Re: Remediation Summary & Closure Report
C-24-1 Line Leak (6/23/2024)
UL "N", Section 08, Township 18 South, Range 33 East
Lea County, New Mexico
NMOCD Incident No. nAPP2417743733
Tasman Project No. 7717

Dear Mr. Weathers,

Tasman, Inc. (Tasman) is pleased to submit this remediation summary and closure report for the above referenced site. Site assessment and remediation activities were conducted in compliance with the New Mexico Oil Conservation Division (NMOCD) regulations governing the remediation of produced water releases to the environment. In addition, all applicable requirements set forth by the U.S. Fish and Wildlife Service (USFWS) and the Bureau of Land Management (BLM) for remediation within sensitive habitats were adhered to.

Tasman conducted initial assessment activities, identifying approximately 774 square foot (ft^2) release area and an overspray area covering 318,077 ft^2, that had been impacted by the release. Heavy equipment was used to remove approximately 805 cubic yards of impacted material from the impacted area. Based on laboratory analysis of soil samples collected during confirmation sampling activities, the impacted soil within the release area has been remediated to levels below the applicable NMOCD Action Levels, in compliance with NMOCD standards and the requirements of the USFWS and BLM. Additional project details are provided in the attached summary report.

Tasman appreciates the opportunity to provide environmental services to DCP Operating Company, LP. Should you have any questions or require additional information, please do not hesitate to contact the undersigned.

Sincerely,
Tasman, Inc.

Travis Casey

1.0 INTRODUCTION

Tasman, Inc. (Tasman) is pleased to submit this remediation summary and closure report for the C-24-1 Line Leak (Site) on behalf of DCP Operating Company, LP (DCP), documenting the results of field activities conducted in response to a release of produced water to environmental media.

1.1 Site Description

The site is located in Unit Letter "N" of Section 08, Township 18 South, Range 33 East in Lea County, New Mexico. The release occurred from the C-24-1 pipeline on Bureau of Land Management (BLM) property within a sensitive habitat of a listed species. A site location map can be found attached as Figure 1.

1.2 Sensitive Habitat (Listed Species)

On June 26, 2024, the BLM notified Tasman that the release occurred within a sensitive habitat and requested guidance from the U.S. Fish and Wildlife Service (USFWS). The BLM also required completion of a historical archaeological survey prior to soil disturbance. The affected area was identified as a designated Sensitive Habitat occupied by the Dune Sagebrush Lizard (DSL) (Sceloporus arenicolus). Tasman and DCP coordinated with the USFWS and BLM, and additional requirements were implemented to ensure protection and management of the sensitive habitat.

1.3 Release Detail and Chronology

On June 23, 2024, the C-24-1 pipeline was discovered by DCP personnel to have failed due to a blowout. On June 25, 2024, DCP provided notice of release to the New Mexico Oil Conservation Division (NMOCD) portal, and BLM New Mexico Carlsbad Field Office (CFO). The release resulted in the loss of approximately seven barrels (bbls) of produced water to the surrounding environmental media. DCP personnel shut in the pipeline to isolate the release. Due to the Sensitive Habitat and additional requirements, the line was repaired six months later and returned to service shortly after. No produced water was recovered. A copy of NMOCD notifications are provided in Appendix A.

On July 9, 2024, BLM received USFWS guidance memo #02ENNM00-2024-FE-0113340. Information can be found in Conditions of Approval (COA), available on request.

On July 11, 2024, Tasman contracted a third-party consultant to conduct an intensive cultural resources pedestrian survey of the site. The survey covered approximately 14.63 acres, including

a 100-foot buffer surrounding the 7.49-acre overspray area.

On August 8, 2024, the Archaeological Records Management Section (ARMS) issued a negative finding report. This determination can be verified through the New Mexico Cultural Resources Information System (NMCRIS) under Activity No. 156102. ARMS result is provided in Appendix B.

On July 15, 2024, Tasman conducted vertical and horizontal delineation of the release and overspray areas collecting to a depth of 8 feet below ground surface (bgs) within the release area and 0.5 ft bgs within the overspray area. A total of 69 samples were collected and submitted to Cardinal Laboratory in Hobbs, New Mexico. Laboratory data was collected and utilized to start a Remediation Action Plan (RAP).

On July 30 and 31, 2024, Tasman engaged a third-party consultant to perform a required biological pedestrian survey in support of the DSL and Endangered Species Act (ESA) Compliance Technical Memorandum (2024). This requirement was established by the USFWS on June 20, 2024. The survey was conducted by an individual authorized under a valid USFWS Designated Agent Service Letter. Please refer to Letter No. CS6436985, Project Code 2024-0113340. A copy of the Designated Agent Service Letter is included in Appendix C.

The biological survey was conducted between approximately 0800 and 1200 hours over a two-day period, totaling 16 person-hours (i.e., hours on-site by two biologists). Visual searches were carried out along multiple transects covering the project area. No live or deceased DSL individuals were observed during the survey. Additionally, a BLM-approved access route was identified and mapped during the survey to minimize and avoid impacts to DSL habitat. The full biological pedestrian survey and findings are available in Appendix C.

On November 5, 2024, Tasman submitted the final draft of the RAP, incorporating all requested revisions from BLM and USFWS. BLM subsequently initiated the Conditions of Approval (COA) process for the remediation plan.

On November 12, 2024, the BLM approved the RAP with the condition that a separate Reclamation Plan be submitted by November 21, 2024. The BLM requested that the Reclamation Plan address the following components:

- Reclamation of the temporary access road and work area
- Dune reclamation and restoration
- Dune stabilization measures
- Seed mix specifications and application methods
- A monitoring plan

The COA and RAP documents are available upon request.

On January 27, 2025, Tasman contracted a third-party contractor to advance a groundwater determination boring to a total depth of 65 ft below ground surface. A temporary casing was installed into boring to prevent bore hole collapse. On January 30, 2025, the soil bore was measured for the presence of water. Groundwater was not encountered, and the boring was plugged according to state requirements. The Soil Log and Plugging Record is attached within Appendix D.

On February 3, 2025, Tasman submitted the BLM approved RAP to NMOCD. The RAP was approved by NMOCD on February 7, 2025, with the condition that confirmation soil samples be collected within the overspray area at a spacing no greater than 400 square feet (ft^2).

2.0 REMEDIATION ACTION LEVELS

NMOCD assessment and cleanup levels for hydrocarbon and produced water releases are based on depth to groundwater and proximity to sensitive receptors as established in NMAC 19.15.29. Based on the site characteristics provided in the Remediation Action Plan, Action Levels for a site with a depth to groundwater between 50 and 100 feet were utilized; these Action Levels are as follows:

Constituent	Remediation Action Level
Chloride	10,000 mg/kg
TPH (GRO+DRO+MRO)	2,500 mg/kg
TPH (GRO+DRO)	1,000 mg/kg
BTEX	50 mg/kg
Benzene	10 mg/kg

TPH – total petroleum hydrocarbons
DRO – diesel range organics
BTEX – benzene, toluene, ethylbenzene, total xylenes
GRO – gasoline range organics
MRO – motor/lube oil range organics
mg/kg – milligrams per kilogram

2.1 Reclamation Levels

NMAC 19.15.29.13(D) codifies, and the *Procedures for Implementation of the Spill Rule,* dated September 6, 2019, clarifies that the top four feet of the remediated area should be non-waste containing. Therefore, the NMOCD Reclamation Standards are applied to the top four feet of any area impacted by a release that is not located within an active production facility. NMOCD Reclamation Standards are as follows:

Constituent	Reclamation Standard
Chloride	600 mg/kg
TPH (GRO+DRO+MRO)	100 mg/kg
BTEX	50 mg/kg
Benzene	10 mg/kg

3.0 SOIL SAMPLING PROCEDURES

3.1 Soil Sampling Procedures for Laboratory Analysis

The collection of soil samples for laboratory analysis was conducted in accordance with NMOCD requirements and approved industry standards. Collected soil samples were placed in laboratory provided containers, labeled, and preserved on ice pending delivery under a chain of custody form to Cardinal Laboratory located in Hobbs, New Mexico.

