

To the New Mexico Oil Conservation Division,

On behalf of Permian Resources Operating, LLC, Diamondback Disposal Services, Inc. has drafted this cover letter in support of the resubmittal of the Remediation Completion Report for Release No. nAPP2520950540 at the Donkey Kong CTB 1 location. This resubmittal includes additional documentation intended to address the items identified in the denial notice dated December 18, 2025.

Item 1. The original application response regarding produced water chloride concentration has been reviewed and corrected. Based on site conditions and laboratory results associated with this release, the produced water chloride concentration has been identified as greater than 10,000 mg/L in the resubmitted application. This correction is reflected in the application materials provided for review.

Item 2. In accordance with 19.15.29.12.C.(1)(a) NMAC, delineation results and associated laboratory analytical data have been included in the resubmittal. A comprehensive laboratory summary table compiling all delineation sampling results is provided within the Mapping Section, Appendix B, specifically Appendices B1 through B4. Original laboratory reports remain included in Appendix F.

Item 3. With respect to 19.15.29.12.E NMAC, photographs included in this resubmittal document site conditions and excavation activities as collected during remediation. Multiple elevation change photographs depicting excavation geometry at discrete depth intervals prior to backfill were not collected for this project. Excavation depth transitions of one foot or less were conducted using sloped excavation practices rather than vertical sidewalls. Following discussion with Shelly Wells of the New Mexico Oil Conservation Division, Diamondback understands that future remediation projects will include expanded photographic documentation showing changes in excavation depth and elevation, including stepped or sloped transitions where applicable.

The enclosed materials are provided for review based on the documentation available for this release and in response to the denial notice. Diamondback Disposal Services, Inc. respectfully requests reconsideration of closure approval for Release No. nAPP2520950540 based on the information provided.

Please contact the undersigned should additional clarification or documentation be required.

## Executive Summary

On behalf of Permian Resources Operating, LLC, Diamondback Disposal Services, Inc. conducted remediation and reclamation activities to address a produced water release identified as nAPP2520950540 at the Donkey Kong CTB 1 location in Lea County, New Mexico. The release occurred on July 28, 2025, as a result of equipment failure (pump), discharging approximately 125 barrels of produced water of which 15 barrels were recovered and 110 barrels were lost. All impacts occurred offsite beyond the facility boundary.

The site is situated in Unit Letter J, Section 1, Township 23 South, Range 34 East at coordinates 32.330897, -103.419449 (NAD83), approximately 17 miles southwest of Eunice, New Mexico. The affected area lies on New Mexico State Land Office lease E019320001 and is subject to regulations outlined in NMAC 19.15.29 and 19.2.100.67. Remediation activities were performed in full compliance with NMOCD and NMSLO requirements.

Pre-assessment review included evaluation of biological and environmental factors, soil composition, and proximity to water resources. The Crucial Habitat Assessment Tool classified the project area as Level 4 (low sensitivity), with no critical habitat overlap or federally listed species present. Cultural and archaeological resources were evaluated under NMAC 19.2.24 with no findings reported. Groundwater depth in the vicinity was confirmed to be significant, and no wells exist within a half-mile radius. Floodplain and karst analyses determined low risk potential for hydrological or geologic instability.

Delineation sampling confirmed chloride and total petroleum hydrocarbons (TPH) as the primary constituents of concern, with impacts generally limited to the upper two feet of soil. Excavation activities were performed from September 18 through September 23, 2025, resulting in the removal of approximately 1,328 cubic yards of impacted material for offsite disposal at a permitted facility. Confirmation sampling verified that all remaining soils met the most stringent closure standards for groundwater depths less than 50 feet, as outlined in NMAC 19.15.29.12 Table 1.

Backfilling was completed using 1,608 cubic yards of clean imported topsoil, followed by grading to match surrounding contours and seeding on October 7, 2025, with the NMSLO-approved Loamy "L" seed mix. Post-reclamation monitoring will be conducted semi-annually beginning April 2026 to evaluate vegetative growth, stability, and compliance with NMAC 19.15.29.13(D)(3) requirements for 70% vegetative re-establishment.

All field activities, sampling, and documentation were performed under full chain-of-custody procedures and verified by accredited laboratories. Based on the completion of remediation activities and

confirmation that soil concentrations are below applicable closure criteria, Diamondback Disposal Services, Inc. respectfully requests closure approval from the New Mexico Oil Conservation Division and the New Mexico State Land Office for Release No. nAPP2520950540.

