Plugging Report  
Continental State SWD #1  
30-025-22551

**11/25/2020** Move in equipment and rig up. Nipple down wellhead and install BOP. Tubing was free after installing BOP. Attempted to set down on packer. Took 18' of subs to tag up. After tagging up the tubing would drag off bottom. POOH with all the subs and shut down.

12/2/2020 POOH with 54 stands. Found a hole in the bottom joint of the next stand. Laid down that stand, an additional 16 full joints and a 12.5' piece of a parted joint of tubing. SION. Will attempt to fish packer in the morning.

12/3/2020 Picked up overshot with 3' extension. RIH with 108 joints from the derrick and picked up 20 joints to tag the fish. Latched onto fish with 8' of the 20<sup>th</sup> joint of work string @ 4031'. Worked packer free. Stood back tubing to the overshot and laid down remaining bad tubing and the packer. Made bit trip to 4617'. Spot 25 sx Class cement at 4617' and POOH.

12/4/2020 Tagged cement at 4446'. Attempted to gain circulation. Pumped 40 bbls with no returns. Stopped pumping and the well went on a vacuum. Called OCD. Set a 5.5" CIBP on wireline at 4150'. RIH with tubing and tagged CIBP. Circulated MLF and spot 25 sx cement on top of CIBP. There was communication with the intermediate head while circulating MLF. POOH and SION.

12/7/2020 Tagged cement at 3956'. POOH and picked up packer. Isolated holes in the 5.5" casing from 3414' to 3445'. Set packer at 3160' and squeezed holes with 50 sx cement with CaCl. WOC and tagged cement at 3293'. POOH and SION.

12/8/2020 Perforated 5.5" casing at 2705'. Set packer at 2401' and squeezed perms with 50 sx cement with CaCl. WOC and tagged at 2559'. Laid down remaining tubing and perforate casing at 413'. Pumped down 5.5" casing to establish rate. Got weak returns from the intermediate head and noticed fluid coming out of the ground around the wellhead. Shut down

**12/9/2020** Rigged down and dug out cellar to expose the surface head. Replaced damaged connection on the surface head and plumbed to the pit. Pumped down the 5.5" casing to the perms. Fluid came out of the ground around the 12.75" surface casing below where we dug in out. Rigged up vac truck to catch returns in the cellar. Pumped cement down the 5.5" casing. Got returns to the intermediate head as well as in the cellar from the surface annulus. Cement came to surface at the intermediate head first. Closed the intermediate head valve and continued to pump until good cement was coming into the cellar from the holes in the 12.75" casing. Took 260 sx cement. Cut off wellhead. Cement had fallen slightly in the surface annulus, intermediate annulus as well as the 5.5" casing. WOC 3 hrs. Filled up all three strings with 10 sx cement. Cement remained at the surface. Installed below ground marker. Filled in cellar, removed the anchors, cleaned the pit and move out equipment.

QUESTIONS

Action 92868

**QUESTIONS**

Operator: READ & STEVENS INC P.O. Box 1518 Roswell, NM 88202	OGRID: 18917
	Action Number: 92868
	Action Type: [C-103] Sub. Release After P&A (C-103Q)

**QUESTIONS**

<b>Subsequent Report of: Location Ready For OCD Inspection After P&amp;A</b>	
Was this the last remaining or only well on the location	Yes
Are there any abandoned pipelines that are going to remain on the location	No
Is there any production equipment or structure (not including steel marker, poured onsite concrete bases, or pipelines) that is going to remain on the location	No
If any production equipment or structure is to remain on the location, please specify	none

**Site Evaluation**

Please answer all questions in this group.

Have all the required pits been remediated in compliance with OCD rules and the terms of the Operator's pit permit and closure plan	Yes
Have the rat hole and cellar been filled and leveled	Yes
Have the cathodic protection holes been properly abandoned	Yes
Has a steel marker, at least 4 inches in diameter and at least 4 feet above ground level, been set in concrete	Yes
The (concrete-set) steel marker shows: <i>Must attach marker photograph(s). *</i>	<b>THE OPERATOR NAME, LEASE NAME AND WELL NUMBER AND LOCATION, INCLUDING UNIT LETTER, SECTION, TOWNSHIP AND RANGE, SHALL BE WELDED, STAMPED OR OTHERWISE PERMANENTLY ENGRAVED INTO THE MARKER'S METAL.</b>
Has the location been leveled as nearly as possible to original ground contour	Yes
Have all the required pipelines and other production equipment been cleared	Yes
Has all the required junk and trash been cleared from the location	Yes
Have all the required anchors, dead men, tie downs and risers have been cut off at least two feet below ground level	Yes
Have all the required metal bolts and other materials have been removed	Yes

**Poured onsite concrete bases do not have to be removed.**

Have all the the required portable bases been removed	Yes
Have all other environmental concerns have been addressed as per OCD rules	Yes
If any environmental concerns remain on the location, please specify	none

\* Proof of the site marker (photograph) is required.

Please submit any other site photographs that would assist in documenting the above answers, site features, additional concerns, or other nearby / remaing structures and equipment.

**QUESTIONS**

<b>Abandoned Pipelines</b>	
<i>Only need to provide answers in this group, if any pipelines have been abandoned (in accordance with 19.15.35.10 NMAC).</i>	
Have all fluids have been removed from any abandoned pipelines	Yes
Have all abandoned pipelines been confirmed to <b>NOT</b> contain additional regulated NORM, other than that which accumulated under normal operation	Yes
Have all accessible points of abandoned pipelines been permanently capped	Yes

<b>Last Remaining or Only Well on the Location</b>	
<i>Please answer all questions that apply in this group, specifically if there is no longer going to be any well or facility remaining at this location.</i>	
Have all electrical service poles and lines been removed from the location	Yes
Is there any electrical utility distribution infrastructure that is remaining on the location	No
Have all the battery and pit location(s) have been remediated in compliance with OCD rules and the terms of the Operator's pit permit and closure plan	Yes
Have all the retrievable pipelines, production equipment been removed from the location	Yes
Has all the junk and trash been removed from the location	Yes
