**RE: Renewal of Permit # HBP-024  
Annual Temporary Permission to  
Discharge Hydrostatic Test Water**

Dear Mr. Jones:

BOPCO, L.P. is requesting to renew our *Annual Temporary Permission* to discharge hydrostatic test waters from new crude oil and/or natural gas pipelines. Discharges will occur within BOPCO, L.P. right-of-ways and will be discharged in a manner so as to control soil erosion and to prevent sediment discharging from the site. Methods to be utilized to control sediment will include: filter bags, detention basins, right-of-way dust suppression, aid the compaction trench backfill, or placing the water in the trench and allowing it to soak in or evaporate.

The annual temporary permission authorizes BOPCO, L.P. to discharge hydrostatic test waters in Southeast New Mexico (Eddy County and Lea County). Our request for an annual temporary permission to discharge will cover hydrostatic test that are conducted during an approved one-year period with the following applicable conditions:

- a) The water volume does not exceed 25,000 gallons per hydrostatic test;
- b) Only water from a public/municipal water supply or other OCD approved sources will be used for each test;
- c) BOPCO, L.P. will provide oral or written notification to the OCD at least 72 hours prior to each hydrostatic discharge event;
- d) The discharge test water will not enter any lake, perennial stream, river or their respective tributaries that may be seasonal;
- e) No discharge shall occur:
  - a. where ground water is less than 10 feet below ground surface;
  - b. within 200 feet of a watercourse, lakebed, sinkhole or playa lake;
  - c. within an existing wellhead protection area;

- d. within 500 feet of a wetland; or
- e. within 500 feet from the nearest permanent residence, school, hospital, institution or church;
- f) Best management practices will be implemented to contain the discharge onsite, ensure that it does not impact adjacent property, and to control erosion;
- g) The discharge will not cause any fresh water supplies to be degraded or to exceed standards as set forth in Subsections A, B, and C of the 20.6.2.3103 NMAC (the New Mexico Water Quality Control Commission Regulations);
- h) The landowner(s) of each proposed discharge and/or collection/retention or alternative discharge location will be properly notified of the activities prior to each proposed hydrostatic test event; and
- i) BOPCO, L.P. will submit an annual report, summarizing all tests of new pipe with less than 25,000 gallons discharge per hydrostatic test event, to the OCD within 45 days after the temporary permission expiration date. The report shall contain the following information:
  - a. the location of hydrostatic test (Sec/TS/Range or GPS coordinates);
  - b. the date of each test;
  - c. the volume of each discharge; and
  - d. the source and quality of test water (lab analysis, if necessary)

I have enclosed check #805626 for \$250.00 to cover the filing fee (\$100.00) and temporary permission fee (\$150.00.)

Your time and attention to this request is appreciated. If further information is required, please do not hesitate to call me at 817.390.8823 or email me at [wbiehl@basspet.com](mailto:wbiehl@basspet.com).

RE: **Renewal of Permit # HBP-024  
Annual Temporary Permission to  
Discharge Hydrostatic Test Water**

Dear Mr. Jones:

BOPCO, L.P. is requesting to renew our *Annual Temporary Permission* to discharge hydrostatic test waters from new crude oil and/or natural gas pipelines. Discharges will occur within BOPCO, L.P. right-of-ways and will be discharged in a manner so as to control soil erosion and to prevent sediment discharging from the site. Methods to be utilized to control sediment will include: filter bags, detention basins, right-of-way dust suppression, aid the compaction trench backfill, or placing the water in the trench and allowing it to soak in or evaporate.