## Introduction

This report documents the remediation activities conducted at the DONKEY KONG CTB 1. On behalf of Permian Resources Operating, LLC, Diamondback Disposal Services, Inc. prepared this report to document completion of site remediation and to support closure of release number nAPP2520950540. On July 28, 2025, equipment failure (pump) caused a release of approximately 125 barrels of produced water, with 15 barrels recovered and 110 barrels lost. All impacts occurred offsite, beyond the facility boundary.

The site, located in Unit Letter J, Section 1, Township 23 South, Range 34 East, at coordinates 32.330897, -103.419449 (NAD83), lies approximately 17.0 miles southwest of Eunice, New Mexico, within an active oil and gas operations area and native pasture rangeland. The location is situated on New Mexico State Land Office lease E019320001 and falls under NMSLO jurisdiction. Remediation and reclamation activities were conducted in accordance with New Mexico Oil Conservation Division regulations 19.15.29 NMAC and 19.2.100.67 NMAC, effective August 14, 2018, as well as applicable NMSLO standards and requirements.

The site can be accessed from the intersection of Delaware Basin Road and CR-32 (San Simon Road):

- Head north on San Simon Road for 0.3 miles
- Turn right onto the lease road and continue east for 1 mile
- The project site will be located on the left

A map is included in Appendix B.

## Site Characterization

The release occurred entirely offsite, beyond the facility boundary. Several environmental and regulatory considerations were reviewed in advance to ensure compliance with applicable regulations and surface owner requirements.

### **Biological and Environmental Factors**

*(See Appendix A for reference materials)*

- The Crucial Habitat Assessment Tool (CHAT) returned a Level 4 designation for the project area, indicating low biological sensitivity and minimal likelihood of overlap with critical habitat or federally protected species.
- The USFWS IPaC review identified three federally recognized species for the project area: the Lesser Prairie-Chicken (Endangered, Southern DPS), Northern Aplomado Falcon (Experimental Population, Non-Essential), and Monarch Butterfly (Proposed Threatened) (see Appendix A). No designated critical habitat exists within the project area.

- BLM sensitive species mapping indicates the presence of an isolated Lesser Prairie-Chicken population within the surrounding region. However, no designated critical habitat overlaps the immediate release site, and no direct impacts to sensitive species or habitats were identified during field review.
- Although the release extended off-pad, all activities remained within the boundaries of the original ARMS survey, and the Cultural Properties Protection Rule (NMAC 19.2.24) was followed. No surface disturbance occurred beyond previously impacted areas, and no cultural sites or artifacts were identified during assessment or remediation activities.
- Biological compliance measures were followed, including adherence to the Migratory Bird Treaty Act (MBTA) of 1918, the Endangered Species Act (ESA), and applicable state wildlife regulations. No protected species were encountered during remediation; however, if any had been identified, work would have been halted and the appropriate regulatory agencies contacted for guidance on mitigation measures.

### **Soil and Pad Construction**

- The impacted area consisted of native rangeland soils with no pad construction present at the release location.
- The Web Soil Survey identifies the native soil in the project area as Ratliff-Wink fine sandy loam, characterized by a sandy surface texture to a depth of approximately 3 to 4 inches, underlain by finer-textured loam and clay loam subsoils extending beyond 60 inches.
- Reseeding utilized the NMSLO-approved Loamy "L" seed mix.

### **Water Resources and remediation considerations**

*(See Appendix A for floodplain and karst mapping; all other maps are provided in Appendix B – Topography)*

- The New Mexico Office of the State Engineer (NMOSE) database indicates that no registered wells or points of diversion (PODs) are located within one-half mile of the release area. The nearest well is POD CP-02004, located approximately 0.9 miles north of the site, drilled to a depth of 105 feet with no groundwater encountered. The next closest is POD CP-01839, approximately 1.2 miles southwest, with a total depth of 860 feet and a static water level measured at 286 feet below ground surface. Several additional wells are located beyond this distance.
- Based on these well records, groundwater in the area is considered to occur at significant depths. The site was remediated to the most stringent NMOCD closure criteria; therefore, groundwater depth verification was not required.

