13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

11/21/2025: Texas Standard Operating NM LLC respectfully requests a tubing exception be granted for a period of 6 months. Texas Standard Operating NM LLC decision to produce through the casing rather than installing tubing was based on comprehensive analysis of offset wells within the same reservoir, as well as internal well performance studies. These evaluations indicate that wells in this area are capable of sustaining natural flow for at least six months without the need for artificial lift. Following this period, artificial lift can be installed to support continued production and a subsequent sundry will be submitted with tubing installation information.
