SUBJECT: Deferral Request and Remediation Closure for the Gissler A2 Tank Battery (Gissler #024) Release (NAB1800947656), Eddy County, New Mexico

To Whom It May Concern,

On behalf of Burnett Oil Co, LLC, Strata Resources (Strata) has prepared this Deferral Request and Remediation Closure that describes the delineation and remediation from an approved confirmation sampling plan following the remediation of a release of liquids related to the storage tank activities at the Gissler A2 Tank Battery (Gissler #024). The site is in Unit J, Section 14, Township 17S, Range 30E, Eddy County, New Mexico, on federal land. Figure 1 illustrates the vicinity and site location on an USGS 7.5-minute quadrangle map.

Table 1 summarizes release information and closure criteria.

**Table 1: Release Information and Closure Criteria**

Name	Gissler A2 Tank Battery (Gissler #024)	Company	Burnett Oil Co, LLC
API Number	N/A	Location	32.83118 -103.93931
Incident Number	NAB1800947656		
Estimated Date of Release	01/03/2018	Date Reported to NMOCD	01/03/2018
Land-Owner	Federal	Reported To	NMOCD, BLM
Source of Release	Water tank overflowed releasing oil & water through the thief hatch on top of the tank.		
Released Volume	25 bbls 175 bbls	Released Material	Crude Oil Produced Water
Recovered Volume	0 bbls	Net Release	200 bbls
NMOCD Closure Criteria	>100 feet to Groundwater		
Strata Response Dates	09/22/2023, 11/07/2023, 02/11-02/15/2025, 07/03/2025		

## **1.0 Background**

On January 3, 2018, a release was discovered at the Gissler A2 Tank Battery. The water tank overfilled, releasing oil and water through the thief hatch on top of the tank. Initial response activities were conducted by the operator, and included source elimination by means of repair, site stabilization, and release recovery. The release consisted of 25 bbls of oil and 175 bbls of produced water. Figures 1 and 2 illustrate the vicinity and site location, Figure 3 illustrates the release location.

## **2.0 Site Information and Closure Criteria**

The Gissler A2 Tank Battery is located approximately 2.5 miles northeast of Loco Hills, New Mexico on federally owned land at an elevation of approximately 3,697 feet above mean sea level (amsl).

Based upon the New Mexico Office of the State Engineers (NMOSE) online water well database (Appendix A), depth to groundwater in the area is greater than 101 feet below grade surface (bgs). There is one known water source within ½-mile of the location, according to the NMOSE database ([https://gis.ose.state.nm.us/gisapps/ose\\_pod\\_locations/](https://gis.ose.state.nm.us/gisapps/ose_pod_locations/); accessed 10/19/2023). On March 21, 2023, Atkins Engineering drilled a water well to a depth of 101 feet bgs and completed the well as a dry hole.

The nearest significant watercourse is water line, located approximately 2,000 feet northwest of the location. Figure 2 illustrates the site with 200 and 300-foot radii to indicate that it does not lie within a sensitive area as described in 19.15.29.12.C(4) NMAC.

Based on the information presented herein, the applicable NMOCD Closure Criteria for this site is for a groundwater depth of greater than 100 feet bgs. The site has been restored to meet the standards of Table I of 19.15.29.12 NMAC.

Table 2 demonstrates the Closure Criteria applicable to this location. Pertinent well data is attached in Appendix A.

## **3.0 Release Characterization and Overview of Activities**

On January 3, 2018, Burnett Oil Co Inc., personnel discovered that the water tank at the Gissler A2 Tank Battery had overflowed from the thief hatch. Personnel immediately shut in all valves to eliminate the source. An estimated 25 barrels of crude oil and 175 barrels of produced water were released. From January 9, 2021, to February 2, 2021, Burnett Oil hired Aspen Grow as the environmental consultant. Aspen Grow had initially applied a probiotic to the release area and collected frequent samples to evaluate the effect of the probiotic applied to the spill area. Below is an overview of activities performed since the incident occurred:

- January 9, 2018: Aspen Grow collected samples SP1-SP7. The initial areas of concern were areas surrounding sample points SP2, SP3, SP4, SP5, SP6 and SP7.

- December 19, 2018: Aspen Grow re-collected samples SP1-SP7. The areas of concern continued to be around SP2 and SP5.
- May 18, 2019: Aspen Grow re-collected samples SP3, SP4, SP5 and SP6. The areas surrounding sample points SP4 and SP6 showed to be areas of concern.
- January 3, 2020: Aspen Grow collected samples SP3, SP4, and SP5.
- February 28, 2020: Aspen Grow collected samples SP3 and SP4.
- May 30, 2020: Aspen Grow collected sample SP4.
- August 14, 2020: Aspen Grow collected sample SP4.
- February 27, 2021: Aspen Grow collected sample SP3.
- July 7, 2023: Burnett Oil contacted Strata Resources to support the project based on a denied closure report received on November 14, 2022.
- September 22, 2023: Strata Resources conducted confirmation sampling for sample points SP2, SP6, and sidewalls SW1-SW13. SP2 and SP6 were selected based on the fact that the last investigation samples that still exceeded closure criteria. Sidewalls were conducted since no lateral migration had been completed on the incident.
- November 7, 2023: Strata Resources, continued confirmation sampling for sample points SP1, SP3, SP4, SP5, SP7 and added sample point TB.
- November 21, 2023: Strata Resources receives lab results. All lab results were below closure criteria.
- May 9, 2024: Strata Resources submitted closure report to Burnett Oil.
- February 3, 2025: Strata Resources submitted a confirmation sampling plan to NMOCD (Appendix B).
- February 5, 2025: NMOCD approved the confirmation sampling plan (Appendix C).
- February 11-15, 2025: Samples were collected in accordance with the confirmation sampling plan (Figure 3b).
- March 6, 2025: Analytical Laboratory Results are delivered to Burnett personnel (Appendix D).
- May 19, 2025: Burnett Oil submitted a remediation workplan to NMOCD (Appendix E) and NMOCD approved it.
- July 3, 2025: Confirmation samples were collected in accordance with the remediation workplan (Figure 4a-b).
- July 14, 2025: Analytical Laboratory Results are delivered to Burnett personnel (Appendix F).

#### **4.0 Remediation Activities**

On July 2 and 3, 2025, Burnett Oil excavated the area surrounding SW17 to a depth of two (2) feet bgs (Figure 4a).

On July 3, 2025, Burnett Oil performed confirmation sampling of three (3) samples (CBS 17a-c) at the base of the excavation and six (6) sidewall samples (CSW 1-6). Confirmation samples were

compromised of representative wall and base 5-point composite samples. Samples were submitted for laboratory analysis for total chloride using the United States Environmental Protection Agency (USEPA) Method 300.0; benzene, toluene, ethylbenzene, and total xylenes (BTEX) using USEPA Method 8021B; and total petroleum hydrocarbons (TPH) as motor, diesel, and gasoline range organics (MRO, DRO, and GRO) by USEPA Method 8015D. All samples were placed into laboratory supplied glassware, labeled, and maintained on ice until delivery to Eurofins Environmental Testing in Albuquerque, New Mexico (Appendix F).

