Michael –

Regarding Dugan's application covering the captioned well, it came to our attention only this week that a deadline of this Thursday had been imposed for voluntary responses. Even though we did in fact receive the information in January, the San Juan/Fruitland/Bisti areas of responsibility within Questar have been in the process of transfer to our new landman, Art Bills. Unfortunately, a number of the projects in these areas have not been handled as the transfer of responsibility is continuing.

Conceptually, I believe that Questar will not have a problem with Dugan's proposal. However, in addition to finalizing an effective date with Dugan, the formal approval of Dugan's request requires management approval and those who can approve this are in meetings in Salt Lake City, Utah.

Therefore, we respectfully request an extension until Friday, March 25th to provide a formal written response. We would support the opportunity to have this resolved through administrative approval rather than a formal hearing, however due to the factors cited above, a formal, management approved response cannot be made this week.

Thank you for your consideration of our request. Please feel free to contact me should you have any questions. And, please tell Will Jones I said hello and hope that he is doing well.

The subject application was filed by Dugan Prod. Corp. on January 18, 2005. Pursuant to Division Rule 104.F (4) an affected party has 20-days to object. The suspense date for this application was February 7, 2005. While this application is still pending additional information to complete this request, the Division can not honor Questar's objection, much less your request for additional time. However should Questar feel there is a correlative rights issue, Questar, as applicant, can file an application for hearing before a Division Hearing Officer to show that such request by Dugan should not be approved.

Because of the nature of the application and Questar's role as an affected party, please conduct any additional correspondence you may have with the Division in writing, either through e-mail or fax. Thank you for your cooperation.

Michael –

Thank you for your quick reply. I hope there was no misunderstanding in that we *are not* objecting to Dugan's request for unorthodox spacing. Our issue would be a private contractual matter with Dugan to determine the accounting on the existing Alamo Com #90 well and as such, we are continuing our dialogue w/Dugan. We just hated to see this thing go to a hearing if it could be done administratively, that's all.

My best to Bill Carr as well.

Thanks.