- The closest lateral extent of the release was measured at approximately 1.2 miles south of a significant watercourse, as defined by the blue-line feature on the USGS 7.5-minute quadrangle map. No ephemeral drainages or flow channels were observed within the immediate project area.
- The nearest lakebed, sinkhole, or playa feature is a freshwater emergent wetland located approximately 1.5 miles north of the site.
- The nearest occupied residence is situated about 5.5 miles north of the release area, with no schools, hospitals, institutions, or churches present within a one-mile radius.
- A freshwater pond is located roughly 1.0 mile northwest of the site, placing the release area approximately 1.0 mile to the southeast of this feature.
- The closest lateral extent of the release was measured at approximately 16.1 miles southwest of the Eunice municipal water supply boundary.
- The closest lateral extent of the release was measured at approximately 1.5 miles north of a freshwater emergent wetland. No hydrologic connection or surface drainage pathway exists between the release area and this wetland.
- The nearest subsurface mine is the Mosaic Potash facility, located approximately 28.9 miles west of the site.
- A field assessment confirmed no unstable areas in or near the project site, and no evidence of surface subsidence or soil instability was observed.
- The risk of this site being within karst geology was evaluated using the New Mexico Bureau of Geology and Mineral Resources karst potential mapping. The site is categorized as low risk, and no karst features were observed during field assessment.
- The nearest 100-year floodplain is located approximately 20.3 miles south of the site. The project area lies entirely outside any mapped flood hazard zones according to FEMA floodplain data.

### Soil Remediation Standards

Based on site characterization results, groundwater in the area is known to occur at significant depths. However, groundwater depth was not formally verified for regulatory purposes, as the site was remediated to the most stringent soil remediation standards from Table 1 of NMAC 19.15.29.12, applying the criteria for groundwater depths less than 50 feet. The applicable closure criteria are as follows:

**Table 1: NMAC 19.15.29.12 Closure Criteria for Soils Impacted by a Release**

Groundwater Depth	Chloride (mg/kg)	TPH (GRO+DRO+MRO) (mg/kg)	GRO+DRO (mg/kg)	BTEX (mg/kg)	Benzene (mg/kg)
<50 feet	600	100	N/A	50	10
>100 feet	20,000	2,500	1,000	50	10

\*Standards for groundwater greater than 100 feet are provided for reference only.

Per NMAC 19.15.29.13, the top four feet below ground surface (bgs) were remediated to meet the most stringent reclamation standards. Any impacts requiring remediation below four feet bgs would have required groundwater depth verification prior to determining applicable closure criteria.

As detailed in subsequent sections, all remedial activities achieved concentrations below the most stringent closure criteria established under NMAC 19.15.29.12, confirming that regulatory standards for site closure were met.

### Remediation Activities

Delineation was conducted on August 14, 2025, to establish the horizontal and vertical extent of contamination associated with the release. Analytical results were received on August 20, 2025. The delineation confirmed the presence of chloride and total petroleum hydrocarbons (TPH) as the primary constituents of concern, with maximum observed concentrations of 67,200 mg/kg chloride and 40,430 mg/kg TPH (GRO+DRO+MRO). The combined GRO+DRO fraction measured up to 32,600 mg/kg, while BTEX compounds, including benzene, were non-detect (<0.300 mg/kg total BTEX, <0.050 mg/kg benzene). Impacts were generally confined to the upper two feet of soil, with concentrations decreasing significantly with depth.

Excavation activities were conducted from September 18 through September 23, 2025, to remove soil impacted above NMAC 19.15.29.12 Table 1 closure criteria. Excavation limits were determined based on delineation data and field screening to ensure complete removal of affected material.

Haul-off operations were completed between September 20 and September 26, 2025, with a total of approximately 1,328 cubic yards of impacted soil transported offsite for disposal at a permitted facility. All transport and disposal were performed under manifest and chain-of-custody documentation.

Following excavation, confirmation soil samples were collected from the excavation floor and sidewalls on a grid not exceeding 200 square feet per section. Each section was sampled using a five-point composite method under full chain of custody and submitted to an accredited laboratory for analysis. Sampling notifications were provided to the New Mexico Oil Conservation Division on September 18, 2025, covering scheduled sampling dates of September 23–25, 2025. Copies of these notifications are included in Appendix E – Communications. Analytical results for all samples were below the most stringent NMAC 19.15.29.12 Table 1 closure criteria for groundwater less than 50 feet, thereby meeting the applicable regulatory requirements for site closure.