Approximately 40 cubic yards of contaminated soil were removed and replaced with clean backfill material in order to return the surface to previous conditions. The contaminated soil was transported for disposal at Lea Land, LLC Landfill, near Hobbs, NM, an NMOCD-permitted disposal facility.

On July 14, 2025, Strata received confirmation that all samples were below NMOCD closure criteria (Table 3).

## **5.0 Deferral Request**

In accordance with NMOCD's workplan approval, Burnett Oil delineated the tank battery area laterally on July 3, 2025 (Figure 4b).

On July 3, 2025, Burnett Oil personnel performed lateral delineation investigation to define the lateral extent of the impacted area within the tank battery. Strata chose four (4) sample locations for sidewall samples from the north, east, south, and west wall of the tank battery (TBSWN–TB TBSWW). Burnett Oil personnel collected a total of eight (8) sidewall samples with varying depths in conjunction with the vertical delineation.

On July 14, 2025, Strata received the analytical results from Eurofins Environment Testing. Analytical results indicated that samples were below the NMOCD closure criteria (Table 3).

On behalf of Burnett, Strata formally requests a deferral to address the contamination inside the tank battery at the time of plugging and abandonment or a major facility deconstruction, whichever comes first. Calculated based on the sampling results, there will be approximately 2,150 ft<sup>2</sup> or 480 yd<sup>3</sup> deferred.

If the deferral request is approved, a remedial action report detailing the excavation expansion and confirmation sampling activities will be prepared and submitted following the completion of the aforementioned activities scheduled for a future date.

## **6.0 Scope and Limitations**

The scope of our services included: verifying release stabilizations; regulatory liaison; remediation; preparation of the sampling plan; preparation of the remediation plan; and preparation of this deferral request. All work has been performed in accordance with generally

accepted professional environmental consulting practices for oil and gas releases in the Permian Basin in New Mexico.

If there are any questions regarding this report, please contact Hayden Acosta at (505) 249-9506 or hayden@strataresourcesllc.com.

## APPENDIX B: CONFIRMATION SAMPLING PLAN

February 3, 2025

NMOCD District 2  
1811 S. First St.,  
Artesia, New Mexico 88210

SUBJECT: Confirmation Sampling Plan for the Gissler A2 Tank Battery (Gissler #024) Release (NAB1800947656), Eddy County, New Mexico

To Whom It May Concern,

On behalf of Burnett Oil Co, LLC, Strata Resources (Strata) has prepared this Confirmation Sampling Plan that describes the proposed confirmation sampling following the remediation of a release of liquids related to the storage tank activities at the Gissler A2 Tank Battery (Gissler #024). The site is in Unit J, Section 14, Township 17S, Range 30E, Eddy County, New Mexico, on federal land. Figure 1 illustrates the vicinity and site location on an USGS 7.5-minute quadrangle map.

Table 1 summarizes release information and closure criteria.

Table 1: Release Information and Closure Criteria			
Name	Gissler A2 Tank Battery (Gissler #024)	Company	Burnett Oil Co, LLC
API Number	N/A	Location	32.83118 -103.93931
Incident Number	NAB1800947656		
Estimated Date of Release	01/03/2018	Date Reported to NMOCD	01/03/2018
Land-Owner	Federal	Reported To	NMOCD, BLM
Source of Release	Water tank overflowed releasing oil & water through the thief hatch on top of the tank.		
Released Volume	25 bbls 175 bbls	Released Material	Crude Oil Produced Water
Recovered Volume	0 bbls	Net Release	200 bbls
NMOCD Closure Criteria	>100 feet to Groundwater		
Strata Response Dates	9/22/2023, 11/07/2023		

## **1.0 Background**

On January 3, 2018, a release was discovered at the Gissler A2 Tank Battery. The water tank overfilled, releasing oil and water through the thief hatch on top of the tank. Initial response activities were conducted by the operator, and included source elimination by means of repair, site stabilization, and release recovery. The release consisted of 25 bbls of oil and 175 bbls of produced water. Figures 1 and 2 illustrate the vicinity and site location, Figure 3 illustrates the release location.

## **2.0 Site Information and Closure Criteria**

The Gissler A2 Tank Battery is located approximately 2.5 miles northeast of Loco Hills, New Mexico on federally owned land at an elevation of approximately 3,697 feet above mean sea level (amsl).

Based upon the New Mexico Office of the State Engineers (NMOSE) online water well database (Appendix A), depth to groundwater in the area is greater than 101 feet below grade surface (bgs). There is one known water source within ½-mile of the location, according to the NMOSE database ([https://gis.ose.state.nm.us/gisapps/ose\\_pod\\_locations/](https://gis.ose.state.nm.us/gisapps/ose_pod_locations/); accessed 10/19/2023). On March 21, 2023, Atkins Engineering drilled a water well to a depth of 101 feet bgs and completed the well as a dry hole.

The nearest significant watercourse is water line, located approximately 2,000 feet northwest of the location. Figure 2 illustrates the site with 200 and 300-foot radii to indicate that it does not lie within a sensitive area as described in 19.15.29.12.C(4) NMAC.

Based on the information presented herein, the applicable NMOCD Closure Criteria for this site is for a groundwater depth of greater than 100 feet bgs. The site has been restored to meet the standards of Table I of 19.15.29.12 NMAC.

Table 2 demonstrates the Closure Criteria applicable to this location. Pertinent well data is attached in Appendix A.

## **3.0 Release Characterization and Overview of Activities**

On January 3, 2018, Burnett Oil Co Inc., personnel discovered that the water tank at the Gissler A2 Tank Battery had overflowed from the thief hatch. Personnel immediately shut in all valves to eliminate the source. An estimated 25 barrels of crude oil and 175 barrels of produced water were released. From January 9, 2021, to February 2, 2021, Burnett Oil hired Aspen Grow as the environmental consultant. Aspen Grow had initially applied a probiotic to the release area and collected frequent samples to evaluate the effect of the probiotic applied to the spill area. Below is an overview of activities performed since the incident occurred:

- January 9, 2018: Aspen Grow collected samples SP1-SP7. The initial areas of concern were areas surrounding sample points SP2, SP3, SP4, SP5, SP6 and SP7.

