**Re: Dugan Production Corp.  
Gallegos Fruitland Coal # 1  
API: 30-045-28232**

Based on the CBL ran, the TOC appear to be at 88'. We request the following change to the original approved NOI.

1. **Plug II- Surface 0-350': Will change plug to inside/outside.** Perforate at 80'. Break circulation to surface through squeeze holes. RIH open ended with tubing to 350' to cover 50' below NMOCD/BLM Kirtland tops. Spot plug from 350' to surface and circulate cement to surface from 80' through BH.

Please let us know if the revised proposal is acceptable to BLM/NMOCD and we will proceed accordingly.

Regards,