3.2 Soil Analytical Methods

Each soil sample was analyzed using Environmental Protection Agency (EPA) methods. Laboratory analytical methods are as follows:

- Chloride – EPA Method SM4500.
- Total Petroleum Hydrocarbons (TPH) – gasoline, diesel, and motor/lube oil range organics (GRO+DRO+MRO) – EPA Method 8015M Extended.
- Benzene, toluene, ethylbenzene, and total xylenes (BTEX) – EPA Method 8021B.

4.0 SUMMARY OF REMEDIAL ACTIVITIES

4.1 Remedial Activities

The entire impacted area associated with the pipeline release measured 318,077 ft^2 and was arranged into three impacted areas. The Release Excavation Area measuring 774 ft^2, the Overspray Excavation Area measuring 49,141 ft^2, and the Micro-Blaze Treated Area measuring 268,936 ft^2. The three areas were remediated in accordance with the NMOCD and BLM approved RAP.

Between December 26, 2024, and January 10, 2025, Tasman obtained a ROW grant from the BLM for the access road and commenced construction activities. The access road construction was initiated in alignment with the RAP submitted on November 12, 2024.

On January 13, 2025, notification was provided to the BLM and the USFWS regarding the scheduled remediation start date of January 15, 2025. The use of a valid and approved BLM/USFWS Designated Agent was used serving as a third-party. The Center of Environmental Health Monitoring and Management (CEHMM) was approved by BLM and utilized as the on-site wildlife monitor during remediation activities.

From January 15 through January 28, 2025, remediation activities were conducted using heavy equipment to excavate impacted soil from within the release margins and along the C-24-1 pipeline. The excavated material was temporarily stockpiled on-site on a polyethylene liner, pending transport to a disposal facility approved by the NMOCD.

On January 24, 2025, Tasman submitted the requested Reclamation Plan to BLM and the USFWS for approval.

On January 30, 2025, “like” backfill material approved by BLM was imported and used to backfill the excavation 14 feet bgs to support the C-24-1 pipelines stability. After placement of the backfill, the excavation around the pipeline was sloped, and wildlife ramps were installed.

In response to BLM and USFWS requests to minimize the footprint of heavy equipment, Tasman personnel manually excavated impacted dunes north of the release area, using hand tools to remove visibly stained material.

Between January 31 and February 27, 2025, Tasman conducted a Micro-Blaze® application using backpack sprayers across the designated 268,936 ft^2 of the Micro-Blaze Treated Area. This method allowed Tasman to effectively mitigate contamination while avoiding habitat disturbance.

In addition to the microbial treatment, Tasman mechanically removed soil from 6 to 8 inches from the 49,141 ft^2 area, referred to as the Overspray Excavation Area. Following NMOCD remediation procedure, the area was recontoured to align with the natural slope of the surrounding dunes.

The final remedial excavation nearest the release point measured approximately 40 feet in length by 30 feet in width, with excavation depths ranging from 5 to 14 ft bgs. A total of 805 cubic yards of impacted material were excavated and transported to Lea Land, LLC Landfill for disposal.

Copies of the solid waste manifests are available upon request. A photographic log documenting site activities can be viewed in Appendix E.

4.2 Confirmation Data Evaluation

From March 3, 2025, through April 22, 2025, 48-hour sampling notifications were submitted to the NMOCD and the BLM (Appendix A). Confirmation sampling was conducted across the three impacted areas of the remediation site. The Release Excavation Area, Overspray Excavation Area, and Micro-Blaze Treated Area which are illustrated in Figures 2A, 2B, and 2C, respectively.

A total of 17 confirmation samples were collected from the Release Excavation Area in and around the C-24-1 pipeline, at depths ranging from 5 to 14 ft bgs. An additional 123 confirmation samples were collected from the Overspray Excavation Area and 540 confirmation samples from the Micro-Blaze Treated area.

Release Excavation Area

On March 10, 2025, and April 11, 2025, Tasman mobilized to the site to collect confirmation soil samples from the release excavation area. A total of 4 confirmation soil samples were collected from the base of the excavation, and 13 confirmation soil samples were collected from the sidewalls of the excavation. Each confirmation soil sample was collected as a five-point composite representing approximately 400 ft^2 or less of excavation base or sidewall area.

Detected concentration of total TPH were above the applicable NMOCD Action Levels in confirmation soil sample W-12 (174 milligrams per kilogram [mg/kg]). This area was addressed by further excavation. An additional confirmation soil sample (W-12A) was collected in this area, and TPH was not detected above laboratory reporting limits.

Concentrations of chlorides, ranging from 32.0 mg/kg to 256 mg/kg were below the applicable NMOCD Action Levels.

Benzene and total BTEX were not detected above laboratory reporting limits in each of the collected confirmation soil samples.

Overspray Excavation Area

On March 6, 7, and 10, 2025, and April 11 and 25, 2025 Tasman mobilized to the site to collect confirmation soil samples from the overspray excavation area. A total of 123 confirmation soil samples were collected from the excavation area. Each confirmation soil sample was collected as a five-point composite representing approximately 400 ft^2 or less of excavation base area.

Detected concentrations of total TPH were above the applicable NMOCD Action Levels in confirmation soil samples FL-24 at 0.5 feet bgs (254 mg/kg), FL-33 at 0.5 feet bgs (293 mg/kg), FL-34 at 0.5 feet bgs (204 mg/kg), FL-37 at 0.5 feet bgs (392 mg/kg), and FL-41 at 0.5 feet bgs (212 mg/kg). Each of these areas were addressed by further excavation. Additional confirmation soil samples were collected in each of these areas and TPH was not detected above laboratory reporting limits.

Concentrations of chlorides were above the applicable NMOCD Action Levels in confirmation soil samples FL-33 at 0.5 feet bgs (624 mg/kg), FL-37 at 0.5 feet bgs (1,040 mg/kg), and FL-92 at 0.5 feet bgs (624 mg/kg Each of these areas were addressed by further excavation. Additional confirmation soil samples were collected in each of these areas and chlorides were not detected above laboratory reporting limits.

Benzene and total BTEX were not detected above laboratory reporting limits in each of the collected confirmation soil samples.

Micro-Blaze® Treated Area

On March 17 through 21, & 24, 2025, Tasman mobilized to the site to collect confirmation soil samples from the microbial (Micro-Blaze®) treated area. A total of 540 confirmation soil samples were collected from the treated area. On March 5th, 2025, the NMOCD approved a variance to collect samples from the overspray area every 500 ft^2. Therefore, each confirmation soil sample was collected as a five-point composite representing approximately 500 ft^2 or less of the area.

Concentrations of chlorides, ranging from 16.0 mg/kg to 48.0 mg/kg were below the applicable NMOCD Action Levels.

Benzene, total BTEX, and TPH were not detected above laboratory reporting limits in each of the collected confirmation soil samples.

A summary of soil analytical results is provided as Tables 1, 2, and 3. All resampled locations are highlighted for easier identification. Certified laboratory analytical reports are provided in Appendix F. The attached Figure 5A illustrates the Release Excavation and sample locations, Figure 5B illustrates Overspray Excavation and sample locations, and Figure 5C illustrates Micro-Blaze® Treated Area and sample locations.

