Actual Procedure: EPIC Energy is concerned about recent horizontal well completion and related activity near the Federal D #4 wellbore and ran a packer to isolate and protect the casing and wellhead from any unexpected pressure that may be encountered. Currently, a 4-1/2" packer is set at 4717" KB with 2-3/8", J55 tubing back to surface. Installed a 5K master valve and will monitor pressures for any horizontal well stimulation interference.
