RE: Administrative Order SWD-1693; Extension of Deadline to Inject

Hank State IP SWD Well No. 1 (API 30-005-64338)

Unit D, Sec 16, T8S, R28E, NMPM, Chaves County, New Mexico

Order Date: September 1, 2017

Injection into Devonian and Silurian formations; Perforations, 7420 feet to 7800 feet

Dear Mr. White:

Reference is made to your request on behalf of the operator ("operator") to extend the deadline stipulated in the above titled order to commence injection for the above referenced well for reasons outlined in your correspondence. The current deadline date to commence injection under said order is two years after issuance of the order; **September 1**, **2019**.

It is the Division's understanding from your correspondence that since the date of issuance of this permit, there have been no changes in affected parties and no additional wells drilled in the one-half mile Area of Review.

The Division finds that for reasons you have stated, the granting of this request to extend this administrative order is in the interest of conservation, will prevent waste, and will protect the environment.

The deadline to commence injection for the existing order is hereby extended until September 1, 2020.

All requirements of the above referenced administrative order and agreements in the application remain in full force and effect.

Any additional extension of the deadline to commence injection for this administrative order will not be considered unless the operator has already commenced drilling out the plugs of the subject well. Otherwise, the injection authority shall expire under the terms of the extended administrative order and the operator shall be required to submit a new application to estain injection authority for the referenced well.

ADRIENNE SANDOVAL Director

Director

AS/wvjj