5.0 RESTORATION AND RECLAMATION

Areas affected by the release and associated remediation activities were backfilled with 540 cubic yards or non-waste containing "like" material approved by BLM and contoured to the surrounding topography. Three soil samples (SP-1, SP-2, & SP-3) were collected from the source of the backfill material. The resulting analysis did not show concentrations of TPH, BTEX, or chlorides above laboratory reporting limits (Table 4). The BLM was contacted on their preference of native seed mix. BLM Seed Mixture for Lesser Prairie Chicken (LPC) #2 Sand/Shinnery was approved and applied. Prior to seed application, the disturbed soil was prepped using a disced plow. The seed mix was then broadcast at a rate two times the suggested amount to ensure the greatest likelihood for sufficient germination. The seed was "set" using screen harrow following the seeding event. The site will be monitored for successful germination and vegetative cover.

From June 6 through June 27, 2025, site contouring, dune stabilization, and reseeding measures were conducted on site. Tasman discussed and received approval for the restoration and reclamation activities through email correspondence, virtual meetings, and on-site visits with representatives from the BLM. Dune stabilization requirements were also fulfilled using erosion control materials approved by both BLM and USFWS.

Between July 21 and July 27, 2025, the access road constructed for remediation purposes was removed and contoured to match the surrounding natural landscape. The restored access road was reseeded, and physical barriers were installed to block further access, allowing for vegetation regrowth and minimizing disturbance from vehicle traffic.

