13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Bradenhead tests were performed on Jan. 8, 2015 and filed with the New Mexico Energy, Minerals and Natural Resources Department. Tubing pressure was 550, with zero pressure on the casing and bradenhead. This well is currently TA'D because it is watered out and will not produce without artificial lift. The plan was to re-frac the well but with low oil prices the well needs to be re-evaluated for plugging and abandoning. We respectfully request another year of extension on Temporary Abandonment.