The annual temporary permission authorizes BOPCO, L.P. to discharge hydrostatic test waters in Southeast New Mexico (Eddy County and Lea County). Our request for an annual temporary permission to discharge will cover hydrostatic test that are conducted during an approved one-year period with the following applicable conditions:

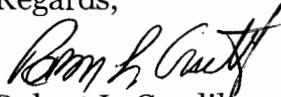

- a) The water volume does not exceed 25,000 gallons per hydrostatic test;
- b) Only water from a public/municipal water supply or other OCD approved sources will be used for each test;
- c) BOPCO, L.P. will provide oral or written notification to the OCD at least 72 hours prior to each hydrostatic discharge event;
- d) The discharge test water will not enter any lake, perennial stream, river or their respective tributaries that may be seasonal;
- e) No discharge shall occur:
  - a. where ground water is less than 10 feet below ground surface;
  - b. within 200 feet of a watercourse, lakebed, sinkhole or playa lake;
  - c. within an existing wellhead protection area;

- d. within 500 feet of a wetland; or
- e. within 500 feet from the nearest permanent residence, school, hospital, institution or church;
- f) Best management practices will be implemented to contain the discharge onsite, ensure that it does not impact adjacent property, and to control erosion;
- g) The discharge will not cause any fresh water supplies to be degraded or to exceed standards as set forth in Subsections A, B, and C of the 20.6.2.3103 NMAC (the New Mexico Water Quality Control Commission Regulations);
- h) The landowner(s) of each proposed discharge and/or collection/retention or alternative discharge location will be properly notified of the activities prior to each proposed hydrostatic test event; and
- i) BOPCO, L.P. will submit an annual report, summarizing all tests of new pipe with less than 25,000 gallons discharge per hydrostatic test event, to the OCD within 45 days after the temporary permission expiration date. The report shall contain the following information:
  - a. the location of hydrostatic test (Sec/TS/Range or GPS coordinates);
  - b. the date of each test;
  - c. the volume of each discharge; and
  - d. the source and quality of test water (lab analysis, if necessary)

I have enclosed check #804192 for \$250.00 to cover the filing fee (\$100.00) and temporary permission fee (\$150.00.)

Your time and attention to this request is appreciated. If further information is required, please do not hesitate to call me at 817.339.7050 or email me at [rgawlik@basspet.com](mailto:rgawlik@basspet.com).

RE: Retraction of NOI notification

Dear Mr. Jones:

BOPCO would like to retract the NOI notification sent to you on August 23, 2011, in reference to a hydrostatic discharge of approximately 20,370 gallons of test water. BOPCO's annual hydrostatic discharge permit is HBP-024, under which this hydrostatic discharge is included. BOPCO intends to use a municipal water supply for the test and will give 72 hour notification prior to hydrostatic test water discharge.

Sincerely,

Guy Gage  
Manager - Pipeline Operations/Engineering

RE: Notice of Intent (NOI) to discharge  
Hydrostatic Test Water

Dear Mr. Jones:

BOPCO, L.P. is submitting a Notice of Intent (NOI) to discharge hydrostatic test water. Our operator information is as follows:

BOPCO, L.P.  
201 Main Street, Suite 2900  
Fort Worth, Texas 76102  
(817) 339-7257

We will be testing 13,500 feet of new pipeline and propose to discharge the test water at one (1) location. Also, there will be two (2) road crossing bores that will be tested individually and the test water discharged at each crossing. The pipeline will be constructed of steel pipe with the following pipe specifications are 6.625" x .280 API 5L X42. All pipe used in this pipeline is new pipe that has never been in service before and will be utilized in this operation for gathering crude oil.

The locations of discharges are indicated on the last page of the attached topographic plats. BOPCO has conducted an archaeological survey on the right-of-way (ROW), however the proposed discharge locations will be archaeological surveyed and cleared before discharging. Permission will be obtained from the landowner prior to any discharge of test waters to the surface.

The test water to be used will be from an approved water source in either Eddy County or Lea County, New Mexico. No chemicals will be added to the test water. The estimated

commencement date for hydrostatic testing and discharge of test waters is on or after August 31, 2011.

