Station Name: Blue Marlin CTB Sales Check  
Station Number: 7060430  
Sample Point: Meter run  
Formation: Monthly  
County: Lea, NM  
Type of Sample: Spot-Cylinder  
Heat Trace Used: N/A  
Sampling Method: Fill and Purge  
Sampling Company: SPL

Sampled By: Chad Whitt  
Sample Of: Gas Spot  
Sample Date: 12/28/2022  
Sample Conditions: 156.1 psig, @ 81.43 °F Ambient: 63 °F  
Effective Date: 12/28/2022  
Method: GPA-2261M  
Instrument: 6030\_GC6 (Inficon GC-3000 Micro)  
Last Inst. Cal.: 01/03/2023 0:00 AM  
Analyzed: 01/04/2023 10:04:27 by EBH

QUESTIONS

| Date(s) and Time(s)                            |            |
|------------------------------------------------|------------|
| Date vent or flare was discovered or commenced | 11/30/2024 |
| Time vent or flare was discovered or commenced | 12:01 AM   |
| Time vent or flare was terminated              | 11:59 PM   |
| Cumulative hours during this event             | 3          |

| Measured or Estimated Volume of Vented or Flared Natural Gas              |                                                                                                                             |
|---------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| Natural Gas Vented (Mcf) Details                                          | Not answered.                                                                                                               |
| Natural Gas Flared (Mcf) Details                                          | Not answered.                                                                                                               |
| Other Released Details                                                    | Cause: High Line Pressure   Pipeline (Any)   Natural Gas Flared   Released: 1,216 Mcf   Recovered: 0 Mcf   Lost: 1,216 Mcf. |
| Additional details for Measured or Estimated Volume(s). Please specify    | Not answered.                                                                                                               |
| Is this a gas only submission (i.e. only significant Mcf values reported) | Yes, according to supplied volumes this appears to be a "gas only" report.                                                  |

| Venting or Flaring Resulting from Downstream Activity             |                                     |
|-------------------------------------------------------------------|-------------------------------------|
| Was this vent or flare a result of downstream activity            | Yes                                 |
| Was notification of downstream activity received by this operator | No                                  |
| Downstream OGRID that should have notified this operator          | [371960] LUCID ENERGY DELAWARE, LLC |
| Date notified of downstream activity requiring this vent or flare |                                     |
| Time notified of downstream activity requiring this vent or flare | Not answered.                       |

| Steps and Actions to Prevent Waste                                                                                              |                                                                                                                                                                                                                                                                                        |
|---------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control | True                                                                                                                                                                                                                                                                                   |
| Please explain reason for why this event was beyond this operator's control                                                     | The location experienced a malfunction that was not anticipated and the flaring can be attributed to high line pressure from our midstream provider. O2 detected, pipeline shut valve until issue resolved. Due to this the inability for midstream to take gas, flaring was required. |
| Steps taken to limit the duration and magnitude of vent or flare                                                                | Standard PM. Worked with vendor to coordinate service time and minimize downtime.                                                                                                                                                                                                      |
| Corrective actions taken to eliminate the cause and reoccurrence of vent or flare                                               | Standard PM. No way to avoid periodic downtime for maintenance/repairs to address unforeseen issues.                                                                                                                                                                                   |