- December 19, 2018: Aspen Grow re-collected samples SP1-SP7. The areas of concern continued to be around SP2 and SP5.
- May 18, 2019: Aspen Grow re-collected samples SP3, SP4, SP5 and SP6. The areas surrounding sample points SP4 and SP6 showed to be areas of concern.
- January 3, 2020: Aspen Grow collected samples SP3, SP4, and SP5.
- February 28, 2020: Aspen Grow collected samples SP3 and SP4.
- May 30, 2020: Aspen Grow collected sample SP4.
- August 14, 2020: Aspen Grow collected sample SP4.
- February 27, 2021: Aspen Grow collected sample SP3.
- July 7, 2023: Burnett Oil contacted Strata Resources to support the project based on a denied closure report received on November 14, 2022.
- September 22, 2023: Strata Resources conducted confirmation sampling for sample points SP2, SP6, and sidewalls SW1-SW13. SP2 and SP6 were selected based on the fact that the last investigation samples that still exceeded closure criteria. Sidewalls were conducted since no lateral migration had been completed on the incident.
- November 7, 2023: Strata Resources, continued confirmation sampling for sample points SP1, SP3, SP4, SP5, SP7 and added sample point TB.
- November 21, 2023: Strata Resources receives lab results. All lab results were below closure criteria.
- May 9, 2024: Strata Resources submitted closure report to Burnett Oil.

#### **4.0 Sampling Plan**

Strata Resources is submitting a confirmation sampling plan due to the historical context of incident no. NAB1800947656. Strata is proposing to add sample points SP8-SP11 and TB1-TB4 on pad and in containment, while also adding sample points SP12 and SP13 in the pasture. Additionally, sidewalls SW14-SW21 will be added to determine any lateral migration. The aforementioned samples will be sampled in the following interval:

- SP8 – SP11: 2', 4', and 6' (on-pad)
- TB1 – TB4: 2', 4', and 6' (on-pad)
- SP12 – SP13: 2', 4', 6', and 8' (off-pad)
- SW14-SW21: Corresponding depths (off/on-pad)

Sampling intervals for sample points SP8-SP11 and TB1-TB4 have been selected due to its contaminant history and context. The majority of the initial contamination in the surrounding area stayed in the top two (2) feet. Strata will begin collecting samples at two (2) feet and advance boring to six (6) feet. The sampling below two (2) feet to six (6) feet is to confirm that contamination has not percolated through the soil.

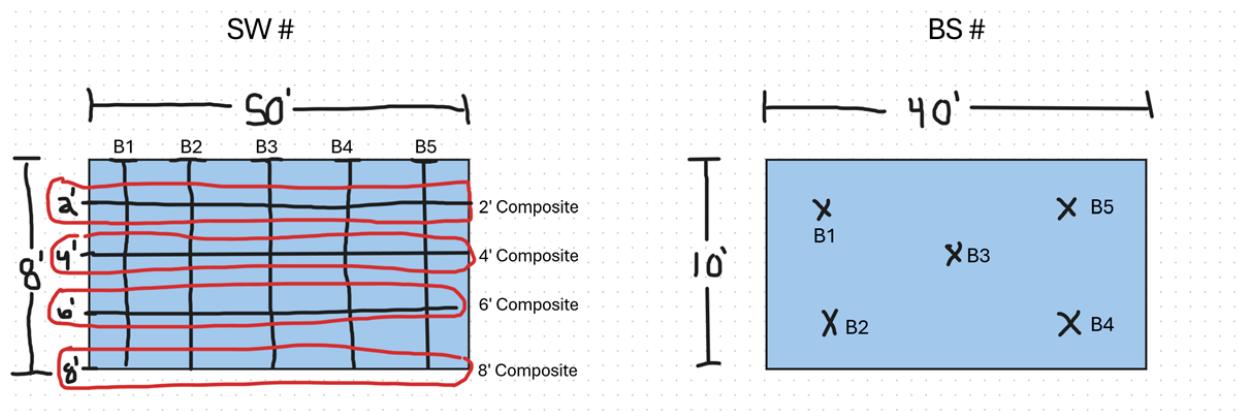

Sampling intervals for SP12 and SP13 have been selected based on that this area is considered off-pad, in lower elevation, and soil stratification is slightly different in that caliche is base rock for

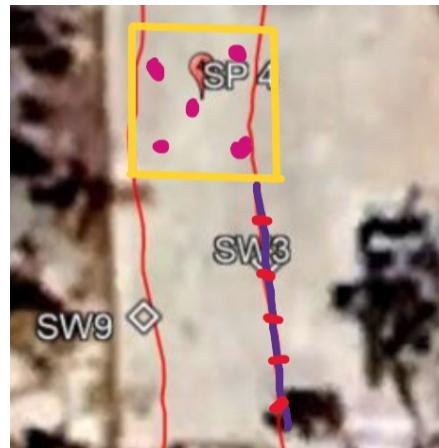

on-pad but not off-pad. The soil characteristics surrounding sample points SP12 and SP13 are a fine sandy loam. Due to the soil characteristics, Strata will begin collecting samples at two (2) feet and advancing to eight (8) feet bgs to confirm that contamination has not percolated through the soil. Sidewalls samples SW14-SW21 will be collected in corresponding depths near the surrounding area.

All confirmation samples will be comprised of 5-point composite samples, each representing 400 ft<sup>2</sup> (as requested below) surface area. To further explain how the 5-point composite samples will be collected, 8-foot depths will be used as an example. A 400 ft<sup>2</sup> sidewall is a 50 ft length of the edge of the spill that is 8 ft deep. Boreholes will be drilled every ten feet within this 50 ft run to depths of 2 ft, 4 ft, 6 ft and 8ft. In this case, there would be 5 sets of samples collected at the four intervals, then samples would be combined to create a composite representing a 400 ft<sup>2</sup> area. The base composites will be collected in the same manner, the only difference is the location of the borings (Illustration 1). Example 1 below illustrates SW3's 5 boreholes where the 5-point composite samples would be taken as shown in Illustration 1. Similarly, the yellow box represents the 400 ft<sup>2</sup> area around SP4 and the 5 boreholes locations as shown in Illustration 1.

Illustration 1

Example 1

Samples will be collected using a drill rig - hollow stem and all samples taken by Strata mentioned above will be collected for laboratory analysis for total chloride using EPA Method 300.0; benzene, toluene, ethylbenzene and total xylenes (BTEX) using EPA Method 8021B; and motor, diesel, and gasoline range organics (MRO, DRO, & GRO) by EPA Method 8015D.

If contamination is encountered above closure criteria, the following steps will be taken:

1. Delineate contamination vertically and laterally. Collect samples and send them for laboratory analysis.
2. Submit a remediation plan to NMOCD based on results from laboratory analysis within 7-10 business days.

If contamination is not encountered above closure criteria, the following steps will be taken

1. Submit a remediation closure report to NMOCD within 7-10 business days utilizing the samples taken from this plan as confirmation closure samples.

## **5.0 Variance Request**

Strata Resources is submitting a variance request seeking approval for an alternative sampling plan for confirmation closure sampling based on 400 ft<sup>2</sup>. The alternative sampling plan submitted here to be conducted consists of taking three (3) samples at sampling locations SP8-SP11 and TB1-TB4 at depths of two (2), four (4), and six (6) feet bgs. Sampling locations SP12 and SP13 consist of taking four (4) samples at depths of two (2), four (4), six (6), and eight (8) feet bgs. Additionally, Strata also is requesting a variance to utilize the previous samples collected on 9/22/23 and 11/7/23 concurrent with the additional confirmation samples discussed above. The samples collected on 9/22/23 and 11/07/23 were also collected as 5-point composites with the same method mentioned previously. A notice of final confirmation sampling for these dates was previously submitted.