Once laboratory results confirmed that the site met closure criteria, clean topsoil was imported between October 2 and October 6, 2025, totaling approximately 1,608 cubic yards. The backfill material was sampled using a five-point composite and submitted to a third-party laboratory for analysis prior to placement to confirm suitability. The approved topsoil was evenly spread across the excavation area and lightly graded to match pre-disturbance contours, promoting proper stormwater runoff while maintaining soil structure for vegetation establishment. Following final grading, the site was seeded on October 7, 2025, using the NMSLO-approved Loamy "L" seed mix to encourage native vegetation regrowth and long-term stabilization.

#### Monitoring Activities Post Reclamation

Monitoring will ensure successful vegetative establishment and site stabilization:

- **Inspection Frequency:** Semi-annual inspections beginning April 2026.
- **Activities:** Monitor for erosion, noxious weeds, and unauthorized access.
- **Remedies:** If monitoring reveals erosion, unauthorized disturbance, or insufficient vegetation, corrective measures such as reseeding, erosion control, or traffic deterrents will be implemented.
- **Success Criteria:** Pursuant to NMAC 19.15.29.13(D)(3), vegetative cover must achieve at least 70% of pre-disturbance conditions and maintain a  $\pm 50\%$  life-form ratio relative to surrounding undisturbed rangeland, excluding noxious or invasive species.
- **Reporting:** A Final Reclamation Report and Closure Request will be submitted to [eco@nmslo.gov](mailto:eco@nmslo.gov) and the New Mexico Oil Conservation Division (NMOCD) upon successful completion of monitoring requirements.

#### Conclusion

The DONKEY KONG CTB 1 Line Release site is located in Lea County, New Mexico, within Unit Letter J, Section 1, Township 23 South, Range 34 East, at coordinates 32.330897, -103.419449 (NAD83), approximately 17.0 miles southwest of Eunice, New Mexico. The release occurred on July 28, 2025, due to equipment failure (pump), resulting in the discharge of approximately 125 barrels of produced water, of which 15 barrels were recovered and 110 barrels were lost. All impacts occurred offsite beyond the facility boundary.

Remediation activities were conducted in accordance with the Soil Investigation Summary and Proposed Remediation Workplan prepared by Diamondback Disposal Services, Inc. on behalf of Permian Resources Operating, LLC. Diamondback completed the excavation, sampling, and documentation necessary to achieve regulatory closure. All remedial actions and verification sampling were performed in compliance with NMOCD Rule 19.15.29 NMAC and New Mexico State Land Office (NMSLO) standards and requirements. Analytical results confirmed that concentrations of chlorides, total petroleum hydrocarbons (TPH), and other constituents of concern were below applicable closure criteria. Chain-of-custody procedures were maintained for all environmental samples

submitted to an NMOCD-approved laboratory, where analyses were performed using EPA-approved methods.

Following confirmation of remediation success, the excavation was backfilled with clean, compatible topsoil, graded to match surrounding contours, and seeded on October 6, 2025, with the NMSLO-approved Loamy “L” seed mix to promote long-term vegetative recovery consistent with adjacent rangeland.

Based on the completed delineation, remediation, and verification sampling results, Diamondback Disposal Services, Inc. respectfully requests closure approval from the New Mexico Oil Conservation Division and the New Mexico State Land Office for Release No. nAPP2520950540.

Diamondback Disposal Services, Inc. and Permian Resources Operating, LLC appreciate the time and consideration provided by the reviewing agencies in evaluating this closure request.

## **Communications**

# -EXTERNAL- The Oil Conservation Division (OCD) has accepted the application, Application ID: 507148

**From:** OCDOnline@state.nm.us <OCDOnline@state.nm.us>

**To:** Matthew Taylor <Matthew.Taylor@permianres.com>

**Date:** Thu, 18 Sep 2025 16:15:56 +0000 (09/18/2025 10:15:56 AM)

**WARNING:** The sender of this email could not be validated and may not match the person in the "From" field.

To whom it may concern (c/o Matthew Taylor for Permian Resources Operating, LLC),

The OCD has received the submitted *Notification for (Final) Sampling of a Release* (C-141N), for incident ID (n#) nAPP2520950540.

