Llano Disposal, LLC earlier filed a C-103 notice of intent to rig up on this brine well to identify the problem that was causing the production of light brine water. A damaged tubing string was subsequently discovered. Necessary repairs/replacements were accomplished. We are now ready to perform a brine cavity/tubing MIT (pressure test to 300 psi for 3 hours). We would like to perform this test on Tuesday February 9th, at 10.00 AM. OCD witness is invited.
