State HU Com SWD #1 Workover NOI

Solaris would like to give notice of intent for a remedial workover on the above captioned well to repair a suspected tubing or packer leak. The plan is to rig up a pulling unit with hydraulic BOPs and pull the existing tubing and packer. The tubing string will be inspected for damage with any damaged joints being replaced with new 4", 11.0#, L-80, EZGO FJ3, IPC tubing. The existing packer will be replaced with a new one. The new packer and tubing string will be re-set at the same depth of 8,776' (base of tail pipe). The top of the packer depth will be 8,763' as it currently is. A new MIT will be called out and performed after the workover to ensure wellbore integrity.