Due to the historical nature of the release, and the known probiotic treatment at the incident, the alternative sampling plan for confirmation closure sampling is determined to be a more thorough method to ensure that contaminated soil does not exist or has percolated below the surface. The alternative sampling plan for confirmation closure sampling provides better protection of fresh water, public health, and the environment by verifying that contamination below the surface does not exist and has not percolated through the soil.

## **6.0 Scope and Limitations**

The scope of our services included: assessment sampling, verifying release stabilizations; regulatory liaison; remediation; and preparation of this sampling plan. All work has been performed in accordance with generally accepted professional environmental consulting practices for oil and gas releases in the Permian Basin in New Mexico.

If there are any questions regarding this report, please contact Lynn Acosta at (505) 516-7469 or [lynn@strataresourcesllc.com](mailto:lynn@strataresourcesllc.com)

Lynn,

The sampling plan is approved with conditions:

- All samples must be collected as 5-point composite samples as outlined in the plan.
- All samples must be representative of no more than 400 square feet.
- In the subsequent report, please illustrate the area that the 5-point composite sample represent. Please see the example below. Be advised that the drawings are not to scale and will need to be representative of the sampling conditions.

- Please update the verbiage of "on-pad" and "off-pad" to "areas reasonably needed for production and subsequent drilling activities" and "areas not reasonably needed for production and subsequent drilling activities".
- OCD approves the variance request to utilize the samples collected on 9/22/2023 and 11/7/2023 but these samples must be illustrated as requested in the 3<sup>rd</sup> bullet pointed condition.
- If contamination is found during sampling activities, the contamination must be horizontally and vertically delineated.
- A C-141N must be submitted two-business days prior to the collection of the samples.
- Photographs of sampling activities must be included in the subsequent report.
- Include a copy of the sampling plan and a copy of this email chain in the next report submitted.

Please be advised that this sampling plan is only applicable to NAB1800947656. Additional open releases at this site include NAB1606426877 and NAB1517742106.

Please let me know if you have any questions or require any additional information.

Lynn,

Thank you for the clarification. Could you please update the sampling plan to reflect how the samples will be collected. You can include the drawings if it is helpful. Also could you formally request a variance to use the previous samples collected on 9/22/23 and 11/7/23 to be used as closure samples as those samples have already been denied once. The variance request will need to be in compliance with 19.15.29.14 A. (1) and (2) NMAC, which states "A responsible party may file a written request for a variance from any requirement of 19.15.29 NMAC with the appropriate division district office. The variance request must include: (1) a detailed statement explaining the need for a variance; and (2) a detailed written demonstration that the variance will provide equal or better protection of fresh water, public health and the environment."

Please also clarify if the samples collected on 9/22/23 and 11/7/23 were collected as 5-point composites or if they were grab samples in the revised sampling plan.

Thank you,  
**Brittany Hall** ● Environmental Specialist

**Subject:** RE: [EXTERNAL] Gissler A-2 Tank Battery (NAB1800947656) - Confirmation Sampling Plan

Good morning Lynn,

Just so I am understanding correctly, there will be 5 boreholes drilled for each sample?

For example, if you see the snip of the map below (this is not to scale), the area of SP 4 (yellow box) would be a 40' by 10' area and 5 bore holes (red dots) would be the 5 bore holes where the grab samples at different depths would be composited together and representative of SP 4. SW 3 (purple line) would be 50' long and 5 bore holes (red dots) would be the 5 bore holes where the grab samples at different depths would be composited together and representative of SW 3. Is that assumption correct?

Thank you,

**Subject:** RE: [EXTERNAL] Gissler A-2 Tank Battery (NAB1800947656) - Confirmation Sampling Plan

Good Morning Brittany,

The answers to your questions are below in blue:

1. Are the previous sampling results from samples collected in 2023 and the years prior being proposed to be used as closure samples in this plan? Or will these locations be resampled?
  - a. **The only previous samples that are being proposed to be used as closure samples are the samples collected on 9/22/23 and 11/7/23 with your approval.**
2. Under section 4.0 Sampling Plan it states "Sidewalls samples SW14-SW21 will be collected in corresponding depths near the surrounding area. All confirmation samples will be comprised of 5-point composite samples, each representing 400 ft<sup>2</sup> (as requested below) surface area.". Can you please clarify how 5-point composite samples will be collected? In the sections above this statement, it appears that grab samples are being proposed at the various depths. Are grab or composite samples being proposed? Or are grab samples being proposed for the "base" samples and composites being proposed for the "sidewall" samples?
  - a. **Both sidewalls and base 5-point composites will be collected essentially the same. Sidewalls to corresponding depths varies; I will use the 8' as an example. A 400 ft<sup>2</sup> sidewall is a 50 ft length of the edge of the spill by 8 ft deep. We would take a boring every ten feet within this 50 ft run to 2', 4', 6' and 8'. In this case, there would be 5 sets of samples collected at the four intervals, then they would be combined to create a composite representing a 400 ft<sup>2</sup> area. As an example, for SW14, there will be 2', 4', 6', and 8' composite samples. The base**

composites are collected essentially the same only difference is the location of the borings. 5-point composite sampling is depicted below. I apologize, I find it hard to explain what I mean in my head and how I do composite sampling, so I drew it out in hopes to explain it better.

3. Based on the information given on the scaled Site Map, I have calculated that the release area is approximately 11,004 square feet. Based on this number, if sampling were to be representative of 400 square feet at least 28 base samples would need to be collected. Can you please explain how the proposed number of base and side wall samples are representative of 400 square feet?
  - a. The KMZ I have (attached) has the area inside the containment to be ~1,827 ft^2 = 4.5 samples, however due to the tanks taking up volume inside that area; we concluded on 4 samples to be enough. The footprint outside of the containment is ~5,075 ft^2, which the additional 6 samples satisfy the 400ft^2.
4. What is the rationale of not collecting samples in any of the proposed locations at the surface, 1-foot, or 3-feet bgs? While not required for areas reasonably needed for production on the pad, there are several historic sampling locations that do not meet the reclamation standards for the upper 4 feet that will need to be addressed before this incident will be granted the final closure status of "Restoration Complete". OCD does require an accurate estimation of the amount (both square footage and cubic yardage) of soils that must be reclaimed at the end of the life of the battery.
  - a. The rationale for not collecting samples at surface, 1-foot, and 3-feet is due to the fact that there has been historic sampling of the shallower depths and since this incident has been treated with the probiotic we want to provide proof that it is not percolating through the soil by taking deeper samples. At the end of the life of the battery, to meet the reclamation standards, the top four feet would be addressed and the estimation is to remove any waste containing soil (approximated to be ~7,000 ft^2 (rounded up) and 1,020 cubic yards (estimated to 4 ft)).

