Subject: WPX NSL's

Mr. Stogner,

I might be running into a scheduling problem with my drilling rig that is working for Williams. We are trying to squeeze in everything that we can before the wildlife closures start and I've got the Rosa 222A & Rosa 268A coming up quicker than I anticipated. I know you work on things as they come in, so I just wanted to make sure everything is OK with the applications for requesting administrative approval for NSL's that you just got.

Looking at the schedule I've got about 8 to 10 days before the rig will be ready to move. I'm very sorry to send something in then turn right around and start asking for the approval but I guess it just snuck up on me!!

Thanks, John Thompson
