Re: Surface Commingling Application

Dear Mr. Catanach,

As per your request in the letter dated April 15, 2003 the following information is being furnished.

- (a) The Byers ZV . #1 is dually completed in the Abo and Wolfcamp formations. Commingling does not occur until the surface.
- (b) The production between the Abo and Wolfcamp for the #1 well will be allocated based off of initial test percentage factors obtained prior to opening the surface valve to commingle the (2) zones.
NOTE: Even though we are capable of well testing the production from the (2) zones on the #1 well by closing the surface valves, we are requesting an alternative method based on the following production volumes of this well.
avg daily production:
Abo formation = oil -0- bbls per day
gas 40 mcf pd
Wolfcamp formation= oil -0- bbls per day
gas 230 mcf pd
- (c) Attached are the plats.

If you have any questions please don't hesitate to call me at 505-748-4205.

Sincerely,

Michelle Taylor
Regulatory Compliance Manager
