Mr. Pierce,

In your application letter dated July 14th (received by the NMOCD on July 27th) you stated that "[T]he well is no longer commercial in the Morrow formation and has been recompleted as a Wildcat Strawn gas producer." The accompanying OCD form C-102 also shows Wildcat Strawn Gas. However, in the attached letter from the BLM dated July 15, 2004 states "effective as of February 4, 2004, the dated of first production from the Atoka formation." Which interval was this well recompleted into; is the gas from the Atoka or Strawn formation?

Mr. Stogner,  
The Atoka formation was tested but proved non-commercial; the well was then plugged back to the Strawn and commercial gas production was established.  
Thanks,  
Bill Pierce