Please let me know if you have any questions or need any clarification.

Good Evening Brittany,

Hope you had a much-needed break over the holidays, I just had a question about the Gissler A-2. We have written up the detailed sampling plan that was requested, but wanted to know how you wanted Burnett/Strata to proceed with getting this over to you? Would you want it through email? Or the portal? If it is the portal, how would we go about submitting a "Sampling Plan"?

Let us know how you would like us to proceed. Thank you.

## JOB DESCRIPTION

Gissler A2TB

## JOB NUMBER

885-20274-1

Eurofins Albuquerque  
4901 Hawkins NE  
Albuquerque NM 87109

# Eurofins Albuquerque

## Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

## Authorization

Authorized for release by  
Cheyenne Cason, Project Manager  
[cheyenne.cason@et.eurofinsus.com](mailto:cheyenne.cason@et.eurofinsus.com)  
(505)345-3975

Job ID: 885-20274-1

### Qualifiers

#### GC VOA

Qualifier	Qualifier Description
S1+	Surrogate recovery exceeds control limits, high biased.

#### GC Semi VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.
D	Surrogate or matrix spike recoveries were not obtained because the extract was diluted for analysis; also compounds analyzed at a dilution may be flagged with a D.
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.
S1-	Surrogate recovery exceeds control limits, low biased.

### Glossary

**Abbreviation** **These commonly used abbreviations may or may not be present in this report.**

%	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

## Case Narrative

Client: Burnett Oil Co Inc  
Project: Gissler A2TB

Job ID: 885-20274-1

**Job ID: 885-20274-1****Eurofins Albuquerque**

### Job Narrative 885-20274-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

### **Receipt**

The samples were received on 2/21/2025 8:05 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 2.9°C and 4.8°C.

### **Receipt Exceptions**

The Field Sampler was not listed on the Chain of Custody.

### **Gasoline Range Organics**

Method 8015D\_GRO: The following sample was diluted due to the abundance of non-target analytes: TB2'6' (885-20274-54). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### **GC VOA**

Method 8021B: The following sample was diluted due to the abundance of non-target analytes: TB2'6' (885-20274-54). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### **Diesel Range Organics**

Method 8015D\_DRO: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for preparation batch 885-21333 and analytical batch 885-21272 recovered outside control limits for the following analytes: Diesel Range Organics [C10-C28]. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8015D\_DRO: The following samples were prepared outside of preparation holding time due to need for re-extraction of samples: SW19'6' (885-20274-42), TB1'2' (885-20274-49), TB1'4' (885-20274-50), TB1'6' (885-20274-51), TB2'2' (885-20274-52), TB2'4' (885-20274-53), TB2'6' (885-20274-54), TB3'2' (885-20274-55) and TB3'4' (885-20274-56).

Method 8015D\_DRO: The following samples were diluted due to the nature of the sample matrix: TB1'2' (885-20274-49), TB2'2' (885-20274-52), TB2'4' (885-20274-53), TB2'6' (885-20274-54) and TB3'4' (885-20274-56)

Method 8015D\_DRO: The following sample was prepared outside of preparation holding time due need for re-extraction : TB4'2' (885-20274-58).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### **HPLC/IC**

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

## Login Sample Receipt Checklist

Client: Burnett Oil Co Inc

Job Number: 885-20274-1

**Login Number: 20274****List Source: Eurofins Albuquerque****List Number: 1****Creator: Casarrubias, Tracy**

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	False	Refer to Job Narrative for details.
There are no discrepancies between the containers received and the COC.	False	IDs on containers do not match the COC. Logged in per COC.
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

SUBJECT: Remediation Workplan for the Gissler A2 Tank Battery (Gissler #024) Release (NAB1800947656), Eddy County, New Mexico

To Whom It May Concern,

On behalf of Burnett Oil Co, LLC, Strata Resources (Strata) has prepared this Remediation Workplan that describes the delineation and remediation from an approved confirmation sampling plan following the remediation of a release of liquids related to the storage tank activities at the Gissler A2 Tank Battery (Gissler #024). The site is in Unit J, Section 14, Township 17S, Range 30E, Eddy County, New Mexico, on federal land. Figure 1 illustrates the vicinity and site location on an USGS 7.5-minute quadrangle map.

Table 1 summarizes release information and closure criteria.

**Table 1: Release Information and Closure Criteria**

Name	Gissler A2 Tank Battery (Gissler #024)	Company	Burnett Oil Co, LLC
API Number	N/A	Location	32.83118 -103.93931
Incident Number	NAB1800947656		
Estimated Date of Release	01/03/2018	Date Reported to NMOCD	01/03/2018
Land-Owner	Federal	Reported To	NMOCD, BLM
Source of Release	Water tank overflowed releasing oil & water through the thief hatch on top of the tank.		
Released Volume	<b>25 bbls</b> 175 bbls	Released Material	<b>Crude Oil</b> Produced Water
Recovered Volume	0 bbls	Net Release	200 bbls
NMOCD Closure Criteria	>100 feet to Groundwater		
Strata Response Dates	9/22/2023, 11/07/2023, 2/11-2/15/2025		

## **1.0 Background**

On January 3, 2018, a release was discovered at the Gissler A2 Tank Battery. The water tank overfilled, releasing oil and water through the thief hatch on top of the tank. Initial response activities were conducted by the operator, and included source elimination by means of repair, site stabilization, and release recovery. The release consisted of 25 bbls of oil and 175 bbls of produced water. Figures 1 and 2 illustrate the vicinity and site location, Figure 3 illustrates the release location.

## **2.0 Site Information and Closure Criteria**

The Gissler A2 Tank Battery is located approximately 2.5 miles northeast of Loco Hills, New Mexico on federally owned land at an elevation of approximately 3,697 feet above mean sea level (amsl).

Based upon the New Mexico Office of the State Engineers (NMOSE) online water well database (Appendix A), depth to groundwater in the area is greater than 101 feet below grade surface (bgs). There is one known water source within ½-mile of the location, according to the NMOSE database ([https://gis.ose.state.nm.us/gisapps/ose\\_pod\\_locations/](https://gis.ose.state.nm.us/gisapps/ose_pod_locations/); accessed 10/19/2023). On March 21, 2023, Atkins Engineering drilled a water well to a depth of 101 feet bgs and completed the well as a dry hole.

The nearest significant watercourse is water line, located approximately 2,000 feet northwest of the location. Figure 2 illustrates the site with 200 and 300-foot radii to indicate that it does not lie within a sensitive area as described in 19.15.29.12.C(4) NMAC.

Based on the information presented herein, the applicable NMOCD Closure Criteria for this site is for a groundwater depth of greater than 100 feet bgs. The site has been restored to meet the standards of Table I of 19.15.29.12 NMAC.