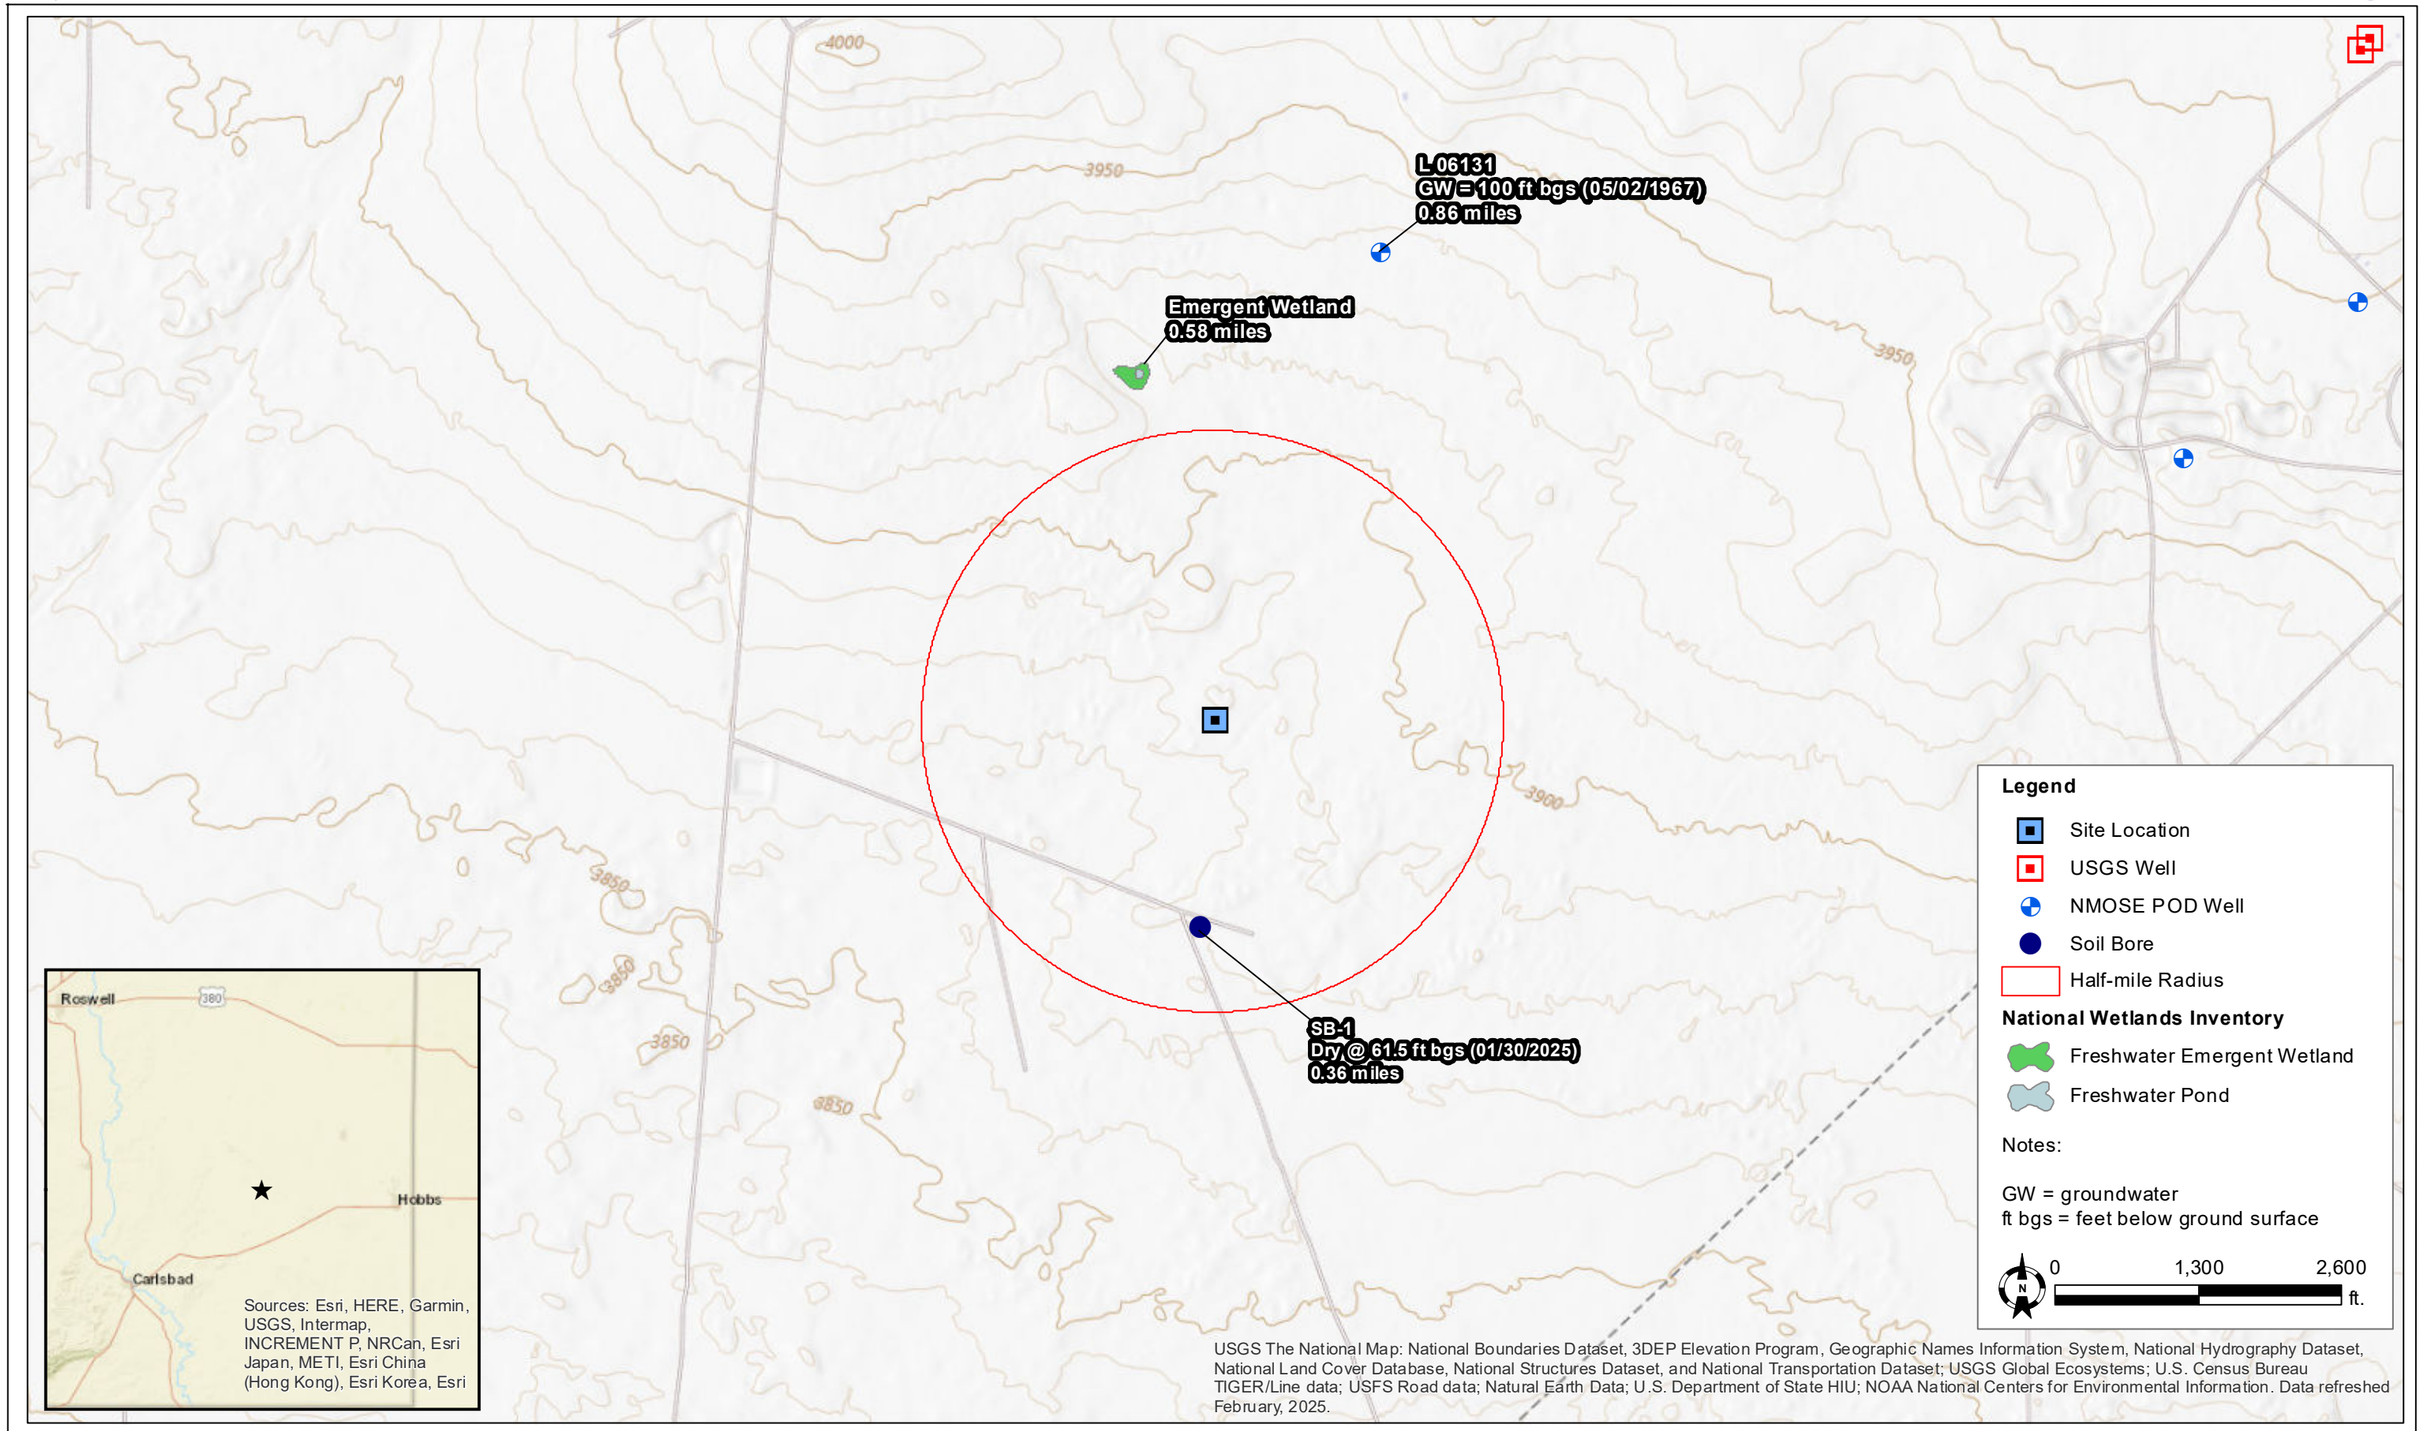

Released to Imaging: 2/27/2026 3:13:46 PM

6.0 SITE CLOSURE REQUEST

Tasman initial assessment identified approximately 774 square foot (ft2) release area and an overspray area covering 318,077 ft2, that was separated into two areas an Overspray Excavation Area and a Micro-Blaze® Treated Area. Remediation with the use of heavy equipment removed approximately 805 cubic yards of impacted material from the impacted areas and were properly disposed. The remediation was completed in accordance with BLM and NMOCD approved RAP. Based on laboratory analytical results from the 680 soil samples collected during the confirmation sampling events, the impacted soil associated with the pipeline release has been remediated to concentrations below the applicable NMOCD Action Levels, in accordance with NMAC 19.15.29. Accordingly, all NMOCD requirements were met, as well as the requirements established by both BLM and the USFWS have been satisfied.

Based on the data provided herein, the release of produce water at the site has been remediated below the applicable NMOCD Action Levels. On behalf of DCP, Tasman respectfully requests that closure of the site C-24-1 Line Leak be formally granted.

Notes:

1. BTEX = Benzene, toluene, ethylbenzene, and total xylenes by EPA method 8260
2. TPH = Total petroleum hydrocarbons analyzed by method EPA 8015M (GRO/DRO/MRO)
3. Chloride - Analyzed by EPA method SM4500
4. New Mexico Administrative Code (NMAC) 19.15.29.13(D) - Restoration, Reclamation, and Re-vegetation (Reclamation for areas no longer in use) for soils extending to 4 ft. below grade surface (bgs).
5. New Mexico Oil Conservation Division (NMOCD) Remediation and Delineation Standards (NMAC 19.15.29.12(N))

Bold values denote concentrations above laboratory RL / **Red** values denote concentrations above NMOCD Action Levels

Yellow highlight denote soil resample

GRO = Gasoline range organics
DRO = Diesel range organics
MRO = Motor/lube oil range organics
PID = Photoionization detector
--- = Sample was not analyzed for this analyte
<RL = The analyte was not detected above the laboratory reporting limit (RL)
N/A = Not applicable

Questions

Prerequisites

Incident ID (n#)	**nAPP2417743733**
Incident Name	**NAPP2417743733 C-24-1 LINE LEAK @ 0**
Incident Type	**Blow Out**
Incident Status	**Initial C-141 Received**

Location of Release Source

Please answer all the questions in this group.

Site Name	C-24-1 Line Leak
Date Release Discovered	06/23/2024
Surface Owner	Federal

Incident Details

Please answer all the questions in this group.

Incident Type	Blow Out
Did this release result in a fire or is the result of a fire	No
Did this release result in any injuries	No
Has this release reached or does it have a reasonable probability of reaching a watercourse	No
Has this release endangered or does it have a reasonable probability of endangering public health	No
Has this release substantially damaged or will it substantially damage property or the environment	No
Is this release of a volume that is or may with reasonable probability be detrimental to fresh water	No

Is the concentration of chloride in the produced water >10,000 mg/l	No
Condensate Released (bbls) Details	*Not answered.*
Natural Gas Vented (Mcf) Details	*Not answered.*
Natural Gas Flared (Mcf) Details	*Not answered.*
Other Released Details	*Not answered.*
Are there **additional details** for the questions above (i.e. any answer containing Other, Specify, Unknown, and/or Fire, or any negative lost amounts)	*Not answered.*

Nature and Volume of Release (continued)

Is this a gas only submission (i.e. only significant Mcf values reported)	**No, according to supplied volumes this does not appear to be a "gas only" report.**
Was this a major release as defined by Subsection A of 19.15.29.7 NMAC	**No**
Reasons why this would be considered a submission for a notification of a major release	*Unavailable.*

With the implementation of the 19.15.27 NMAC (05/25/2021), venting and/or flaring of natural gas (i.e. gas only) are to be submitted on the C-129 form.

