Mr. McMillan,

The Bureau of Land Management encouraged this location to be used because of cave/karst considerations and to avoid nearby drainage ditches. The granting of this request is not expected to cause waste of resources.

Thanks,

Why is the NSL location better than a standard location? This would be the reason for NSL application.

Mr. McMillan,

We are 50' too close to the project area (208' from project area border on the west side) and yes Lot 1 in Section 36 is less than 28 acres.

Thanks,  
Ashley Bergen

Why are you applying for the NSL?  
Is the NSP required, because the Lot in Section 36 is less than 28-acres?  
Thank You  
Michael McMillan

Paul:

Look at API 30-015-41235. ConocoPhillips Golden Spur WC 25 Well No. 2H. Surface-Unit P Section 25, T26S R31E. This has the same project area in Section 25 as the ConocoPhillips Golden Spur 36 Com. W1 Well No. 2H(this well has project area in E/2 E/2 of Section 25 and 36).

Here is the pool that production is allocated to the Golden Spur WC 25 Well No. 2H WC-015 G-08 S263125P;WOLFCAMP Pool code 98012.

Do we want overlapping project areas-we would be giving TWO allowables for each spacing unit in Section 25,
