Logos is requesting approval to surface commingle the gas production from the Logos 701H and the Logos 702H with the production being commingled at a central delivery point just off the well pad. Both wells are on the same lease, being drilled in the same pool from the same well pad, and have identical ownership. The method of allocation will be subtraction method using an electronic meter on the well pad. Please see attachments. All volumes recorded but not allocated to the 701H will be allocated to the 702H. All production will be sold at the Williams pipeline central delivery point.