Initial Response

The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury.

The source of the release has been stopped	True
The impacted area has been secured to protect human health and the environment	True
Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices	True
All free liquids and recoverable materials have been removed and managed appropriately	True
If all the actions described above have not been undertaken, explain why	*Not answered.*

Per Paragraph (4) of Subsection B of 19.15.29.8 NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please prepare and attach a narrative of actions to date in the follow-up C-141 s
If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see Subparagraph (a) of Paragraph (5) of Subsection A of 19.15.29.11 NMAC), please prepare and attach all information needed for closure e
the follow-up C-141 submission.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain r
notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their op
have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relie
operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

I hereby agree and sign off to the above statement	Name: Ray Smalts Title: Sr Environmental Eng/Spec Email: raymond.a.smalts@p66.com Date: 06/27/2024

Site Characterization

Please answer all the questions in this group (only required when seeking remediation plan approval and beyond). This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

What is the shallowest depth to groundwater beneath the area affected by the release in feet below ground surface (ft bgs)	*Not answered.*
What method was used to determine the depth to ground water	*Not answered.*
Did this release impact groundwater or surface water	*Not answered.*

What is the minimum distance, between the closest lateral extents of the release and the following surface areas:

A continuously flowing watercourse or any other significant watercourse	*Not answered.*
Any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)	*Not answered.*
An occupied permanent residence, school, hospital, institution, or church	*Not answered.*
A spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes	*Not answered.*
Any other fresh water well or spring	*Not answered.*
Incorporated municipal boundaries or a defined municipal fresh water well field	*Not answered.*
A wetland	*Not answered.*
A subsurface mine	*Not answered.*
An (non-karst) unstable area	*Not answered.*

Remediation Plan

Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

Requesting a remediation plan approval with this submission No

The OCD recognizes that proposed remediation measures may have to be minimally adjusted in accordance with the physical realities encountered during remediation. If the responsible party has any need to significantly deviate from the remediation plan then it should consult with the division to determine if another remediation plan submission is required.

Acknowledgments

This submission type does not have acknowledgments, at this time.

Report Number:

Title of Report

Title of Report: A Class III Cultural Resources Survey for the 7717_C-24-1 Line Leak Inadvertent Pipeline Release Remediation Project in Lea County, NM

Authors: Beau Murphy

Publication Type: Report, Monograph, or Book

Description of Undertaking (what does the project entail?)

Description: Tasman, Inc. in association with DCP Operating Company LP (DCP) contracted SWCA Environmental Consultants to conduct an intensive cultural resources pedestrian survey in support of the 7717_C-24-1 Line Leak inadvertent pipeline release remediation project in Lea County, New Mexico. The remediation process will require removing impacted sediments from the contaminated area and replacing them with clean soil. The survey area is 14.63 acres (5.92 hectares), including a 100 foot buffer around an overspray area of 7.49 acres (3.03 hectares) located approximately 24 miles (39 kilometers) southwest of Lovington, New Mexico entirely on lands managed by the Bureau of Land Management – Carlsbad Field Office (BLM-CFO).

Dates of Investigation

From: 11-Jul-2024 **To:** 11-Jul-2024

July 24, 2024

CS6436985-DAS

Nicole Smolensky, Ph.D.
SWCA Environmental Consultants
4407 Monterey Oaks Blvd
Austin, TX 78749

Dear Dr. Smolensky:

The U. S. Fish and Wildlife Service (Service) has received notification of your retention as a qualified biologist to work with the dunes sagebrush lizard (DSL) on the emergency spill cleanup in response to the C-24-1 line produced water release. The Service has also received your permit application for continued research and surveys for the DSL. Due to the listing determination of 'Endangered' becoming effective for the DSL on June 20, 2024, it is not feasible to process your permit application in a time frame concurrent with the survey or recovery needs for the cleanup activities related to the C-24-1 line produced water release. To ensure survey and recovery activities can continue, the Service is issuing this letter which designates the individuals listed below as Designated Agents of the Service for the purposes of conducting DSL survey and recovery in response to the C-24-1 produced water release cleanup while we continue to process your application for a research and recovery permit. In accordance with section 10(a)(1)(A) of the Endangered Species Act (16 U.S.C. 1531 *et seq*.), regulations promulgated thereto, and the Region 2 Regional Director's permits TE676811-0 and ES-704930-3, respectively, individuals identified below are hereby designated as an agent of the Service to engage in the activities specified in this letter which may result in take of the DSL in 2024. This agent designation is strictly limited to the activities and terms and conditions below.

The individuals named in this letter as Authorized Individuals are authorized to conduct DSL surveys under the following conditions:

1. Conduct visual encounter surveys (VES) for lizards and habitat assessment surveys prior to remedial action.

2. If lizards are observed within the excavation area, the biologist may attempt to recover the individual(s) by capturing and relocating them to a nearby suitable area. Data including snout-vent length, tail length, weight, sex, general description of health condition, location collected (GPS), location released (GPS), and photographs should be collected on all captured lizards.

3. Dead or moribund lizards must be collected, preserved, and deposited at the Museum of Southwestern Biology, University of New Mexico, Albuquerque, NM. A copy of this letter must accompany and be maintained with all specimens collected and deposited at the Museum.

4. A qualified biologist, as named on the List of Authorized Individuals of this letter, will be present in the field to perform or directly supervise all DSL recovery or survey activities.

5. A report will be submitted electronically by September 1st to the Ecological Services Field Office that signed this letter (address below). The report must include descriptions of all activities undertaken in response to the emergency cleanup activities related to the C-24-1 line produced water release, including number of surveys performed, method of lizard capture, location DSL individuals were released, and any other data or information collected or referenced above.

Please refer to the letter number CS6436985-DAS, Project Code 2024-0113340, and the date of this letter in all correspondence and reports concerning agent activities. Engagement in activity pursuant to this designation letter constitutes understanding and acceptance of the Terms and Conditions stipulated in this letter.

This letter of authorization expires when the activities necessary to address the C-24-1 line produced water release are completed or at the end of the 2024 DSL survey season, August 15, 2024, whichever comes first. This letter does not relieve the Authorized individuals or SWCA of responsibilities to comply with all other applicable Federal, State, Tribal, and local regulations regarding possession and final disposition of the authorized species.

The following person(s) are covered to work under this Letter of Authorized Individuals:

1. Nicole Smolensky
2. Matthew McMillan
3. Cassandra Aguillard
4. Kelley Reid

Supervised individuals may conduct activities pursuant to this letter only under the direct, on-site supervision of an independently authorized individual listed above. “On-site supervision” is defined as having the authorized individual at a distance that would allow this individual to immediately assist a supervised individual, as needed, while they are conducting an authorized activity.

Any questions you may have regarding this letter should be directed to Marilyn Wright of the New Mexico Ecological Services Field Office at marilyn_wright@fws.gov.

