Commingling of the above wells will result in the production of hydrocarbons that would not otherwise be economical to produce, thereby preventing waste.

In support of commingling we offer the following:

- (1) Commingling of wells as approved on Commission Order No. 7980, Dated July 11, 1985 has resulted in better operation of wells.
- (2) These wells are in same area as wells approved on Order # 7980.
- (3) As shown on attached schematic, Packer will be set between zones with reverse flow check valve installed to prevent higher pressure Dakota Zone below from commingling with Mesa Verde Zone.
- (4) Production will be commingled downhole in production tubing only.
- (5) Fluids from both Zones compatible.
- (6) Ownership Common, including working interests and royalty interests.
- (7) Bottomhole pressures taken on wells in this area have shown Mesa Verde pressure to be 70% of Dakota pressure.
- (8) Nine section plat attached, showing all offset acreage ownership, also shows all wells now commingled in Mesa Verde and Dakota Zones.
- (9) Well to be commingled identified by circle, all other commingled wells by arrow and Division Order Number.
- (10) Caulkins Oil Company will consult with Supervisor of Aztec District Office to determine allocation formula for each of the wells as they are commingled.
- (11) All offset operators have been furnished with Copy of this Application. Receipt for Certified Mail attached.

- (12) Copy of Sundry Notice to BLM on Federal wells attached.
- (13) Copy of Sundry Notice to State of New Mexico on State wells attached.

Yours very truly,

Charles E. Verquer, Supt.