Table 2 demonstrates the Closure Criteria applicable to this location. Pertinent well data is attached in Appendix A.

## **3.0 Release Characterization and Overview of Activities**

On January 3, 2018, Burnett Oil Co Inc., personnel discovered that the water tank at the Gissler A2 Tank Battery had overflowed from the thief hatch. Personnel immediately shut in all valves to eliminate the source. An estimated 25 barrels of crude oil and 175 barrels of produced water were released. From January 9, 2021, to February 2, 2021, Burnett Oil hired Aspen Grow as the environmental consultant. Aspen Grow had initially applied a probiotic to the release area and collected frequent samples to evaluate the effect of the probiotic applied to the spill area. Below is an overview of activities performed since the incident occurred:

- January 9, 2018: Aspen Grow collected samples SP1-SP7. The initial areas of concern were areas surrounding sample points SP2, SP3, SP4, SP5, SP6 and SP7.

- December 19, 2018: Aspen Grow re-collected samples SP1-SP7. The areas of concern continued to be around SP2 and SP5.
- May 18, 2019: Aspen Grow re-collected samples SP3, SP4, SP5 and SP6. The areas surrounding sample points SP4 and SP6 showed to be areas of concern.
- January 3, 2020: Aspen Grow collected samples SP3, SP4, and SP5.
- February 28, 2020: Aspen Grow collected samples SP3 and SP4.
- May 30, 2020: Aspen Grow collected sample SP4.
- August 14, 2020: Aspen Grow collected sample SP4.
- February 27, 2021: Aspen Grow collected sample SP3.
- July 7, 2023: Burnett Oil contacted Strata Resources to support the project based on a denied closure report received on November 14, 2022.
- September 22, 2023: Strata Resources conducted confirmation sampling for sample points SP2, SP6, and sidewalls SW1-SW13. SP2 and SP6 were selected based on the fact that the last investigation samples that still exceeded closure criteria. Sidewalls were conducted since no lateral migration had been completed on the incident.
- November 7, 2023: Strata Resources, continued confirmation sampling for sample points SP1, SP3, SP4, SP5, SP7 and added sample point TB.
- November 21, 2023: Strata Resources receives lab results. All lab results were below closure criteria.
- May 9, 2024: Strata Resources submitted closure report to Burnett Oil.
- February 3, 2025: Strata Resources submitted a confirmation sampling plan to NMOCD (Appendix B).
- February 5, 2025: NMOCD approved the confirmation sampling plan (Appendix C).
- February 11-15, 2025: Samples were collected in accordance with the confirmation sampling plan (Figure 3b).
- March 6, 2025: Analytical Laboratory Results are delivered to Burnett personnel (Appendix D).

#### **4.0 Proposed Soil Remediation Workplan**

On March 6, 2025, Burnett received lab confirmation that all but six (6) samples were within NMOCD closure criteria. Based on the approved sampling plan, samples TB2 2-6ft, TB3 4ft, TB5 2ft, and SW17 2ft exceeded NMOCD criteria.

Strata Resources proposes excavation of contaminated soils for disposal at an NMOCD permitted surface waste facility. The area surrounding SW17 will be excavated to a depth of two (2) feet bgs (Figure 3c). The area surrounding sample point SW17 is estimated to be approximately 500 ft<sup>2</sup>.

Confirmation samples will be comprised of representative wall and base 5-point composite samples. Strata is proposing the collection of three (3) samples (CBS 17a-c) at the base of the excavation and six (6) sidewall samples (CSW 1-6). Samples will be submitted for laboratory

analysis for total chloride using the United States Environmental Protection Agency (USEPA) Method 300.0; benzene, toluene, ethylbenzene, and total xylenes (BTEX) using USEPA Method 8021B; and total petroleum hydrocarbons (TPH) as motor, diesel, and gasoline range organics (MRO, DRO, and GRO) by USEPA Method 8015D.

Approximately 37 cubic yards of contaminated soil is projected to be removed and replaced with clean backfill material in order to return the surface to previous conditions. The contaminated soil will be transported for disposal at R360 Environmental Solutions near Hobbs, NM, a NMOCD-permitted disposal Facility.

## **5.0 Deferral Request**

On behalf of Burnett, Strata Resources formally requests a deferral to address the contamination inside the tank battery (TB2, TB3, and TB5) at the time of plugging and abandonment or a major facility deconstruction, whichever comes first. If the deferral request is approved, a remedial action report detailing the excavation expansion and confirmation sampling activities will be prepared and submitted following the completion of the aforementioned activities scheduled for a future date.

## **6.0 Scope and Limitations**

The scope of our services included: verifying release stabilizations; regulatory liaison; remediation; preparation of the sampling plan; and preparation of this remediation plan. All work has been performed in accordance with generally accepted professional environmental consulting practices for oil and gas releases in the Permian Basin in New Mexico.

If there are any questions regarding this report, please contact Hayden Acosta at (505) 249-9506 or [hayden@strataresourcesllc.com](mailto:hayden@strataresourcesllc.com)

**Qualifiers****GC Semi VOA**

Qualifier	Qualifier Description
F2	MS/MSD RPD exceeds control limits

**Glossary**

Abbreviation	These commonly used abbreviations may or may not be present in this report.
✉	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

**Case Narrative**

Client: Burnett Oil Co Inc  
 Project: Gissler A2 Tank

Job ID: 885-28218-1

**Job ID: 885-28218-1****Eurofins Albuquerque****Job Narrative  
885-28218-1**

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

**Receipt**

The samples were received on 7/8/2025 7:38 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 1.1°C.

**Gasoline Range Organics**

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**GC VOA**

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**Diesel Range Organics**

Method 8015D\_DRO: The matrix spike / matrix spike duplicate / sample duplicate (MS/MSD/DUP) precision for preparation batch 885-29798 and analytical batch 885-29858 was outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory control sample duplicate (LCS/LCSD) precision was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**HPLC/IC**

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Eurofins Albuquerque

## Accreditation/Certification Summary

Client: Burnett Oil Co Inc  
 Project/Site: Gissler A2 Tank

Job ID: 885-28218-1

### Laboratory: Eurofins Albuquerque

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
New Mexico	State	NM9425, NM0901	02-27-26
The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.			
Analysis Method	Prep Method	Matrix	Analyte
300.0	300_Prep	Solid	Chloride
8015M/D	5030C	Solid	Gasoline Range Organics [C6 - C10]
8015M/D	SHAKE	Solid	Diesel Range Organics [C10-C28]
8015M/D	SHAKE	Solid	Motor Oil Range Organics [C28-C40]
8021B	5030C	Solid	Benzene
8021B	5030C	Solid	Ethylbenzene
8021B	5030C	Solid	Toluene
8021B	5030C	Solid	Xylenes, Total
Oregon	NELAP	NM100001	02-26-26

