WBDU 1929-091G C-103 NOI to P&A well:

Per C-103 Subsequent Report dated 10/12/11, this well had a CIBP set at 2700' with 10 sks of cement on top of it in October, 2011. Calculated 96' of cement, TOC at 2604'. Well was approved by NMOCDS as TA effective 10/24/11.

Hess now proposes to convert this well from TA to P&A per the procedure below:

Check pressure on wellhead, excavate around wellhead, cut off wellhead below ground level, spot 3 sks of cement in top of casing, weld steel plate across casing and install P&A marker, backfill around P&A marker, cut off anchors below ground level and level/clean location. Reseed location during late summer, 2014.

Spud Date:

08/01/2007

Rig Release Date:

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
