Jami Bailey  
Oil Conservation Division  
New Mexico Department of Energy,

**Re: Application of WPX Energy Production, LLC for administrative approval to surface commingle (diverse ownership) production from the Basin Mancos Gas Pool (97232) and the Nageezi Gallup Oil Pool (47540) for its Chaco 2308 16I 147H and Chaco 2308 16I 148H wells, San Juan County, New Mexico.**

Dear Ms. Bailey:

WPX Energy Production, LLC (OGRID 120782) proposes to surface commingle the production from two horizontal wells, the Chaco 2308 16I 147H (30-045-35439) and Chaco 2308 16I 148H (30-045-35500). The affected wells involve pool and lease commingling with diverse ownership.

The Oil Conservation Division has previously approved both the Chaco 2308 16I 147H and the Chaco 2308 16I 148H for downhole commingling of production from the Nageezi Gallup Oil Pool (47540) and the Basin Mancos Gas Pool (97232). See Orders DHC-4602 and DHC-4653. Pursuant to NMAC 19.15.12.10.C, WPX now seeks authority to surface commingle the production from each of these wells at a common surface facility. In support of this application, WPX provides the following exhibits:

**Exhibit 1** is a completed Application for Surface Commingling (Diverse Ownership) Form C-107-B.

**Exhibit 2** is a land map identifying the two horizontal wells, the two state leases, and the two pools at issue.

**Exhibit 3** is a plat of the proposed common facility area.

**Exhibit 4** is a diagram of the surface facilities.

**Exhibit 5** is a list of the affected parties for the request for approval for surface commingling. A copy of this application with all attachments has been sent by certified mail to

HOLLAND & HART LLP

each of these affected parties advising them that if they have an objection they must file it in writing with the division within 20 days from the date the division receives WPX's application. Since state trust lands are involved, pursuant to NMAC 19.15.12.10(C)(4)(h) WPX is also seeking authority for surface commingling from the New Mexico State Land Office and has likewise notified the Office of this application.

**Exhibit 6** is proof of the publication of this application in the Farmington Daily Times directed by name to an overriding royalty owner WPX was been unable to locate. This public notice advises the named party of an obligation to file any objection in writing with the Division within 20 days of publication.

Your attention to this matter is appreciated.

Sincerely,

Michael H. Feldewert

Each well will be metered individually, with the gas metered using an orifice meter, the oil using a Coriolis meter, and the water using a Vortex meter. None of the individual well's production streams will be comingled prior to being measured.

Currently, only the 147H is producing and that information is available on OCD's website. As a result, there currently is no surface commingling production to report. In regards to an estimate of production, we are not sure how to estimate the production except using the production from the currently producing 147H.

Michael:

Can you get Heather Riley in the Aztec office to e-mail me a description of how the wells will be metered? Will the well be metered individually?

I will also need the last 6 month's production, and cum production. If the wells have not produce for that period, then I will need what production exists. If they do not have any production, then I will need an estimate of production of the wells.

Thank You