There will be a total of approximately 485 barrels (20,370 gal) of water to discharge at a rate of approximately 175 gpm. When water is discharged it will flow through a series of hay bales for filtering and erosion control. The discharge location will be within the pipeline ROW. There are no waterways, creek beds, etc., within the area of water discharge. The water table depth is estimated to be greater than 50' below the surface.

**Discharge locations:** See attached map for discharge locations 1-3 as noted. Hydrostatic waters discharge locations are all in Eddy County, NM.

Location #1 – Rail Road bore – estimated discharge 7 bbl (294 gal)

(N32 21' 16.81" W103 51' 57.1")

Location #2 – County Rd 796 crossing – estimated discharge 7 bbl (294 gal)

(N32 21' 53.81" W103 51' 38.26")

Location #3 - James Ranch Unit #55 – estimated discharge 471 bbl (19,782 gal)

(N32 22" 5.45" W103 51' 57.1")

I certify that I am authorized to make this application, that this application was prepared by me or under my supervision and direction, and that the data and facts stated herein are true, correct, and complete to the best of my knowledge.

Sincerely,

Guy Gage  
Manager - Pipeline Operations/Engineering

**RE: Renewal of Permit # HBP-024  
Annual Temporary Permission to  
Discharge Hydrostatic Test Water**

Dear Mr. Jones:

BOPCO, L.P. is requesting to renew our *Annual Temporary Permission* to discharge hydrostatic test waters from new crude oil and/or natural gas pipelines. Discharges will occur within BOPCO, L.P. right-of-ways and will be discharged in a manner so as to control soil erosion and to prevent sediment discharging from the site. Methods to be utilized to control sediment will include: filter bags, detention basins, right-of-way dust suppression, aid the compaction trench backfill, or placing the water in the trench and allowing it to soak in or evaporate.

The annual temporary permission authorizes BOPCO, L.P. to discharge hydrostatic test waters in Southeast New Mexico (Eddy County and Lea County). Our request for an annual temporary permission to discharge will cover hydrostatic test that are conducted during an approved one-year period with the following applicable conditions:

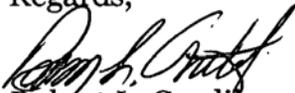

- a) The water volume does not exceed 25,000 gallons per hydrostatic test;
- b) Only water from a public/municipal water supply or other OCD approved sources will be used for each test;
- c) BOPCO, L.P. will provide oral or written notification to the OCD at least 72 hours prior to each hydrostatic discharge event;
- d) The discharge test water will not enter any lake, perennial stream, river or their respective tributaries that may be seasonal;
- e) No discharge shall occur:
  - a. where ground water is less than 10 feet below ground surface;
  - b. within 200 feet of a watercourse, lakebed, sinkhole or playa lake;
  - c. within an existing wellhead protection area;

- d. within 500 feet of a wetland; or
- e. within 500 feet from the nearest permanent residence, school, hospital, institution or church;
- f) Best management practices will be implemented to contain the discharge onsite, ensure that it does not impact adjacent property, and to control erosion;
- g) The discharge will not cause any fresh water supplies to be degraded or to exceed standards as set forth in Subsections A, B, and C of the 20.6.2.3103 NMAC (the New Mexico Water Quality Control Commission Regulations);
- h) The landowner(s) of each proposed discharge and/or collection/retention or alternative discharge location will be properly notified of the activities prior to each proposed hydrostatic test event; and
- i) BOPCO, L.P. will submit an annual report, summarizing all tests of new pipe with less than 25,000 gallons discharge per hydrostatic test event, to the OCD within 45 days after the temporary permission expiration date. The report shall contain the following information:
  - a. the location of hydrostatic test (Sec/TS/Range or GPS coordinates);
  - b. the date of each test;
  - c. the volume of each discharge; and
  - d. the source and quality of test water (lab analysis, if necessary)

I have enclosed check #802759 for \$250.00 to cover the filing fee (\$100.00) and temporary permission fee (\$150.00.)

