Subject: [EXTERNAL] P&A Revision for Hilcorp's NV NAVAJO 35 2 (API # 3004531437)

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

Good afternoon Kenny & Monica,

Hilcorp is planning to move onto the NV NAVAJO 35 2 (API # 3004531437) tomorrow (3/15/2024) for P&A.

Attached is the CBL run 5/10/2005. The log shows TOC @ ~114'. It appears this is the depth where they stopped logging at the time, and therefore the TOC may be shallower. Surface casing shoe is at ~147'.

Moving forward, Hilcorp requests the following adjustments to the approved NOI (attached):

- **For the following plugs, Hilcorp received verbal approval from the BLM to not tag or WOC if the pressure test against the CICR set above the perfs is good.**
- PLUG #1: 18sx of Class G Cement (15.8 PPG, 1.15 yield); FRD Perfs @ 1,313':
 - Set 4.5" CICR @ 1,263' per approved NOI
 - Pump an 18 sack balanced cement plug inside the 5-1/2" casing (est. TOC @ +/- 1,113' & est. BOC @ +/- 1,263')
- PLUG #2: 18sx of Class G Cement (15.8 PPG, 1.15 yield); FRD Top @ 812':
 - POOH w/ tubing to 862'
 - Pump an 18 sack balanced cement plug inside the 5-1/2" casing (est. TOC @ +/- 712' & est. BOC @ +/- 862')
- PLUG #3: 23sx of Class G Cement (15.8 PPG, 1.15 yield); Surf. Casing Shoe @ 147':
 - POOH w/ tubing to 197'
 - Pump a 23 sack balanced cement plug inside the 5-1/2" casing (est. TOC @ +/- 0' & est. BOC @ +/- 197')
 - RIH w/ 1" polyline in the 5-1/2" Casing x 8-5/8" Casing annulus, circulate cement to surface.
 - Top off as needed

Please let us know if you have any issues with this.

Thanks,

John LaMond
