gvasquez	OIL: COG Operating has conducted a review to determine if an H2S contingency plan is required for the above referenced well. We were able to conclude that any potential hazardous volume would be minimal. H2S concentrations of wells in this area from surface to TD are low enough; therefore we do not believe that an H2S Contingency Plan would be necessary	10/26/2018
rpodany	Nov 19 2018. Have received letter from COG Land department stating that interests on east half and west half are the same for section 16 and 21. Location is therefore not affecting outside interests by location being close to centerline of sections. Location conforms to being standard with no NSL application necessary. RWP	11/20/2018