## Login Sample Receipt Checklist

Client: Burnett Oil Co Inc

Job Number: 885-28218-1

**Login Number:** 28218**List Source:** Eurofins Albuquerque**List Number:** 1**Creator:** Casarrubias, Tracy

Question	Answer	Comment
Radioactivity wasn't checked or is <= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

# ANALYTICAL REPORT

## PREPARED FOR

Attn: Mike Burton  
Burnett Oil Co Inc  
PO BOX 188  
Loco Hills, New Mexico 88255

Generated 7/14/2025 3:18:23 PM

## JOB DESCRIPTION

Gissler A2 Tank

## JOB NUMBER

885-28219-1

Eurofins Albuquerque  
4901 Hawkins NE  
Albuquerque NM 87109

See page two for job notes and contact information

# Eurofins Albuquerque

## Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

## Authorization

Authorized for release by  
Cheyenne Cason, Project Manager  
[cheyenne.cason@et.eurofinsus.com](mailto:cheyenne.cason@et.eurofinsus.com)  
(505)338-8812

Job ID: 885-28219-1

### Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
⊗	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Eurofins Albuquerque

**Case Narrative**

Client: Burnett Oil Co Inc  
Project: Gissler A2 Tank

Job ID: 885-28219-1

**Job ID: 885-28219-1****Eurofins Albuquerque****Job Narrative  
885-28219-1**

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

**Receipt**

The samples were received on 7/8/2025 7:38 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 1.1°C.

**Gasoline Range Organics**

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**GC VOA**

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**Diesel Range Organics**

Method 8015D\_DRO: The matrix spike / matrix spike duplicate / sample duplicate (MS/MSD/DUP) precision for preparation batch 885-29798 and analytical batch 885-29858 was outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory control sample duplicate (LCS/LCSD) precision was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**HPLC/IC**

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

## Accreditation/Certification Summary

Client: Burnett Oil Co Inc  
 Project/Site: Gissler A2 Tank

Job ID: 885-28219-1

### Laboratory: Eurofins Albuquerque

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
New Mexico	State	NM9425, NM0901	02-27-26
The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.			
Analysis Method	Prep Method	Matrix	Analyte
300.0	300_Prep	Solid	Chloride
8015M/D	5030C	Solid	Gasoline Range Organics [C6 - C10]
8015M/D	SHAKE	Solid	Diesel Range Organics [C10-C28]
8015M/D	SHAKE	Solid	Motor Oil Range Organics [C28-C40]
8021B	5030C	Solid	Benzene
8021B	5030C	Solid	Ethylbenzene
8021B	5030C	Solid	Toluene
8021B	5030C	Solid	Xylenes, Total

## Login Sample Receipt Checklist

Client: Burnett Oil Co Inc

Job Number: 885-28219-1

**Login Number: 28219****List Source: Eurofins Albuquerque****List Number: 1****Creator: Casarrubias, Tracy**

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

QUESTIONS

Action 507405

**QUESTIONS**

Operator:  BURNETT OIL CO INC 801 Cherry Street Unit #9 Fort Worth, TX 76102	OGRID: 3080
	Action Number: 507405
	Action Type: [C-141] Deferral Request C-141 (C-141-v-Deferral)

**QUESTIONS**

Prerequisites	
Incident ID (n#)	nAB1800947656
Incident Name	NAB1800947656 GISSLER #024 @ 30-015-33498
Incident Type	Produced Water Release
Incident Status	Deferral Request Received
Incident Well	[30-015-33498] GISSLER A #024
Incident Facility	[fAPP2202153989] Gissler A 2 Tank Battery

**Location of Release Source***Please answer all the questions in this group.*

Site Name	GISSLER #024
Date Release Discovered	01/03/2018
Surface Owner	Federal

**Incident Details***Please answer all the questions in this group.*

Incident Type	Produced Water Release
Did this release result in a fire or is the result of a fire	No
Did this release result in any injuries	No
Has this release reached or does it have a reasonable probability of reaching a watercourse	No
Has this release endangered or does it have a reasonable probability of endangering public health	No
Has this release substantially damaged or will it substantially damage property or the environment	No
Is this release of a volume that is or may with reasonable probability be detrimental to fresh water	No

**Nature and Volume of Release***Material(s) released, please answer all that apply below. Any calculations or specific justifications for the volumes provided should be attached to the follow-up C-141 submission.*

Crude Oil Released (bbls) Details	Cause: Overflow - Tank, Pit, Etc.   Tank (Any)   Crude Oil   Released: 25 BBL   Recovered: 22 BBL   Lost: 3 BBL.
Produced Water Released (bbls) Details	Cause: Overflow - Tank, Pit, Etc.   Tank (Any)   Produced Water   Released: 175 BBL   Recovered: 163 BBL   Lost: 12 BBL.
Is the concentration of chloride in the produced water >10,000 mg/l	Yes
Condensate Released (bbls) Details	Not answered.
Natural Gas Vented (Mcf) Details	Not answered.
Natural Gas Flared (Mcf) Details	Not answered.
Other Released Details	Not answered.
Are there additional details for the questions above (i.e. any answer containing Other, Specify, Unknown, and/or Fire, or any negative lost amounts)	Not answered.

QUESTIONS, Page 2

Action 507405

**QUESTIONS (continued)**

Operator:  BURNETT OIL CO INC 801 Cherry Street Unit #9 Fort Worth, TX 76102	OGRID: 3080
	Action Number: 507405
	Action Type: [C-141] Deferral Request C-141 (C-141-v-Deferral)

**QUESTIONS**

<b>Nature and Volume of Release (continued)</b>	
Is this a gas only submission (i.e. only significant Mcf values reported)	No, according to supplied volumes this does not appear to be a "gas only" report.
Was this a major release as defined by Subsection A of 19.15.29.7 NMAC	Yes
Reasons why this would be considered a submission for a notification of a major release	From paragraph A. "Major release" determine using: (1) an unauthorized release of a volume, excluding gases, of 25 barrels or more.