Sincerely,

(For) Shawn Sartorius
Field Supervisor

TECHNICAL MEMORANDUM

To: Stephen Weathers
DCP Operating Company, LP
10 Desta Drive, Suite 600W
Midland, Texas 79705

From: Jenn Clayton, Natural Resources Director
Nicole Smolensky, Subject Matter Expert and Biological Lead

Date: August 16, 2024

Re: **DCP_P66 7717 C-24-1 Pipeline Dunes Sagebrush Lizard Surveys and Endangered Species Act Compliance Technical Memorandum / Project No. 0009100**

INTRODUCTION

DCP Operating Company, LP (DCP), is developing a remediation plan for the '7717_C-24-1 Line Leak' inadvertent pipeline release, which occurred on June 23, 2024. The line leak is entirely on Bureau of Land Management (BLM)–managed lands in Lea County, New Mexico. DCP has identified the area for remediation activities (project area) (Figure 1). The project area consists of a 773-square-foot (feet^2) release area, which has been heavily saturated with released fluids that penetrated the subsurface within a broader overspray area where smaller quantities of fluids were released, affecting the surface. DCP has a proposed access route to the project area originating from a caliche road to the south that passes along DCP's existing pipeline right-of-way. The overspray area is 318,000 feet^2. DCP has communicated with the BLM on the necessary steps for remediation activities.

The project area is within the range of the federally listed endangered dunes sagebrush lizard (*Sceloporus arenicolus*; DSL) and contains suitable habitat, as modeled by the U.S. Fish and Wildlife Service (USFWS) (2024). The BLM and USFWS, via communication with the BLM, have indicated that biological surveys for DSL are needed. DCP contracted SWCA Environmental Consultants (SWCA) to conduct the survey for DSL. Should any DSL be encountered and need to be captured, handled or salvaged, the USFWS authorized SWCA to be a *Designated Agent of the Service* (Letter Number CS6436985-DAS, Project Code 2224-0113340, July 24, 2024) (Appendix A). In this technical memorandum, SWCA presents the findings of the survey for DSL individuals and habitat within the project area. SWCA also provides suggested alternative access routes to the area where specific remediation activities will occur that may minimize or avoid additional impacts to suitable DSL habitat.

This technical memorandum is meant to document completion of required surveys and field observations. Recommendations provided are intended to further facilitate the planning of remediation activities on BLM-managed lands with the intention of reducing the potential for adverse impacts to DSL individuals and suitable habitat to the greatest extent practicable. Recommendations contained within this document

Received by OCD: 2/3/2026 12:44:55 PM

are the opinions of SWCA biologists based on knowledge of the species and field observations. All project plan actions must be further authorized by the BLM and USFWS before being implemented to ensure compliance with the Endangered Species Act.

METHODS

Dunes Sagebrush Lizard Surveys

Two SWCA biologists, including Nicole Smolensky, identified by the USFWS as the Designated Agent of the Service, conducted a pedestrian survey of DSL in the project area. SWCA biologists walked slowly along 27 transects spaced 10 meters apart, totaling 1.86 miles (Figure 2). The transects spanned sand dunes predominantly vegetated with shinnery oak (*Quercus havardii*) and shinnery oak dominated shrublands (see Figures 1 and 2).

During the survey, SWCA biologists searched for dead or moribund DSL, looking carefully along and under the vegetation while walking. When SWCA biologists detected a live lizard, SWCA biologists would walk as close as possible to the lizard to identify the species. If SWCA biologists detected a DSL within the release area (see Figure 1), SWCA biologists would attempt to capture DSL by hand or noose-pole and relocate DSL to a nearby suitable area. If SWCA biologists detected any dead or moribund DSL, SWCA biologists would donate the specimens for deposition at the Museum of Southwestern Biology at the University of New Mexico in Albuquerque, New Mexico.

SWCA biologists conducted the survey during suitable survey conditions that would facilitate the detection of DSL if present. Daily ambient temperatures were between 80 degrees and 100 degrees Fahrenheit (˚F) (Degenhardt et al. 1996; Fitzgerald and Painter 2009; Fitzgerald et al. 2011; Grant 1990; Sartorius et al. 2002; Sena 1985; Smolensky and Fitzgerald 2006). Surveys were conducted on full sun days when chance of precipitation was low during the survey periods, as well as, 1 day preceding and succeeding the dates of survey (Sartorius et al. 2002; Sena 1985). Surveys were conducted in July, a month when DSL are known to be active (Texas A&M University 2016; Walkup et al. 2017).

Dunes Sagebrush Lizard Habitat Assessment

SWCA biologists first conducted a desktop review of existing conditions of DSL habitat in and around the project area using available imagery on Google Earth (2024) and modeled DSL habitat (USFWS 2024) to support DCPs siting and planning of its remediation activities. SWCA biologists conducted a site visit to ground-truth the desktop review data. SWCA biologists compared present conditions to the current USFWS DSL habitat model (USFWS 2024) and dunal complexes identified on aerial imagery to confirm habitat suitability conditions and identify areas for avoidance. SWCA biologists took geo-referenced photographs to illustrate the consistency of the existing conditions to modeled DSL habitat and aerial imagery (Appendix B).

RESULTS

Dunes Sagebrush Lizard Survey Results

SWCA biologists conducted the surveys on July 30 and July 31, 2024. SWCA biologists conducted the pedestrian surveys each day between approximately 8:00 a.m. and 12:00 p.m. The survey effort consisted of 16-person hours (i.e., total number of hours spent on site × two biologists) of visual searching along the 27 transects that spanned the project area. Weather conditions during the survey period, as recorded by the nearest local weather station (Lea County Regional Airport-KHOB) (Weather Underground 2024), were suitable for DSL activity (Fitzgerald and Painter 2009; Fitzgerald et al. 2011; Sartorius et al. 2002) (Table 1).

Table 1. Duration of Field Efforts and Weather Conditions

Date	Person-hours	Minimum Daily Air Temperature (˚F)	Maximum Daily Air Temperature (˚F)	Cloud Cover (%)	Average Wind Speed (miles per hour) and Direction
July 30	8	70	100	0%	10 SSE
July 31	8	75	102	0%	12 SE

Source: Weather Underground (2024).

Note: SE = southeast; SSE = south/southeast.

No live or dead DSL were detected during the pedestrian survey. None were detected incidentally outside of the project area while SWCA biologists were en route to the project area or assessing alternative access routes to the project area.

SWCA biologists detected numerous side-blotched lizards (*Uta stansburiana*) of all demographic stages (adults, juveniles, hatchlings, males and females) and numerous marbled whiptail lizards (*Aspidoscelis marmorata*) throughout the access route and overspray area. SWCA biologists detected one lesser earless lizard (*Holbrookia maculata*) in the shinnery oak shrubland in the western portion of the overspray area and one Texas horned lizard (*Phrynosoma cornutum)* along one of the caliche roads en route to the project area.

The release area had very little evidence of current use by wildlife. There were no live, physically wounded, or dead vertebrate wildlife, including lizards in the release area (see Appendix B). There were some live aerial insects flying near to but over the dead vegetation in the release area and a few dead insects in the release area where pooled fluids remain. SWCA biologists also observed some footprints of coyote (*Canas latrans*) and rabbit in the release area.

Immediately adjacent to the release area where the soil was minimally covered with release fluids and where some live vegetation persists, SWCA biologists observed side-blotched lizards, whiptail lizards, and other vertebrate wildlife and insects (see Appendix B).

Dunes Sagebrush Lizard Habitat Assessment Results

SWCA biologists did not detect inconsistencies between the current landscape, aerial imagery, and the USFWS–modeled habitat (USFWS 2024) for DSL. There are some large shinnery oak sand dune complexes and some smaller deflated shinnery oak sand dunes toward the edges of the large shinnery oak sand dune complexes in the project area and along the proposed access route, which is consistent with the model designation of *shinnery oak duneland* (see Figure 1 and Appendix B). There are also areas of shinnery oak shrublands, modeled as *shinnery oak supportive habitat* (see Figure 1 and Appendix B). The relative locations of shinnery oak dunelands and shinnery oak supportive habitat conform to the current landscape.