The sampling event is expected to take place:

**When:** 09/23/2025 @ 08:00

**Where:** J-01-23S-34E 0 FNL 0 FEL (32.330897,-103.419449)

**Additional Information:** Jason Owsley  
575.602.5998

**Additional Instructions:** 32.330897,-103.419449

An OCD representative may be available onsite at the date and time reported. In the absence or presence of an OCD representative, sampling pursuant to 19.15.29.12.D NMAC is required. Sampling must be performed following an approved sampling plan or pursuant to 19.15.29.12.D.(1).(c) NMAC. Should there be a change in the scheduled date and time of the sampling event, then another notification should be resubmitted through OCD permitting as soon as possible.

- **Failure to notify the OCD of sampling events including any changes in date/time per the requirements of 19.15.29.12.D.(1).(a) NMAC, may result in the remediation closure samples not being accepted.**
- **If confirmation sampling is going to take place over multiple days, individual C-141N applications must be submitted for each sampling date. Date ranges are not currently accepted on the C-141N application.**

If you have any questions regarding this application, or don't know why you have received this email, please contact us.

**Date:** Thu, 18 Sep 2025 16:17:50 +0000 (09/18/2025 10:17:50 AM)

**WARNING:** The sender of this email could not be validated and may not match the person in the "From" field.

To whom it may concern (c/o Matthew Taylor for Permian Resources Operating, LLC),

The OCD has received the submitted *Notification for (Final) Sampling of a Release* (C-141N), for incident ID (n#) nAPP2520950540.

The sampling event is expected to take place:

**When:** 09/24/2025 @ 08:00

**Where:** J-01-23S-34E 0 FNL 0 FEL (32.330897,-103.419449)

**Additional Information:** Jason Owsley  
575.602.5998

**Additional Instructions:** 32.330897,-103.419449

An OCD representative may be available onsite at the date and time reported. In the absence or presence of an OCD representative, sampling pursuant to 19.15.29.12.D NMAC is required. Sampling must be performed following an approved sampling plan or pursuant to 19.15.29.12.D.(1).(c) NMAC. Should there be a change in the scheduled date and time of the sampling event, then another notification should be resubmitted through OCD permitting as soon as possible.

- **Failure to notify the OCD of sampling events including any changes in date/time per the requirements of 19.15.29.12.D.(1).(a) NMAC, may result in the remediation closure samples not being accepted.**
- **If confirmation sampling is going to take place over multiple days, individual C-141N applications must be submitted for each sampling date. Date ranges are not currently accepted on the C-141N application.**

If you have any questions regarding this application, or don't know why you have received this email, please contact us.

RE: DONKEY KONG CTB ( NAPP2520950540 )

Enclosed are the results of analyses for samples received by the laboratory on 10/14/25 15:32.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene". The signature is written in a cursive style with a large, stylized 'C' at the beginning.

### Notes and Definitions

QR-03	The RPD value for the sample duplicate or MS/MSD was outside of QC acceptance limits due to matrix interference. QC batch accepted based on LCS and/or LCSD recovery and/or RPD values.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C Samples reported on an as received basis (wet) unless otherwise noted on report

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

### Notes and Definitions

S-06	The recovery of this surrogate is outside control limits due to sample dilution required from high analyte concentration and/or matrix interference's.
QR-03	The RPD value for the sample duplicate or MS/MSD was outside of QC acceptance limits due to matrix interference. QC batch accepted based on LCS and/or LCSD recovery and/or RPD values.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C Samples reported on an as received basis (wet) unless otherwise noted on report

---

HOBBS, NM 88241

RE: DONKEY KONG CTB ( NAPP2520950540 )

Enclosed are the results of analyses for samples received by the laboratory on 08/14/25 14:50.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene". The signature is written in a cursive, flowing style.

Celey D. Keene

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

### Notes and Definitions

S-06	The recovery of this surrogate is outside control limits due to sample dilution required from high analyte concentration and/or matrix interference's.
S-04	The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
QR-03	The RPD value for the sample duplicate or MS/MSD was outside of QC acceptance limits due to matrix interference. QC batch accepted based on LCS and/or LCSD recovery and/or RPD values.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C Samples reported on an as received basis (wet) unless otherwise noted on report

RE: DONKEY KONG CTB ( NAPP2520950540 )

Enclosed are the results of analyses for samples received by the laboratory on 09/24/25 8:02.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene". The signature is written in a cursive style with a large, stylized 'C' and 'K'.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: DONKEY KONG CTB ( NAPP2520950540 )

Enclosed are the results of analyses for samples received by the laboratory on 09/25/25 10:07.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene". The signature is written in a cursive style with a large, stylized 'C' and 'K'.

