Oil Conservation Division
1220 S. St. Francis Drive
Santa Fe, NM 87505

Dear Mr. Stogner:

Burlington Resources is applying for administrative approval of an unorthodox gas well location for the Basin Fruitland Coal formation.

The subject well was staked at the above referenced location due to steep cliffs and rugged terrain within the legal spacing window for the Fruitland Coal formation, as shown on the attached topography map. Consequently, we desire to twin the well with the existing Mesaverde well pad, the San Juan 32-9 Unit #40A (NSL Order # 4080) as this is the only available surface location in the NW/4. The Fruitland Coal has an approved non-standard dedicated spacing unit of 196.56 acres (NSP # R-9222), encompassing Lots 7, 8, 9, 10, 15, 16, 17 & 18 of Section 30 T32N, R9W. Although we researched directional drilling back to a standard location, we found it uneconomical to do so.

The following attachments are for your review:

- Approved application for Permit to Drill and C-102 at referenced location
- Offset operators / owners plat / 9 Section Plat
- Topographic Map of Section 30

Three copies of this application are being submitted to offset operator / owner by certified mail. Please let me know if you have any questions about this application.

Sincerely,

Joni Clark
Regulatory Specialist

Re: San Juan 32-9 Unit #277S
1630' FNL, 1630' FWL, Section 30, T32N, R9W, San Juan County
30-039-32137

I hereby certify that the following offset owners/operators have been notified by certified mail of our application for administrative approval for non-standard well location of the above well.
