UPSET VENTING EVENT SPECIFIC JUSTIFICATIONS FORM**Facility:** Precious NC 31 CTB**Vent Date:** 12/14/2024**Duration of Event:** 9 Hours 5 Minutes**MCF Vented:** 95**Start Time:** 11:35 AM**End Time:** 08:40 PM**Cause:** Intermittent Venting > Downstream Activity > Enterprise > Orla Gas Plant**Method of Vented Gas Measurement:** Allocated Calculations**1. Reason why this event was beyond Operator's control:**

The emissions event was caused by the unforeseen, unexpected, sudden, and unavoidable interruption, restriction, or complete shut-in of a gas pipeline by a third-party pipeline compressor station operator, which impacted Oxy's ability to send gas to them. This interruption, restriction, or complete shut-in of the gas pipeline by a third-party pipeline compression station operator is downstream of Oxy's custody transfer point and out of Oxy's control to foresee, avoid or prevent from happening and did not stem from any of Oxy's upstream facility activity that could have been foreseen and avoided, and could not have been avoided by good design, operation, and preventative maintenance practices. In this instance, Enterprise, a third-party downstream operator, conducted maintenance work at their Orla plant. This maintenance unexpectedly resulted in several instances of sudden restrictions in their intake gas service capacity from Oxy. Consequently, Oxy experienced challenges with gas takeaway, leading to brief intermittent venting incidents over several hours due to the gas backup to the VRU's because of Enterprise's work. This event was unforeseen and unavoidable, occurring without prior notice or warning from Enterprise Gas Control or their field personnel about maintenance work being performed at their Orla plant, leading to a disruption of the gas service and causing venting to occur.

2. Steps Taken to limit duration and magnitude of venting or flaring:

In this instance, Enterprise, a third-party downstream operator, conducted maintenance work at their Orla plant. This maintenance unexpectedly resulted in several instances of sudden restrictions in their intake gas service capacity from Oxy. Consequently, Oxy experienced challenges with gas takeaway, leading to brief intermittent venting incidents over several hours due to the gas backup to the VRU's because of Enterprise's work. This venting situation was beyond OXY's control, but Oxy took all possible measures to reduce emissions effectively.

3. Corrective Actions taken to eliminate the cause and reoccurrence of venting or flaring:

Oxy is unable to take any corrective actions to eliminate the cause and potential reoccurrence of a downstream third-party owned and operated gas plant's issues, as this is downstream of Oxy's custody transfer point and out of Oxy's control to foresee, avoid, prevent from happening or reoccur. When Enterprise experiences plant or equipment issues or cannot handle the gas volume from Oxy, it restricts Oxy's gas flow. This forces Oxy to flare or vent stranded gas. OXY makes every effort to control and minimize emissions as much as possible. The only actions that Oxy can take and handle that is within its control, is to continually communicate with Enterprise personnel, who own and operate the sales gas pipeline, when possible, during these types of circumstances.

QUESTIONS

Action 415635

QUESTIONS

Operator: OXY USA INC P.O. Box 4294 Houston, TX 772104294	OGRID: 16696
	Action Number: 415635
	Action Type: [C-129] Venting and/or Flaring (C-129)

QUESTIONS

Prerequisites <i>Any messages presented in this section, will prevent submission of this application. Please resolve these issues before continuing with the rest of the questions.</i>	
Incident Well	Unavailable.
Incident Facility	[fAPP2126657195] PRECIOUS CTB

Determination of Reporting Requirements <i>Answer all questions that apply. The Reason(s) statements are calculated based on your answers and may provide additional guidance.</i>	
Was this vent or flare caused by an emergency or malfunction	Yes
Did this vent or flare last eight hours or more cumulatively within any 24-hour period from a single event	Yes
Is this considered a submission for a vent or flare event	Yes, minor venting and/or flaring of natural gas.
<i>An operator shall file a form C-141 instead of a form C-129 for a release that, includes liquid during venting and/or flaring that is or may be a major or minor release under 19.15.29.7 NMAC.</i>	
Was there at least 50 MCF of natural gas vented and/or flared during this event	Yes
Did this vent or flare result in the release of ANY liquids (not fully and/or completely flared) that reached (or has a chance of reaching) the ground, a surface, a watercourse, or otherwise, with reasonable probability, endanger public health, the environment or fresh water	No
Was the vent or flare within an incorporated municipal boundary or within 300 feet from an occupied permanent residence, school, hospital, institution or church in existence	No

Equipment Involved	
Primary Equipment Involved	Other (Specify)
Additional details for Equipment Involved. Please specify	Intermittent Venting > Downstream Activity > Enterprise > Orla Gas Plant