Your time and attention to this request is appreciated. If further information is required, please do not hesitate to call me at 817.339.7050 or email me at [rgawlik@basspet.com](mailto:rgawlik@basspet.com).

Leonard,

GW-023

Thank you for the quick responses to both this, and the Artesia Gas Plant correspondences detailing our upcoming planned work. I am traveling this week and am trying to pull this information together for you as quickly as I can. I anticipate having a complete response to your Artesia questions and comments by close of business tomorrow, and I will do my best to have answers to these comments/questions by close of business Monday.

Again, I appreciate your support in reviewing these notifications in a timely fashion. I look forward to answering your questions in a similarly quick manner.

Sincerely,

Keith

Mr. Warren,

Good afternoon,

Re: Modification of Discharge Permit (GW-128)

**19.15.2.7 DEFINITIONS: B.** Definitions beginning with the letter "B". (5)

"Below-grade tank" means a vessel, excluding sumps and pressurized pipeline drip traps, where a portion of the tank's sidewalls is below the surrounding ground surface's elevation. Below-grade tank does not include an above ground storage tank that is located above or at the surrounding ground surface's elevation and is surrounded by berms.

RE: Rescind request

Dear Mr. Jones:

BOPCO, L.P. is requesting that our previous letter for temporary permission to discharge hydrostatic test waters be rescinded. Also, please apply the \$100.00 filing fee from that request to BOPCO's current request for Annual Temporary Permission to Discharge.

Your attention to this request is appreciated. If more information is required please do not hesitate to call me at (817)339.7050 or email [rgawlik@basspet.com](mailto:rgawlik@basspet.com).

RE: Temporary Permission to Discharge  
Hydrostatic Test Water

Dear Mr. Jones:

BOPCO, L.P. is submitting a request for temporary permission to discharge hydrostatic test water. Our operator information is as follows:

BOPCO, L.P.  
201 Main Street, Suite 2900  
Fort Worth, Texas 76102  
(817) 339-7257

We will be testing 28,200 feet of new pipeline in two (2) sections and propose to discharge the test water at one (1) location. Also, there will be two (2) road crossing bores that will be tested individually and the test water discharged at each crossing. The pipeline will be constructed of steel pipe with the following pipe specifications are 6.625" x .280 API 5L X42. All pipe used in this pipeline is new pipe that has never been in service before and will be utilized in this operation for gathering crude oil.

Included with this request is a check for the filing fee of \$100.00 made payable to:

Water Quality Management Fund  
C/o: Oil Conservation Division  
1220 S. Saint Francis Drive  
Santa Fe, New Mexico 87505

RECEIVED OGD  
2010 OCT 26 P 12:23

The locations of discharges are indicated on the last page of the attached topographic plats. BOPCO has conducted an archaeological survey on the right-of-way (ROW), however the proposed discharge locations will be archaeological surveyed and cleared before discharging. Permission will be obtained from the landowner prior to any discharge of test waters to the surface.

The test water to be used will be from an approved water source in either Eddy County or Lea County, New Mexico. No chemicals will be any added to the test water. The estimated commencement date for hydrostatic testing and discharge of test waters is on or after December 7, 2010.

There will be a total of approximately 570 barrels (23,940 gal) of water to discharge at a rate of approximately 175 gpm. When water is discharged it will flow through a series of hay bales for filtering and erosion control. The discharge location will be within the pipeline ROW. There are no waterways, creek beds, etc., within the area of water discharge. The water table depth is estimated to be greater than 50' below the surface.

**Discharge locations:** See attached map for discharge locations 1-3 as noted. Hydrostatic waters discharge locations are all in Eddy County, NM.

Location #1 – North Road bore – estimated discharge 9 bbl (380 gal)

Location #2 – South Road bore – estimated discharge 9 bbl (380 gal)

Location #3 - James Ranch Unit #15 – estimated discharge 552 bbl (23,180 gal)

I certify that I am authorized to make this application, that this application was prepared by me or under my supervision and direction, and that the data and facts stated herein are true, correct, and complete to the best of my knowledge.