SUGGESTED ACCESS ROUTES TO MINIMIZE OR AVOID IMPACTS TO DUNES SAGEBRUSH LIZARD HABITAT

DSL use shinnery oak dunelands for breeding, feeding, sheltering (Degenhardt and Jones 1972; Fitzgerald et al. 2022; Hill and Fitzgerald 2007; Ryberg et al. 2012; USFWS 2024). Shinnery oak supportive habitat may be used by DSL for dispersal (Fitzgerald et al. 2005; Johnson et al. 2016; USFWS 2024). Although no DSL were detected in shinnery oak dunelands and shinnery oak supportive habitat during the pedestrian survey, project activities may still adversely affect DSL. To minimize effects to DSL, SWCA biologists propose four alternative access routes to the project area (Figure 3). These access routes are intended to skirt or minimally span the shinnery oak duneland and pass through shinnery oak supportive habitat. By doing so, effects to the habitats that support key behaviors of DSL may be minimized. Some routes originate at well pads that may be used for staging. Staging equipment outside of the shinnery oak dunelands where practicable would also minimize impacts to DSL.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

S-04	The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 03/07/25 15:06.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 03/11/25 8:06.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 03/11/25 8:06.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 03/18/25 9:36.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PHONE (575) 393-2326 ° 101 E. MARLAND ° HOBBS, NM 88240

Notes and Definitions

QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
BS-3	Blank spike recovery outside of lab established statistical limits, but still within method limits. Data is not adversely affected.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

Cardinal Laboratories *=Accredited Analyte

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising whether based in contract or tort, shall be limited to the amount paid by the client for the analyses. All claims including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within 30 days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries affiliates or successors arising out of or related to the performance of services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise.

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 03/18/25 9:36.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Cardinal's liability and client's exclusive remedy for any claim arising whether based in contract or tort, shall be limited to the amount paid by the client for the analyses. All claims including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within 30 days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries affiliates or successors arising out of or related to the performance of services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise.

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 03/18/25 15:04.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

S-04	The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
BS-3	Blank spike recovery outside of lab established statistical limits, but still within method limits. Data is not adversely affected.
BS1	Blank spike recovery above laboratory acceptance criteria. Results for analyte potentially biased high.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 03/18/25 15:04.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

S-04	The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
BS-3	Blank spike recovery outside of lab established statistical limits, but still within method limits. Data is not adversely affected.
BS1	Blank spike recovery above laboratory acceptance criteria. Results for analyte potentially biased high.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising whether based in contract or tort, shall be limited to the amount paid by the client for the analyses. All claims including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within 30 days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries affiliates or successors arising out of or related to the performance of services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise.

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 03/19/25 14:39.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 03/21/25 8:18.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

S-05	The surrogate recovery is outside of lab established statistical control limits but still within method limits. Data is not adversely affected.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

DENVER, CO 80221

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 03/21/25 8:18.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
BS-3	Blank spike recovery outside of lab established statistical limits, but still within method limits. Data is not adversely affected.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 03/21/25 14:18.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Surrogate: 1-Chlorooctane *88.4 %* *44.4-145*

Surrogate: 1-Chlorooctadecane *86.6 %* *40.6-153*

Cardinal Laboratories *=Accredited Analyte

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

CARDINAL Laboratories

PHONE (575) 393-2326 ° 101 E. MARLAND ° HOBBS, NM 88240

Notes and Definitions

S-06	The recovery of this surrogate is outside control limits due to sample dilution required from high analyte concentration and/or matrix interference's.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 03/24/25 15:00.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

CARDINAL Laboratories

PHONE (575) 393-2326 ° 101 E. MARLAND ° HOBBS, NM 88240

Notes and Definitions

S-04	The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
BS-3	Blank spike recovery outside of lab established statistical limits, but still within method limits. Data is not adversely affected.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 04/10/25 15:30.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Mike Snyder For Celey D. Keene

Lab Director/Quality Manager

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 04/11/25 13:40.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Notes and Definitions

QR-04	The RPD for the BS/BSD was outside of historical limits.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

RE: 7717_C - 24 - 1 LINE LEAK

Enclosed are the results of analyses for samples received by the laboratory on 04/25/25 13:37.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Celey D. Keene

Notes and Definitions

QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
BS-3	Blank spike recovery outside of lab established statistical limits, but still within method limits. Data is not adversely affected.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

QUESTIONS

Action 549711

QUESTIONS

Operator: DCP OPERATING COMPANY, LP 2331 Citywest Blvd Houston, TX 77042	OGRID: 36785
	Action Number: 549711
	Action Type: [C-141] Revegetation Report C-141 (C-141-v-Revegetation)

QUESTIONS

Prerequisites	
Incident ID (n#)	**nAPP2417743733**
Incident Name	**NAPP2417743733 C-24-1 LINE LEAK @ N-08-18S-33E**
Incident Type	**Blow Out**
Incident Status	**Re-vegetation Report Received**

Location of Release Source *Please answer all the questions in this group.*	
Site Name	C-24-1 LINE LEAK
Date Release Discovered	06/23/2024
Surface Owner	Federal

Incident Details *Please answer all the questions in this group.*	
Incident Type	Blow Out
Did this release result in a fire or is the result of a fire	No
Did this release result in any injuries	No
Has this release reached or does it have a reasonable probability of reaching a watercourse	No
Has this release endangered or does it have a reasonable probability of endangering public health	No
Has this release substantially damaged or will it substantially damage property or the environment	No
Is this release of a volume that is or may with reasonable probability be detrimental to fresh water	No

Nature and Volume of Release *Material(s) released, please answer all that apply below. Any calculations or specific justifications for the volumes provided should be attached to the follow-up C-141 submission.*	
Crude Oil Released (bbls) Details	*Not answered.*
Produced Water Released (bbls) Details	Cause: Blow Out | Pipeline (Any) | Produced Water | Released: 7 BBL | Recovered: 0 BBL | Lost: 7 BBL.
Is the concentration of chloride in the produced water >10,000 mg/l	No
Condensate Released (bbls) Details	*Not answered.*
Natural Gas Vented (Mcf) Details	*Not answered.*
Natural Gas Flared (Mcf) Details	*Not answered.*
Other Released Details	*Not answered.*
Are there additional details for the questions above (i.e. any answer containing Other, Specify, Unknown, and/or Fire, or any negative lost amounts)	*Not answered.*

QUESTIONS (continued)

Operator: DCP OPERATING COMPANY, LP 2331 Citywest Blvd Houston, TX 77042	OGRID: 36785
	Action Number: 549711
	Action Type: [C-141] Revegetation Report C-141 (C-141-v-Revegetation)

QUESTIONS

Nature and Volume of Release (continued)	
Is this a gas only submission (i.e. only significant Mcf values reported)	**No, according to supplied volumes this does not appear to be a "gas only" report.**
Was this a major release as defined by Subsection A of 19.15.29.7 NMAC	**No**
Reasons why this would be considered a submission for a notification of a major release	*Unavailable.*

With the implementation of the 19.15.27 NMAC (05/25/2021), venting and/or flaring of natural gas (i.e. gas only) are to be submitted on the C-129 form.

