NATURE OF RELEASE

Type of Release Produced Water	Volume of Release 180	Volume Recovered 160
Source of Release 2x1 swedge	Date and Hour of Occurrence 06/28/11	Date and Hour of Discovery 06/28/11 7am
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Randy Dade and Mike Bratcher; as well as Justin with BLM	
By Whom? Natalie Gladden	Date and Hour 942am 06/28/11	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

2x1 swedge on transfer pump busted releasing 180bbls of produced water and recovering 160bbls of produced water The fluid was released both inside the bermed area as well as on the well pad for the Randy Federal #4. The swedge was replaced immediately.

Describe Area Affected and Cleanup Action Taken.*

Inside the berm and on the location pad will be remediated according to the NMOCD Guidelines to closure. There is no water wells with in a six mile radius. We have data that 2 miles west of this facility that we do not have water as well; refer to the Red Water Station release

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Importance: High

Randy/Mike,

A 2 x 1 swedge on the transfer pump busted during the night, which released approximately 180bbls of produced water and 160bbls was recovered. The fluid filled up the containment walls and escaped onto the Randy Federal #4 location pad. I have tried to reach both of you as well as Richard Inge for notification, but I was unable to reach either of you by phone. I have crew's in route to start the initial spill response procedures. We will hand auger inside of the battery to find the extent of the contamination before any remediation takes place inside the containment area. Once determined I will communicate with you a proper plan of action. The location area will be remediated immediately once One-calls are clear. I have searched the USGS Ground Water Data System and found that the only water well in the area is in a six mile radius at 110' in total depth. Approximately 1 mile to the west of the Randy Federal Transfer Station, we drilled to find water on the Red Water Station and were unable to locate any water in the area. I will be emailing you a copy of the C141 and original will be put in the mail.

Call me at 575-390-4186 if you have any questions. Thanks for your assistance in this matter and have a great day!

Update:

We have currently hand dug inside the battery at approximately 1.5' in depth to dry soil and have recorded a decline in chlorides. I am currently trying to get a boring rig to drill for ground water but most likely won't be able to get one until July 11th. We will start on the pad remediation Monday. This is another situation that inside the bermed area there obviously was previous contamination left by Marbob. More updates to follow.
