Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	Gas was routed to flare when the instrument air compressor unexpectedly shut down. The shutdown was caused by a malfunction of the electric motor. The shutdown of the instrument air compressor caused gas compression to lose instrument air, and the units shut down to protect personnel and equipment.
Steps taken to limit the duration and magnitude of vent or flare	Gas was flared until the instrument air compressor and gas compression were both restarted.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	The instrument air compressor was restarted. Gas compression was then restarted, normal operations resumed, and flaring ceased.
