Re: State H-35 Well No. 9, Unit H,
Sec. 35, T-17-S, R-34-E, Lea
County, New Mexico
Vacuum Abo North and Vacuum
Wolfcamp Pools

Gentlemen:

Reference is made to your recent application for an exception to Rule 303-A of the Division Rules and Regulations for the subject dually completed well to permit the removal of the down-hole separation equipment and to commingle the production from both pools in the wellbore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 303-C, and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and Division Order No. MC-1411 Form C-107, dated November 5, 1963, which authorized the dual completion and required separation of the two zones, is hereby placed in abeyance.

In accordance with the provisions of Rule 303.C.4., total commingled oil production from the subject well shall not exceed 70 barrels per day, and total water production from the well shall not exceed 140 barrels per day. The maximum amount of gas which may be produced daily from the well shall be determined by multiplying 2,000 by top unit allowable for the Vacuum Abo North Pool.

Assignment of allowable to the well and allocation of production from the well shall be on the following basis:

Vacuum Abo North Pool: Oil 30 %, Gas 5 %
Vacuum Wolfcamp Pool: Oil 70 %, Gas 95%

Pursuant to Rule 303-C 5, the commingled authority granted by this order may be rescinded by the Division Director if, in his opinion, conservation is not being best served by such commingling.

Very truly yours,

JOE D. RAMEY,
Division Director