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

P. O. BOX 2491

HOBBS, NM 88241

RE: DONKEY KONG CTB ( NAPP2520950540 )

Enclosed are the results of analyses for samples received by the laboratory on 09/25/25 16:32.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene". The signature is written in a cursive, flowing style.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: DONKEY KONG CTB ( NAPP2520950540 )

Enclosed are the results of analyses for samples received by the laboratory on 09/25/25 16:32.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Coley D. Keene". The signature is written in a cursive style with a large, stylized 'C' and 'K'.

Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

**QUESTIONS**

Operator: Permian Resources Operating, LLC 300 N. Marienfeld St Ste 1000 Midland, TX 79701	OGRID: 372165
	Action Number: 543858
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

**QUESTIONS**

<b>Prerequisites</b>	
Incident ID (n#)	nAPP2520950540
Incident Name	NAPP2520950540 DONKEY KONG CTB 1 @ FAPP2220946863
Incident Type	Produced Water Release
Incident Status	Reclamation Report Received
Incident Facility	[fAPP2220946863] Donkey Kong 1 CTB 1

**Location of Release Source**

Please answer all the questions in this group.

Site Name	Donkey Kong CTB 1
Date Release Discovered	07/28/2025
Surface Owner	State

**Incident Details**

Please answer all the questions in this group.

Incident Type	Produced Water Release
Did this release result in a fire or is the result of a fire	No
Did this release result in any injuries	No
Has this release reached or does it have a reasonable probability of reaching a watercourse	No
Has this release endangered or does it have a reasonable probability of endangering public health	No
Has this release substantially damaged or will it substantially damage property or the environment	No
Is this release of a volume that is or may with reasonable probability be detrimental to fresh water	No

**Nature and Volume of Release**

Material(s) released, please answer all that apply below. Any calculations or specific justifications for the volumes provided should be attached to the follow-up C-141 submission.

Crude Oil Released (bbls) Details	Not answered.
Produced Water Released (bbls) Details	Cause: Equipment Failure   Pump   Produced Water   Released: 125 BBL   Recovered: 15 BBL   Lost: 110 BBL.
Is the concentration of chloride in the produced water >10,000 mg/l	Yes
Condensate Released (bbls) Details	Not answered.
Natural Gas Vented (Mcf) Details	Not answered.
Natural Gas Flared (Mcf) Details	Not answered.
Other Released Details	Not answered.
Are there additional details for the questions above (i.e. any answer containing Other, Specify, Unknown, and/or Fire, or any negative lost amounts)	Not answered.

QUESTIONS, Page 2

Action 543858

**QUESTIONS (continued)**

Operator: Permian Resources Operating, LLC 300 N. Marienfeld St Ste 1000 Midland, TX 79701	OGRID: 372165
	Action Number: 543858
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

**QUESTIONS**

<b>Nature and Volume of Release (continued)</b>	
Is this a gas only submission (i.e. only significant Mcf values reported)	No, according to supplied volumes this does not appear to be a "gas only" report.
Was this a major release as defined by Subsection A of 19.15.29.7 NMAC	Yes
Reasons why this would be considered a submission for a notification of a major release	From paragraph A. "Major release" determine using: (1) an unauthorized release of a volume, excluding gases, of 25 barrels or more.
With the implementation of the 19.15.27 NMAC (05/25/2021), venting and/or flaring of natural gas (i.e. gas only) are to be submitted on the C-129 form.	

**Initial Response**

The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury.

The source of the release has been stopped	True
The impacted area has been secured to protect human health and the environment	True
Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices	True
All free liquids and recoverable materials have been removed and managed appropriately	True
If all the actions described above have not been undertaken, explain why	Not answered.