Representative Compositional Analysis of Vented or Flared Natural Gas <i>Please provide the mole percent for the percentage questions in this group.</i>	
Methane (CH4) percentage	71
Nitrogen (N2) percentage, if greater than one percent	1
Hydrogen Sulfide (H2S) PPM, rounded up	0
Carbon Dioxide (CO2) percentage, if greater than one percent	0
Oxygen (O2) percentage, if greater than one percent	0
<i>If you are venting and/or flaring because of Pipeline Specification, please provide the required specifications for each gas.</i>	
Methane (CH4) percentage quality requirement	Not answered.
Nitrogen (N2) percentage quality requirement	Not answered.
Hydrogen Sulfide (H2S) PPM quality requirement	Not answered.
Carbon Dioxide (CO2) percentage quality requirement	Not answered.
Oxygen (O2) percentage quality requirement	Not answered.

QUESTIONS, Page 2

Action 415635

QUESTIONS (continued)

Operator: OXY USA INC P.O. Box 4294 Houston, TX 772104294	OGRID: 16696
	Action Number: 415635
	Action Type: [C-129] Venting and/or Flaring (C-129)

QUESTIONS

Date(s) and Time(s)	
Date vent or flare was discovered or commenced	12/14/2024
Time vent or flare was discovered or commenced	11:35 AM
Time vent or flare was terminated	08:40 PM
Cumulative hours during this event	9

Measured or Estimated Volume of Vented or Flared Natural Gas	
Natural Gas Vented (Mcf) Details	Cause: Other Other (Specify) Natural Gas Vented Released: 95 Mcf Recovered: 0 Mcf Lost: 95 Mcf.
Natural Gas Flared (Mcf) Details	Not answered.
Other Released Details	Not answered.
Additional details for Measured or Estimated Volume(s). Please specify	Allocated Vent Calculations
Is this a gas only submission (i.e. only significant Mcf values reported)	Yes, according to supplied volumes this appears to be a "gas only" report.

Venting or Flaring Resulting from Downstream Activity	
Was this vent or flare a result of downstream activity	Yes
Was notification of downstream activity received by this operator	No
Downstream OGRID that should have notified this operator	[713731] Enterprise Crude Pipeline LLC
Date notified of downstream activity requiring this vent or flare	Not answered.
Time notified of downstream activity requiring this vent or flare	Not answered.

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	The emissions event was caused by the unforeseen, unexpected, sudden, and unavoidable interruption, restriction, or complete shut-in of a gas pipeline by a third-party pipeline compressor station operator, which impacted Oxy's ability to send gas to them. This interruption, restriction, or complete shut-in of the gas pipeline by a third-party pipeline compression station operator is downstream of Oxy's custody transfer point and out of Oxy's control to foresee, avoid or prevent from happening and did not stem from any of Oxy's upstream facility activity that could have been foreseen and avoided, and could not have been avoided by good design, operation, and preventative maintenance practices. In this instance, Enterprise, a third-party downstream operator, conducted maintenance work at their Orla plant. This maintenance unexpectedly resulted in several instances of sudden restrictions in their intake gas service capacity from Oxy. Consequently, Oxy experienced challenges with gas takeaway, leading to brief intermittent venting incidents over several hours due to the gas backup to the VRU's because of Enterprise's work. This event was unforeseen and unavoidable, occurring without prior notice or warning from Enterprise Gas Control or their field personnel about maintenance work being performed at their Orla plant, leading to a disruption of the gas service and causing venting to occur.
Steps taken to limit the duration and magnitude of vent or flare	In this instance, Enterprise, a third-party downstream operator, conducted maintenance work at their Orla plant. This maintenance unexpectedly resulted in several instances of sudden restrictions in their intake gas service capacity from Oxy. Consequently, Oxy experienced challenges with gas takeaway, leading to brief intermittent venting incidents over several

	hours due to the gas backup to the VRU's because of Enterprise's work. This venting situation was beyond OXY's control, but Oxy took all possible measures to reduce emissions effectively.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	Oxy is unable to take any corrective actions to eliminate the cause and potential reoccurrence of a downstream third-party owned and operated gas plant's issues, as this is downstream of Oxy's custody transfer point and out of Oxy's control to foresee, avoid, prevent from happening or reoccur. When Enterprise experiences plant or equipment issues or cannot handle the gas volume from Oxy, it restricts Oxy's gas flow. This forces Oxy to flare or vent stranded gas. OXY makes every effort to control and minimize emissions as much as possible. The only actions that Oxy can take and handle that is within its control, is to continually communicate with Enterprise personnel, who own and operate the sales gas pipeline, when possible, during these types of circumstances.
