| Action Type:<br>[C-129] Venting and/or Flaring (C-129)                     |                          |

**QUESTIONS**

| Date(s) and Time(s)                            |            |
|------------------------------------------------|------------|
| Date vent or flare was discovered or commenced | 09/26/2024 |
| Time vent or flare was discovered or commenced | 12:01 AM   |
| Time vent or flare was terminated              | 11:59 PM   |
| Cumulative hours during this event             | 24         |

| Measured or Estimated Volume of Vented or Flared Natural Gas              |                                                                                                                   |
|---------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| Natural Gas Vented (Mcf) Details                                          | Cause: Equipment Failure   Separator   Natural Gas Vented   Released: 152 Mcf   Recovered: 0 Mcf   Lost: 152 Mcf. |
| Natural Gas Flared (Mcf) Details                                          | Not answered.                                                                                                     |
| Other Released Details                                                    | Not answered.                                                                                                     |
| Additional details for Measured or Estimated Volume(s). Please specify    | Not answered.                                                                                                     |
| Is this a gas only submission (i.e. only significant Mcf values reported) | Yes, according to supplied volumes this appears to be a "gas only" report.                                        |

| Venting or Flaring Resulting from Downstream Activity             |               |
|-------------------------------------------------------------------|---------------|
| Was this vent or flare a result of downstream activity            | No            |
| Was notification of downstream activity received by this operator | Not answered. |
| Downstream OGRID that should have notified this operator          | Not answered. |
| Date notified of downstream activity requiring this vent or flare | Not answered. |
| Time notified of downstream activity requiring this vent or flare | Not answered. |

| Steps and Actions to Prevent Waste                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|----------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control. | True                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Please explain reason for why this event was beyond this operator's control                                                      | 1" mercer PRV not holding on the discharge scrubber blowdown line causing line to vent on VRU K710A. Leak was tagged as part of OGI survey on 10/1 and repaired on 10/24. Third party flyover detected this leak on 10/4 and reported it to Chevron on 11/27. Based on this, Chevron submitted an initial NOMVF and investigated further. Upon further investigation into the release, the original incident report was amended to reflect the emission point and a vent and update the date of release from the discovery date to the commencement date of the release. Release volumes were updated accordingly. this report replaces the previously reported fAPP2123762022. |
| Steps taken to limit the duration and magnitude of vent or flare                                                                 | Work order was submitted at the time of the initial OGI survey detection (10/1) and scheduled for repair within the 30-day required time period (repair completed 10/24). Leak was repaired within 24 days, within the 30 day GCPO&G requirement. Training will be provided to operations on this incident and how to prevent reoccurrence.                                                                                                                                                                                                                                                                                                                                     |
| Corrective actions taken to eliminate the cause and reoccurrence of vent or flare                                                | Corrective measures focused on reducing gas emission as quickly and safely as possible to minimize the duration and volume of gas vented                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
