Procedure Description: XTO Permian Operating LLC., respectfully requests your consideration for the deferral of cutting off the wellhead and setting the DHM for the above referenced well, that has been P&A'd. It is located on an active Mega Pad, 12 feet below ground in a concrete cellar that it shares with another well. It is within 35 feet of an active live well. XTO believes the risk of cutting the well head within the confined below ground and close to an active hydrocarbon source to be higher than the benefit of removing the wellhead and installing the marker at this time. Please see attached pictures for your review.

Surface Disturbance

Is any additional surface disturbance proposed?: No
