Attention: W. T. Weller, Jr.

Administrative Order No. DHC-279
Taylor-Glenn Well No. 10,
Unit F, Section 3, Township 21 South,
Range 37 East, NMPM, Lea County, New Mexico.
Tubb Gas Pool and Drinkard Pool

Gentlemen:

Reference is made to your recent application for an exception to Rule 303-A of the Division Rules and Regulations for the subject well to permit the commingling of the production from both pools in the well-bore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 303-C, and that reservoir damage or waste will not result from such down-hole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above.

In accordance with the provisions of Rule 303-C, total commingled oil production from the subject well shall not exceed 40 barrels per day, and total water production from the well shall not exceed 80 barrels per day. The maximum amount of gas which may be produced daily from the well shall be determined by multiplying 2000 by top unit allowable for the Tubb Gas Pool.

Assignment of allowable to the well and allocation of production from the well shall be on the following basis:

Upper Pool: Oil 8%, Gas 67%
Lower Pool: Oil 92%, Gas 33%

Pursuant to Rule 303-C 5, the commingling authority granted by this order

-2-
DHC-279

may be rescinded by the Division Director if, in his opinion, conservation is not being best served by such commingling.

Very truly yours,

JOE D. RAMEY
Division Director