Per Paragraph (4) of Subsection B of 19.15.29.8 NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please prepare and attach a narrative of actions to date in the follow-up C-141 submission. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see Subparagraph (a) of Paragraph (5) of Subsection A of 19.15.29.11 NMAC), please prepare and attach all information needed for closure evaluation in the follow-up C-141 submission.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

I hereby agree and sign off to the above statement	Name: Matthew Taylor Title: Environmental Coordinator Email: matthew.taylor@permianres.com Date: 01/16/2026

QUESTIONS, Page 3

Action 543858

**QUESTIONS (continued)**

Operator: Permian Resources Operating, LLC 300 N. Marienfeld St Ste 1000 Midland, TX 79701	OGRID: 372165
	Action Number: 543858
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

**QUESTIONS**

<b>Site Characterization</b>	
<i>Please answer all the questions in this group (only required when seeking remediation plan approval and beyond). This information must be provided to the appropriate district office no later than 90 days after the release discovery date.</i>	
What is the shallowest depth to groundwater beneath the area affected by the release in feet below ground surface (ft bgs)	Between 26 and 50 (ft.)
What method was used to determine the depth to ground water	NM OSE iWaters Database Search
Did this release impact groundwater or surface water	No
<b>What is the minimum distance, between the closest lateral extents of the release and the following surface areas:</b>	
A continuously flowing watercourse or any other significant watercourse	Between 1 and 5 (mi.)
Any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)	Between 1 and 5 (mi.)
An occupied permanent residence, school, hospital, institution, or church	Greater than 5 (mi.)
A spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes	Between 1 and 5 (mi.)
Any other fresh water well or spring	Between 1 and 5 (mi.)
Incorporated municipal boundaries or a defined municipal fresh water well field	Greater than 5 (mi.)
A wetland	Between 1 and 5 (mi.)
A subsurface mine	Greater than 5 (mi.)
An (non-karst) unstable area	Greater than 5 (mi.)
Categorize the risk of this well / site being in a karst geology	Low
A 100-year floodplain	Greater than 5 (mi.)
Did the release impact areas not on an exploration, development, production, or storage site	Yes

<b>Remediation Plan</b>	
<i>Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.</i>	
Requesting a remediation plan approval with this submission	Yes
<i>Attach a comprehensive report demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined, pursuant to 19.15.29.11 NMAC and 19.15.29.13 NMAC.</i>	
Have the lateral and vertical extents of contamination been fully delineated	Yes
Was this release entirely contained within a lined containment area	No
<b>Soil Contamination Sampling:</b> (Provide the highest observable value for each, in milligrams per kilograms.)	
Chloride (EPA 300.0 or SM4500 Cl B)	67200
TPH (GRO+DRO+MRO) (EPA SW-846 Method 8015M)	40430
GRO+DRO (EPA SW-846 Method 8015M)	32600
BTEX (EPA SW-846 Method 8021B or 8260B)	0
Benzene (EPA SW-846 Method 8021B or 8260B)	0
<i>Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.</i>	
On what estimated date will the remediation commence	09/18/2025
On what date will (or did) the final sampling or liner inspection occur	09/25/2025
On what date will (or was) the remediation complete(d)	09/23/2025
What is the estimated surface area (in square feet) that will be reclaimed	61000
What is the estimated volume (in cubic yards) that will be reclaimed	1608
What is the estimated surface area (in square feet) that will be remediated	23000
What is the estimated volume (in cubic yards) that will be remediated	1328
<i>These estimated dates and measurements are recognized to be the best guess or calculation at the time of submission and may (be) change(d) over time as more remediation efforts are completed.</i>	
<i>The OCD recognizes that proposed remediation measures may have to be minimally adjusted in accordance with the physical realities encountered during remediation. If the responsible party has any need to significantly deviate from the remediation plan proposed, then it should consult with the division to determine if another remediation plan submission is required.</i>

