RE: Unorthodox Location Request

Dear Sir,

Whiting Oil & Gas respectfully requests an administrative unorthodox location order be granted for the two proposed well locations listed below.

Whiting Oil & Gas  
Lewis 2028 Well # 261  
Section 26, Unit Letter L, T20N, R28E  
2590 FSL & 1077' FWL  
Harding County, New Mexico

Whiting Oil & Gas  
Lewis 2028 Well # 351  
Section 35, Unit Letter P, T20N, R28E  
1112 FSL & 1284 FEL  
Harding County, New Mexico

Attached is the survey plat, topographic map, aerial photo map for each of the wells listed above. As evident by the maps attached Whiting requests the non-standard location exception due to the rough terrain in these sections. Locating the wells at the current flat surface locations minimizes possible flash flooding problems, keeps the wells away from cliff and canyon edges to avoid fluid losses, safer access for roads and pipelines and optimizes the use of existing county and lease roads. Whiting drills these wells with surface pits and that needs to be taken into account.

The proposed well locations are closer to the spacing units outer border therefore the affected persons are in the adjoining spacing units towards which the unorthodox location encroaches. The Bureau of Land Management is the only mineral owner that could be affected by the location of the Lewis 2028 Well # 261. The proposed location is 1077' from the west section line. The BLM has been sent a copy of this application, please reference attached certified verification of notification. Whiting has leased all other affected spacing units. Please reference attached map.

Sincerely,
