Well failed MIT prior to having pressure recorder attached. Loading production casing with water caused water to flow from tubing valve. Tubing to production casing communication.

Propose to move in pulling unit, release packer and test tubing as tubing is being pulled. Once tubing condition is determined replace any joints that failed pressure testing

Compare out of hole tally with replace tubing lengths determine tubing sub s needed, is any. Install injection packer and install tubing an packer to a similar depth as was original. Replace tubing head and surface piping. Load casing with packer fluid and test packer, casing and tubing to 1,500 psi for 30 minutes.