**QUESTIONS**

<b>Remediation Plan (continued)</b>	
<i>Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.</i>	
<b>This remediation will (or is expected to) utilize the following processes to remediate / reduce contaminants:</b>	
<i>(Select all answers below that apply.)</i>	
(Ex Situ) Excavation and <b>off-site</b> disposal (i.e. dig and haul, hydrovac, etc.)	Yes
Which OCD approved facility will be used for <b>off-site</b> disposal	fJEG1635837366 OWL LANDFILL JAL
<b>OR</b> which OCD approved well (API) will be used for <b>off-site</b> disposal	Not answered.
<b>OR</b> is the <b>off-site</b> disposal site, to be used, out-of-state	Not answered.
<b>OR</b> is the <b>off-site</b> disposal site, to be used, an NMED facility	Not answered.
(Ex Situ) Excavation and <b>on-site</b> remediation (i.e. On-Site Land Farms)	Not answered.
(In Situ) Soil Vapor Extraction	Not answered.
(In Situ) Chemical processing (i.e. Soil Shredding, Potassium Permanganate, etc.)	Not answered.
(In Situ) Biological processing (i.e. Microbes / Fertilizer, etc.)	Not answered.
(In Situ) Physical processing (i.e. Soil Washing, Gypsum, Disking, etc.)	Not answered.
Ground Water Abatement pursuant to 19.15.30 NMAC	Not answered.
OTHER (Non-listed remedial process)	Not answered.
<i>Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.</i>	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. QUESTIONS, Page 6

Action 543858

**QUESTIONS (continued)**

Operator: Permian Resources Operating, LLC 300 N. Marienfeld St Ste 1000 Midland, TX 79701	OGRID: 372165
	Action Number: 543858
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

**QUESTIONS**

Sampling Event Information	
Last sampling notification (C-141N) recorded	507156
Sampling date pursuant to Subparagraph (a) of Paragraph (1) of Subsection D of 19.15.29.12 NMAC	09/25/2025
What was the (estimated) number of samples that were to be gathered	50
What was the sampling surface area in square feet	9000

Remediation Closure Request	
<i>Only answer the questions in this group if seeking remediation closure for this release because all remediation steps have been completed.</i>	
Requesting a remediation closure approval with this submission	Yes
Have the lateral and vertical extents of contamination been fully delineated	Yes
Was this release entirely contained within a lined containment area	No
All areas reasonably needed for production or subsequent drilling operations have been stabilized, returned to the sites existing grade, and have a soil cover that prevents ponding of water, minimizing dust and erosion	Yes
What was the total surface area (in square feet) remediated	23000
What was the total volume (cubic yards) remediated	1328
All areas not reasonably needed for production or subsequent drilling operations have been reclaimed to contain a minimum of four feet of non-waste contain earthen material with concentrations less than 600 mg/kg chlorides, 100 mg/kg TPH, 50 mg/kg BTEX, and 10 mg/kg Benzene	Yes
What was the total surface area (in square feet) reclaimed	61000
What was the total volume (in cubic yards) reclaimed	1608
Summarize any additional remediation activities not included by answers (above)	Remediation is complete at the site.
<i>The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (in .pdf format) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.</i>	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.	
I hereby agree and sign off to the above statement	Name: Matthew Taylor Title: Environmental Coordinator Email: matthew.taylor@permianres.com Date: 01/16/2026

**QUESTIONS (continued)**

Operator: Permian Resources Operating, LLC 300 N. Marienfeld St Ste 1000 Midland, TX 79701	OGRID: 372165
	Action Number: 543858
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

**QUESTIONS**

<b>Reclamation Report</b>	
<i>Only answer the questions in this group if all reclamation steps have been completed.</i>	
Requesting a reclamation approval with this submission	Yes
What was the total reclamation surface area (in square feet) for this site	61000
What was the total volume of replacement material (in cubic yards) for this site	1608
<i>Per Paragraph (1) of Subsection D of 19.15.29.13 NMAC the reclamation must contain a minimum of four feet of non-waste containing, uncontaminated, earthen material with chloride concentrations less than 600 mg/kg as analyzed by EPA Method 300.0, or other test methods approved by the division. The soil cover must include a top layer, which is either the background thickness of topsoil or one foot of suitable material to establish vegetation at the site, whichever is greater.</i>	
Is the soil top layer complete and is it suitable material to establish vegetation	Yes
On what (estimated) date will (or was) the reseedling commence(d)	10/07/2025
Summarize any additional reclamation activities not included by answers (above)	Reclamation is complete at the site.
<i>The responsible party must attach information demonstrating they have complied with all applicable reclamation requirements and any conditions or directives of the OCD. This demonstration should be in the form of attachments (in .pdf format) including a scaled site map, any proposed reseedling plans or relevant field notes, photographs of reclaimed area, and a narrative of the reclamation activities. Refer to 19.15.29.13 NMAC.</i>	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.