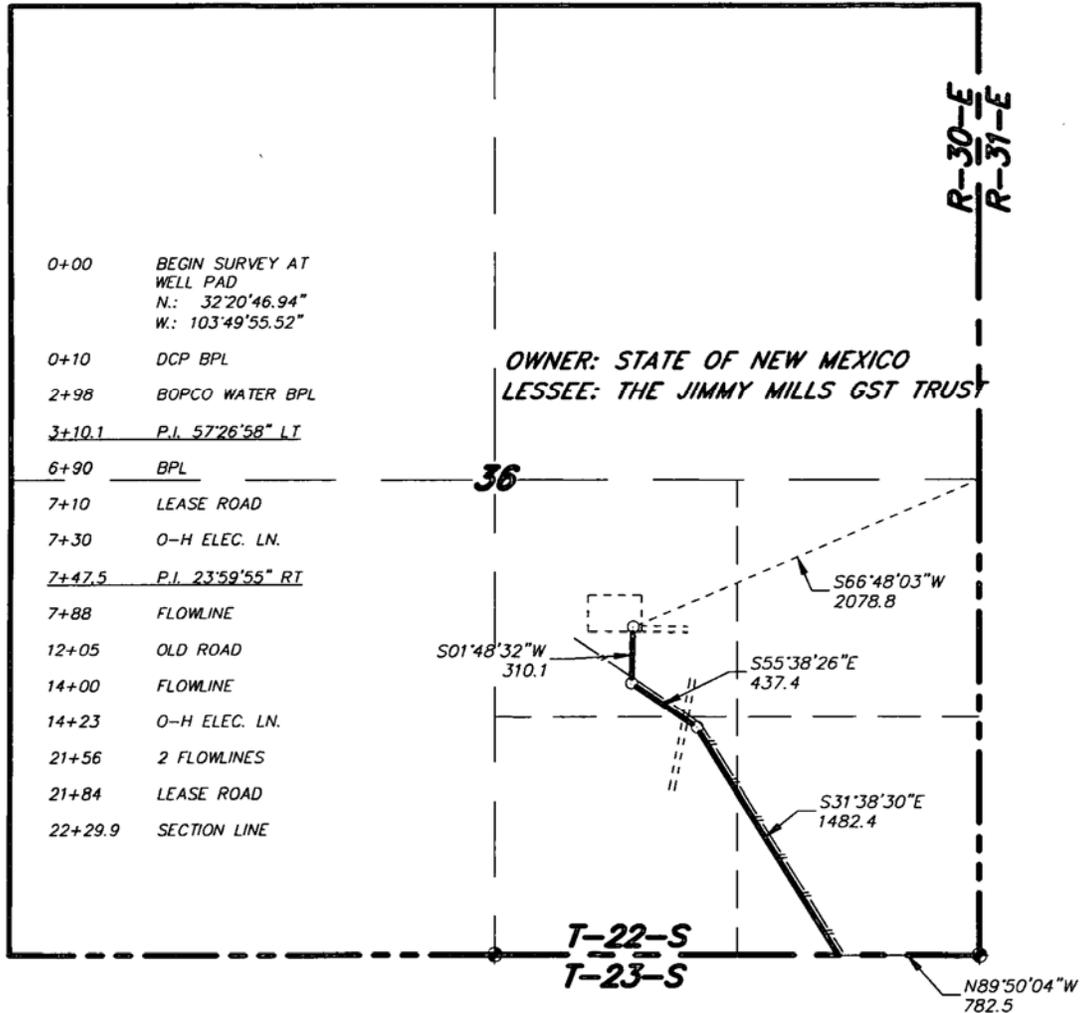

Sincerely,

Guy Gage  
Manager - Pipeline Operations/Engineering
