Notice of Intent

Sundry ID: 2780560

Type of Submission: Notice of Intent

Type of Action: Drilling Operations

Date Sundry Submitted: 03/20/2024

Time Sundry Submitted: 12:24

Date proposed operation will begin: 03/20/2024

Procedure Description: Marathon Oil Permian LLC is submitting notification of sidetrack operations. Verbal approval was received before work commenced. While drilling intermediate hole section at 5250ft became stuck. The team attempted fishing the pipe and were unsuccessful. Contacted BLM requesting approval to run an open hole whipstock and sidetrack the well to continue. After reviewing the logs to confirm competent rock for a successful kick off and allowing for a sufficient amount of room to get the required well plan directional work done, it was decided to set the Whipstock at 4010ft MD. Bottom hole depth: 5247ft MD Top of Fish: ~4924ftMD Bottom of Fish: 5247ft MD Deepest interval/formation that was penetrated was the Brushy Canyon. 318ft of BHA remains in the hole. See attachment for details. (BHA was split at midway point of drill collar stands):

Surface Disturbance

Is any additional surface disturbance proposed?: No

Title 18 U.S.C Section 1001 and Title 43 U.S.C Section 1212, make it a crime for any person knowingly and willfully to make to any department or agency of the United States any false, fictitious or fraudulent statements or representations as to any matter within its jurisdiction.

(Instructions on page 2)

GENERAL INSTRUCTIONS

This form is designed for submitting proposals to perform certain well operations and reports of such operations when completed as indicated on Federal and Indian lands pursuant to applicable Federal law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local area or regional procedures and practices, are either shown below, will be issued by or may be obtained from the local Federal office.

SPECIFIC INSTRUCTIONS

Item 4 - Locations on Federal or Indian land should be described in accordance with Federal requirements. Consult the local Federal office for specific instructions.

Item 13: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by the local Federal office. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to the top of any tubing left in the hole; method of closing top of well and date well site conditioned for final inspection looking for approval of the abandonment. If the proposal will involve **hydraulic fracturing operations**, you must comply with 43 CFR 3162.3-3, including providing information about the protection of usable water. Operators should provide the best available information about all formations containing water and their depths. This information could include data and interpretation of resistivity logs run on nearby wells. Information may also be obtained from state or tribal regulatory agencies and from local BLM offices.

NOTICES

The Privacy Act of 1974 and the regulation in 43 CFR 2.48(d) provide that you be furnished the following information in connection with information required by this application.

AUTHORITY: 30 U.S.C. 181 et seq., 351 et seq., 25 U.S.C. 396; 43 CFR 3160.

PRINCIPAL PURPOSE: The information is used to: (1) Evaluate, when appropriate, approve applications, and report completion of subsequent well operations, on a Federal or Indian lease; and (2) document for administrative use, information for the management, disposal and use of National Resource lands and resources, such as: (a) evaluating the equipment and procedures to be used during a proposed subsequent well operation and reviewing the completed well operations for compliance with the approved plan; (b) requesting and granting approval to perform those actions covered by 43 CFR 3162.3-2, 3162.3-3, and 3162.3-4; (c) reporting the beginning or resumption of production, as required by 43 CFR 3162.4-1(c); and (d) analyzing future applications to drill or modify operations in light of data obtained and methods used.

ROUTINE USES: Information from the record and/or the record will be transferred to appropriate Federal, State, local or foreign agencies, when relevant to civil, criminal or regulatory investigations or prosecutions in connection with congressional inquiries or to consumer reporting agencies to facilitate collection of debts owed the Government.

EFFECT OF NOT PROVIDING THE INFORMATION: Filing of this notice and report and disclosure of the information is mandatory for those subsequent well operations specified in 43 CFR 3162.3-2, 3162.3-3, 3162.3-4.

The Paperwork Reduction Act of 1995 requires us to inform you that:

The BLM collects this information to evaluate proposed and/or completed subsequent well operations on Federal or Indian oil and gas leases.

Response to this request is mandatory.

The BLM would like you to know that you do not have to respond to this or any other Federal agency-sponsored information collection unless it displays a currently valid OMB control number.

BURDEN HOURS STATEMENT: Public reporting burden for this form is estimated to average 8 hours per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding the burden estimate or any other aspect of this form to U.S. Department of the Interior, Bureau of Land Management (1004-0137), Bureau Information Collection Clearance Officer (WO-630), 1849 C St., N.W., Mail Stop 401 LS, Washington, D.C. 20240

Additional Information

Additional Remarks

Deepest interval/formation that was penetrated was the Brushy Canyon.

318ft of BHA remains in the hole. See attachment for details. (BHA was split at midway point of drill collar stands):

[Report Suspicious](#)

Reviewed and is OK. Where will the whipstock be set, close to top of fish?

Terri,

Could you please submit a "NOI-Drilling Operations" sundry?

- In the description, please list out the well information Tony has listed below and additionally the whipstock set depth
- Please attach updated directional plans and a copy of this email

Please let me know when you have a sundry ID for me and I will get it processed.

Regards,

Keith Immatty

Subject: [EXTERNAL] Pierogi 302H Side Track

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

Keith,

Per our conversation, we were drilling intermediate hole section at 5250ft and became stuck. The team attempted fishing the pipe and were unsuccessful. Plan forward we are requested approval to run an open hole whipstock and side track the well to continue.

Well Information:

Well Name: Pierogi BS Federal COM 302H

API Number: 30-015-48294

Bottom hole depth: 5247ft MD

Top of Fish: ~4924ftMD

Bottom of Fish: 5247ft MD

Original BHA is attached.

Deepest interval/formation that was penetrated was the Brushy Canyon.

318ft of BHA remains in the hole. See snapshot below (BHA was split at midway point of drill collar stands):
