Franklin Mountain Energy3, LLC (FME3), Operator of the above captioned well, requests approval to conduct a cement squeeze. Failed MIT prior to step rate test. Scanned out with tubing and packer, ran RBP and tested casing. Casing has slow bleed off. Grab packer and RBP to test up hole to locate holes. Found holes from 8,877' – 9,008'. We will rig up cement truck to squeeze/set balanced plug with Class H cement from 8,737' – 9,138'. We will then drill out cement, run a scraper, pick up our RBP, run in with good injection string and new packer, and then notify the OCD to complete a new casing integrity test before performing the step rate test to return to injection.

**Condition of Approval: notify
OCD Hobbs office 24 hours
prior of running MIT Test & Chart**
