   | Liquid Content | Mass %   |
|------------------------|----------|----------------|----------|
| Carbon Dioxide (CO2)   | 3.5279   |                | 9.0521   |
| Nitrogen (N2)          | 0.1005   |                | 0.1641   |
| Methane (C1)           | 95.9007  |                | 89.6977  |
| Ethane (C2)            | 0.1522   | 0.0408         | 0.2668   |
| Propane (C3)           | 0.3187   | 0.0880         | 0.8193   |
| Isobutane (IC4)        | 0.0000   | 0.0000         | 0.0000   |
| n-Butane (NC4)         | 0.0000   | 0.0000         | 0.0000   |
| Isopentane (IC5)       | 0.0000   | 0.0000         | 0.0000   |
| n-Pentane (NC5)        | 0.0000   | 0.0000         | 0.0000   |
| Hexanes Plus (C6+)     | 0.0000   | 0.0000         | 0.0000   |
| Argon (Ar)             |          |                |          |
| Carbon Monoxide (CO)   |          |                |          |
| Hydrogen (H2)          |          |                |          |
| Oxygen (O2)            |          |                |          |
| Helium (He)            |          |                |          |
| Water (H2O)            |          |                |          |
| Hydrogen Sulfide (H2S) |          |                |          |
| Totals                 | 100.0000 | 0.1288         | 100.0000 |

| Property               | Total Sample |
|------------------------|--------------|
| Pressure Base          | 14.730       |
| Temperature Base       | 60.00        |
| Relative Density       | 0.5932       |
| HV, Dry @ Base P,T     | 983.61       |
| HV, Sat @ Base P, T    | 966.45       |
| HV, Sat @ Sample P, T  |              |
| Cricondentherm         |              |
| HCDP @ Sample Pressure |              |
| Full Wellstream        |              |
| Free Water             |              |
| Condensate             |              |
| 26 # RVP Gasoline      |              |
| Testcar Permian        | 0.234        |
| Testcar Panhandle      | 0.351        |
| Testcar Midcon         | 0.380        |

**LOGOS Operating, LLC  
Rosa Unit 119  
Leaks identified as a result of a routine OGI inspection  
API: 3003925143**

During a routine OGI inspection on April 1, 2024, multiple leaks were identified on the wellhead and a leak was identified on the five ball manifold inside of the meter house. All leaks were repaired on April 9, 2024.

**QUESTIONS**

| Date(s) and Time(s)                            |            |
|------------------------------------------------|------------|
| Date vent or flare was discovered or commenced | 04/03/2024 |
| Time vent or flare was discovered or commenced | 12:01 AM   |
| Time vent or flare was terminated              | 11:59 PM   |
| Cumulative hours during this event             | 24         |

| Measured or Estimated Volume of Vented or Flared Natural Gas              |                                                                                                          |
|---------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|
| Natural Gas Vented (Mcf) Details                                          | Cause: Equipment Failure   Well   Natural Gas Vented   Released: 1 Mcf   Recovered: 0 Mcf   Lost: 1 Mcf. |
| Natural Gas Flared (Mcf) Details                                          | Not answered.                                                                                            |
| Other Released Details                                                    | Not answered.                                                                                            |
| Additional details for Measured or Estimated Volume(s). Please specify    | Not answered.                                                                                            |
| Is this a gas only submission (i.e. only significant Mcf values reported) | Yes, according to supplied volumes this appears to be a "gas only" report.                               |

| Venting or Flaring Resulting from Downstream Activity             |               |
|-------------------------------------------------------------------|---------------|
| Was this vent or flare a result of downstream activity            | No            |
| Was notification of downstream activity received by this operator | Not answered. |
| Downstream OGRID that should have notified this operator          | Not answered. |
| Date notified of downstream activity requiring this vent or flare | Not answered. |
| Time notified of downstream activity requiring this vent or flare | Not answered. |

| Steps and Actions to Prevent Waste                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                     |
|----------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control. | True                                                                                                                                                                                                                                                                                                                                                                                                |
| Please explain reason for why this event was beyond this operator's control                                                      | The detected leaks stemmed from standard equipment wear, which remained unnoticed without the aid of advanced technologies.                                                                                                                                                                                                                                                                         |
| Steps taken to limit the duration and magnitude of vent or flare                                                                 | LOGOS has instituted a comprehensive leak detection and repair initiative across all assets. These inspections are scheduled routinely, annually, in accordance with the NMED Ozone Precursor Rule, which dictates the frequency of inspections to mitigate event durations. Upon detection, the leak was promptly addressed within the 30-day timeframe mandated by the NMED Ozone Precursor rule. |
| Corrective actions taken to eliminate the cause and reoccurrence of vent or flare                                                | LOGOS intends to sustain its leak detection and repair program to effectively identify and rectify leaks. Subsequently, the repaired leak will undergo reinspection to ensure successful resolution.                                                                                                                                                                                                |
