13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Tap Rock requests the following:

1. Change the spacing unit size to 640 acres compromised of Units A B G H I J O P 15-24S-33E and A B G H I J O P 22-24S-33E based on Prometheus State Com 144H (API 30-025-48765) as the defining well.
2. Change the OH size according to attached description of work and casing table.

See attached updated C-102, description of OH Changes and casing table.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

TapRock requests the ability to change the OH size from 6-3/4" from drillout of intermediate to production TD, to instead drill these wellbore sections with the following OH sizes: 8-3/4" vertical to KOP x 7-7/8" curve and lateral. The 8-3/4" OH size in the drillout to KOP vertical wellbore section will keep cementing ECD's lower, helping to ensure overlap in the production cement job. Drilling the curve and lateral as 7-7/8" will allow the rig to drill with larger DP for performance, as well as allow for larger, more reliable motors to drill the curve and lateral wellbore sections. No changes are being made to the casing design.
