### Notice of Intent

**Sundry ID:** 2632509

**Type of Submission:** Notice of Intent

**Type of Action:** Other

**Date Sundry Submitted:** 09/03/2021

**Time Sundry Submitted:** 07:55

**Date proposed operation will begin:** 09/03/2021

**Procedure Description:** DJR Operating, LLC ("DJR") requests approval for a new Spacing Unit and Dedicated Acres designation per the Rule Changes for New Mexico Horizontal Wells as promulgated by the New Mexico Oil Conservation Division. The well was approved (APD) on 9-6-2018 with a Spacing Unit covering 800 acres as a Basin Mancos (400 acres) / Bisti Lower Gallup (400 acres) completion. Since the completed interval for the subject well penetrates a "gas" pool and the anticipated production from the well includes "gas" production, the Standard Horizontal Spacing Unit for the well shall be configured using the tract sizes, setbacks and configuration under the Horizontal Rule for a "gas" well. The Horizontal Rule dictates that in Paragraphs (3) of Subsection B. of 19.15.16.15 NMAC that a Standard Horizontal Spacing Unit for a gas well shall be comprised of one or more contiguous tracts of a certain size that are penetrated by or are within 330' from the well's completed interval; and that in Paragraphs (1) of Subsection C. of 19.15.16.15 NMAC the completed interval be no closer than 660' perpendicular from the boundary of the spacing unit and 330' in the horizontal plane from the first and last take point. The Spacing Unit and Dedicated Acres for the subject well has, therefore, been revised to now represent 960 acres (400 Acres Bisti Lower Gallup Pool) and (560 acres Basin Mancos Gas Pool) as a Standard Horizontal Spacing Unit. In order to establish a Standard Horizontal Spacing Unit for the well, the NE4 of Section 19, T25N-R12W has been excluded due to its proximity (447') to the well's completed interval. The exclusion of this tract, as a result, creates the condition of an unorthodox location, since that point on the completed interval of the lateral is now closer than the required 660' perpendicular setback limits from boundary of the spacing unit. Pursuant to Paragraphs (5) and (6) of Subsection C. of 19.15.16.15 NMAC, DJR intends to submit an application for approval of Unorthodox Well Location for this well. DJR, therefore, requests approval for the revised Standard Horizontal Spacing Unit and Dedicated Acres created under the Horizontal Rules for "gas" wells, as designated on the attached C-102 (Well Location and Dedication Plat). The Dedicated Acres are revised to be 960 acres and the new Pool designation are Basin Mancos (Gas) Pool code 97232 (560 acres); and Bisti Lower Gallup Pool code 5890 (400 acres).