Initial Response	
The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury.	
The source of the release has been stopped	True
The impacted area has been secured to protect human health and the environment	True
Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices	True
All free liquids and recoverable materials have been removed and managed appropriately	True
If all the actions described above have not been undertaken, explain why	*Not answered.*

Per Paragraph (4) of Subsection B of 19.15.29.8 NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please prepare and attach a narrative of actions to date in the follow-up C-141 submission. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see Subparagraph (a) of Paragraph (5) of Subsection A of 19.15.29.11 NMAC), please prepare and attach all information needed for closure evaluation in the follow-up C-141 submission.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

I hereby agree and sign off to the above statement	Name: Stephen Weathers Title: Program Manager Email: Stephen.Weathers@p66.com Date: 02/03/2026

QUESTIONS (continued)

Operator: DCP OPERATING COMPANY, LP 2331 Citywest Blvd Houston, TX 77042	OGRID: 36785
	Action Number: 549711
	Action Type: [C-141] Revegetation Report C-141 (C-141-v-Revegetation)

QUESTIONS

Site Characterization	
Please answer all the questions in this group (only required when seeking remediation plan approval and beyond). This information must be provided to the appropriate district office no later than 90 days after the release discovery date.	
What is the shallowest depth to groundwater beneath the area affected by the release in feet below ground surface (ft bgs)	Between 51 and 75 (ft.)
What method was used to determine the depth to ground water	Direct Measurement
Did this release impact groundwater or surface water	No
What is the minimum distance, between the closest lateral extents of the release and the following surface areas:	
A continuously flowing watercourse or any other significant watercourse	Between 1 and 5 (mi.)
Any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)	Between ½ and 1 (mi.)
An occupied permanent residence, school, hospital, institution, or church	Greater than 5 (mi.)
A spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes	Greater than 5 (mi.)
Any other fresh water well or spring	Greater than 5 (mi.)
Incorporated municipal boundaries or a defined municipal fresh water well field	Greater than 5 (mi.)
A wetland	Between ½ and 1 (mi.)
A subsurface mine	Greater than 5 (mi.)
An (non-karst) unstable area	Greater than 5 (mi.)
Categorize the risk of this well / site being in a karst geology	None
A 100-year floodplain	Greater than 5 (mi.)
Did the release impact areas not on an exploration, development, production, or storage site	Yes

Remediation Plan	
Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.	
Requesting a remediation plan approval with this submission	Yes
Attach a comprehensive report demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined, pursuant to 19.15.29.11 NMAC and 19.15.29.13 NMAC.	
Have the lateral and vertical extents of contamination been fully delineated	Yes
Was this release entirely contained within a lined containment area	No
Soil Contamination Sampling: (Provide the highest observable value for each, in milligrams per kilograms.)	
Chloride (EPA 300.0 or SM4500 Cl B)	13200
TPH (GRO+DRO+MRO) (EPA SW-846 Method 8015M)	32210
GRO+DRO (EPA SW-846 Method 8015M)	26710
BTEX (EPA SW-846 Method 8021B or 8260B)	138
Benzene (EPA SW-846 Method 8021B or 8260B)	8.6
Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.	
On what estimated date will the remediation commence	01/20/2025
On what date will (or did) the final sampling or liner inspection occur	02/12/2025
On what date will (or was) the remediation complete(d)	02/28/2025
What is the estimated surface area (in square feet) that will be reclaimed	25000
What is the estimated volume (in cubic yards) that will be reclaimed	650
What is the estimated surface area (in square feet) that will be remediated	1800
What is the estimated volume (in cubic yards) that will be remediated	650
These estimated dates and measurements are recognized to be the best guess or calculation at the time of submission and may (be) change(d) over time as more remediation efforts are completed.	
The OCD recognizes that proposed remediation measures may have to be minimally adjusted in accordance with the physical realities encountered during remediation. If the responsible party has any need to significantly deviate from the remediation plan proposed, then it should consult with the division to determine if another remediation plan submission is required.

QUESTIONS

Remediation Plan (continued)	
Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.	
This remediation will (or is expected to) utilize the following processes to remediate / reduce contaminants:	
(Select all answers below that apply.)	
(Ex Situ) Excavation and **off-site** disposal (i.e. dig and haul, hydrovac, etc.)	Yes
Which OCD approved facility will be used for **off-site** disposal	fEEM0112342028 LEA LAND LANDFILL
OR which OCD approved well (API) will be used for **off-site** disposal	*Not answered.*
OR is the **off-site** disposal site, to be used, out-of-state	No
OR is the **off-site** disposal site, to be used, an NMED facility	No
(Ex Situ) Excavation and **on-site** remediation (i.e. On-Site Land Farms)	No
(In Situ) Soil Vapor Extraction	No
(In Situ) Chemical processing (i.e. Soil Shredding, Potassium Permanganate, etc.)	No
(In Situ) Biological processing (i.e. Microbes / Fertilizer, etc.)	No
(In Situ) Physical processing (i.e. Soil Washing, Gypsum, Disking, etc.)	No
Ground Water Abatement pursuant to 19.15.30 NMAC	No
OTHER (Non-listed remedial process)	No
Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. Operator: DCP OPERATING COMPANY, LP 2331 Citywest Blvd Houston, TX 77042	OGRID: 36785
	Action Number: 549711
	Action Type: [C-141] Revegetation Report C-141 (C-141-v-Revegetation)

QUESTIONS

Sampling Event Information	
Last sampling notification (C-141N) recorded	**454069**
Sampling date pursuant to Subparagraph (a) of Paragraph (1) of Subsection D of 19.15.29.12 NMAC	**04/25/2025**
What was the (estimated) number of samples that were to be gathered	**2**
What was the sampling surface area in square feet	**400**

Remediation Closure Request	
Only answer the questions in this group if seeking remediation closure for this release because all remediation steps have been completed.	
Requesting a remediation closure approval with this submission	Yes
Have the lateral and vertical extents of contamination been fully delineated	**Yes**
Was this release entirely contained within a lined containment area	**No**
All areas reasonably needed for production or subsequent drilling operations have been stabilized, returned to the sites existing grade, and have a soil cover that prevents ponding of water, minimizing dust and erosion	Yes
What was the total surface area (in square feet) remediated	318077
What was the total volume (cubic yards) remediated	805
All areas not reasonably needed for production or subsequent drilling operations have been reclaimed to contain a minimum of four feet of non-waste contain earthen material with concentrations less than 600 mg/kg chlorides, 100 mg/kg TPH, 50 mg/kg BTEX, and 10 mg/kg Benzene	Yes
What was the total surface area (in square feet) reclaimed	49141
What was the total volume (in cubic yards) reclaimed	805
Summarize any additional remediation activities not included by answers (above)	N/A

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (in .pdf format) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.

QUESTIONS (continued)

Operator: DCP OPERATING COMPANY, LP 2331 Citywest Blvd Houston, TX 77042	OGRID: 36785
	Action Number: 549711
	Action Type: [C-141] Revegetation Report C-141 (C-141-v-Revegetation)

QUESTIONS

Reclamation Report	
Only answer the questions in this group if all reclamation steps have been completed.	
Requesting a reclamation approval with this submission	Yes
What was the total reclamation surface area (in square feet) for this site	55000
What was the total volume of replacement material (in cubic yards) for this site	805
Per Paragraph (1) of Subsection D of 19.15.29.13 NMAC the reclamation must contain a minimum of four feet of non-waste containing, uncontaminated, earthen material with chloride concentrations less than 600 mg/kg as analyzed by EPA Method 300.0, or other test methods approved by the division. The soil cover must include a top layer, which is either the background thickness of topsoil or one foot of suitable material to establish vegetation at the site, whichever is greater.	
Is the soil top layer complete and is it suitable material to establish vegetation	Yes
On what (estimated) date will (or was) the reseeding commence(d)	06/06/2025
Summarize any additional reclamation activities not included by answers (above)	Reclamation and revegetation activities in section 5 of the report. Photos of the reclamation and revegetation are on pages 64-98.
The responsible party must attach information demonstrating they have complied with all applicable reclamation requirements and any conditions or directives of the OCD. This demonstration should be in the form of attachments (in .pdf format) including a scaled site map, any proposed reseeding plans or relevant field notes, photographs of reclaimed area, and a narrative of the reclamation activities. Refer to 19.15.29.13 NMAC.	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.	
I hereby agree and sign off to the above statement	Name: Stephen Weathers Title: Program Manager Email: Stephen.Weathers@p66.com Date: 02/03/2026

scott.rodgers	The revegetation report has been approved pursuant to 19.15.29.13 E. NMAC. The acceptance of this report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment; or if the location fails to revegetate properly. In addition, the OCD approval does not relieve the responsible party of compliance with any other federal, state, or local laws and/or regulations.	2/27/2026
