Summarize any additional remediation activities not included by answers (above)	OXY excavated the spill area as depicted on the following site diagrams. The area (PINK shade on diagram) was excavated to a depth of 1' foot. The area (GREEN shade on diagram) was excavated to a depth 2'. The area (RED shade on diagram) was excavated to a depth of 3' The area (BLUE shade on diagram) was excavated to a depth of 4'. OXY collected bottom and sidewall confirmation samples every 200 square feet.

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (in .pdf format) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment.