*With the implementation of the 19.15.27 NMAC (05/25/2021), venting and/or flaring of natural gas (i.e. gas only) are to be submitted on the C-129 form.*

<b>Initial Response</b>	
<i>The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury.</i>	
The source of the release has been stopped	True
The impacted area has been secured to protect human health and the environment	True
Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices	True
All free liquids and recoverable materials have been removed and managed appropriately	True
If all the actions described above have not been undertaken, explain why	<i>Not answered.</i>

*Per Paragraph (4) of Subsection B of 19.15.29.8 NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please prepare and attach a narrative of actions to date in the follow-up C-141 submission. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see Subparagraph (a) of Paragraph (5) of Subsection A of 19.15.29.11 NMAC), please prepare and attach all information needed for closure evaluation in the follow-up C-141 submission.*

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

I hereby agree and sign off to the above statement	Name: William Burns Title: Inventory Security Specialist Email: wburns@burnettoil.com Date: 09/19/2025

Action 507405

**QUESTIONS (continued)**

Operator:  BURNETT OIL CO INC 801 Cherry Street Unit #9 Fort Worth, TX 76102	OGRID:
	3080
	Action Number: 507405
	Action Type: [C-141] Deferral Request C-141 (C-141-v-Deferral)

**QUESTIONS****Site Characterization**

*Please answer all the questions in this group (only required when seeking remediation plan approval and beyond). This information must be provided to the appropriate district office no later than 90 days after the release discovery date.*

What is the shallowest depth to groundwater beneath the area affected by the release in feet below ground surface (ft bgs)	Between 100 and 500 (ft.)
What method was used to determine the depth to ground water	NM OSE iWaters Database Search
Did this release impact groundwater or surface water	No
<b>What is the minimum distance, between the closest lateral extents of the release and the following surface areas:</b>	
A continuously flowing watercourse or any other significant watercourse	Between 1000 (ft.) and ½ (mi.)
Any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)	Between 1 and 5 (mi.)
An occupied permanent residence, school, hospital, institution, or church	Between 1 and 5 (mi.)
A spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes	Between 1 and 5 (mi.)
Any other fresh water well or spring	Between 1 and 5 (mi.)
Incorporated municipal boundaries or a defined municipal fresh water well field	Between 1 and 5 (mi.)
A wetland	Between 1 and 5 (mi.)
A subsurface mine	Greater than 5 (mi.)
An (non-karst) unstable area	Between 1 and 5 (mi.)
Categorize the risk of this well / site being in a karst geology	Low
A 100-year floodplain	Greater than 5 (mi.)
Did the release impact areas not on an exploration, development, production, or storage site	Yes

**Remediation Plan**

*Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.*

Requesting a remediation plan approval with this submission	Yes
<i>Attach a comprehensive report demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined, pursuant to 19.15.29.11 NMAC and 19.15.29.13 NMAC.</i>	
Have the lateral and vertical extents of contamination been fully delineated	Yes
Was this release entirely contained within a lined containment area	No
<b>Soil Contamination Sampling:</b> (Provide the highest observable value for each, in milligrams per kilograms.)	
Chloride (EPA 300.0 or SM4500 Cl B)	7900
TPH (GRO+DRO+MRO) (EPA SW-846 Method 8015M)	46200
GRO+DRO (EPA SW-846 Method 8015M)	31200
BTEX (EPA SW-846 Method 8021B or 8260B)	161
Benzene (EPA SW-846 Method 8021B or 8260B)	15

*Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.*

On what estimated date will the remediation commence	05/19/2025
On what date will (or did) the final sampling or liner inspection occur	05/26/2025
On what date will (or was) the remediation complete(d)	05/26/2025
What is the estimated surface area (in square feet) that will be reclaimed	0
What is the estimated volume (in cubic yards) that will be reclaimed	0
What is the estimated surface area (in square feet) that will be remediated	500
What is the estimated volume (in cubic yards) that will be remediated	37

*These estimated dates and measurements are recognized to be the best guess or calculation at the time of submission and may (be) change(d) over time as more remediation efforts are completed.*

*The OCD recognizes that proposed remediation measures may have to be minimally adjusted in accordance with the physical realities encountered during remediation. If the responsible party has any need to significantly deviate from the remediation plan proposed, then it should consult with the division to determine if another remediation plan submission is required.*

Operator:  BURNETT OIL CO INC 801 Cherry Street Unit #9 Fort Worth, TX 76102	OGRID:  3080
	Action Number:  507405
	Action Type:  [C-141] Deferral Request C-141 (C-141-v-Deferral)

**QUESTIONS****Remediation Plan (continued)**

*Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.*

**This remediation will (or is expected to) utilize the following processes to remediate / reduce contaminants:**

(Select all answers below that apply.)

(Ex Situ) Excavation and <b>off-site</b> disposal (i.e. dig and haul, hydrovac, etc.)	Yes
Which OCD approved facility will be used for <b>off-site</b> disposal	fEEM0112340644 R360 ARTESIA LLC LANDFARM
OR which OCD approved well (API) will be used for <b>off-site</b> disposal	<i>Not answered.</i>
OR is the <b>off-site</b> disposal site, to be used, out-of-state	No
OR is the <b>off-site</b> disposal site, to be used, an NMED facility	No
(Ex Situ) Excavation and <b>on-site</b> remediation (i.e. On-Site Land Farms)	No
(In Situ) Soil Vapor Extraction	No
(In Situ) Chemical processing (i.e. Soil Shredding, Potassium Permanganate, etc.)	No
(In Situ) Biological processing (i.e. Microbes / Fertilizer, etc.)	No
(In Situ) Physical processing (i.e. Soil Washing, Gypsum, Disking, etc.)	No
Ground Water Abatement pursuant to 19.15.30 NMAC	No
OTHER (Non-listed remedial process)	No

*Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.*

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. QUESTIONS, Page 5

Action 507405

**QUESTIONS (continued)**

Operator:  BURNETT OIL CO INC 801 Cherry Street Unit #9 Fort Worth, TX 76102	OGRID: 3080
	Action Number: 507405
	Action Type: [C-141] Deferral Request C-141 (C-141-v-Deferral)

**QUESTIONS**

<b>Deferral Requests Only</b> <i>Only answer the questions in this group if seeking a deferral upon approval this submission. Each of the following items must be confirmed as part of any request for deferral of remediation.</i>	
Requesting a deferral of the remediation closure due date with the approval of this submission	Yes
Have the lateral and vertical extents of contamination been fully delineated	Yes
Is the remaining contamination in areas immediately under or around production equipment where remediation could cause a major facility deconstruction	Yes
Please list or describe the production equipment and how (re)moving the equipment would cause major facility deconstruction	The containment contains 4 oil tanks, two water tanks, a gun barrel a covered lact unit, circulating pump, stairs and catwalks and extensive piping. All would all have to be removed in order to facilitate the safe removal of contaminated material from underneath them. This would require a major deconstruction of the facility. The location has been fully delineated per agreed upon remediation plan.
What is the remaining surface area (in square feet) that will still need to be remediated if a deferral is granted	<i>Not answered.</i>
What is the remaining volume (in cubic yards) that will still need to be remediated if a deferral is granted	<i>Not answered.</i>
<i>Per Paragraph (2) of Subsection C of 19.15.29.12 NMAC if contamination is located in areas immediately under or around production equipment such as production tanks, wellheads and pipelines where remediation could cause a major facility deconstruction, the remediation, restoration and reclamation may be deferred with division written approval until the equipment is removed during other operations, or when the well or facility is plugged or abandoned, whichever comes first.</i>	
Enter the facility ID (#) on which this deferral should be granted	fAPP2202153989 Gissler A 2 Tank Battery
Enter the well API (30-) on which this deferral should be granted	<i>Not answered.</i>
Contamination does not cause an imminent risk to human health, the environment, or groundwater	True
<i>Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.</i>	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
